Formulae for calculation of financial indicators

EBITDA	Operating profit (loss) + depreciation and amortization, net of the effects of non-recurring expenditure from the operating segments such as restructuring costs, legal expenses, non-current assets impairments and other income and expenses resulted from an isolated, non-recurring events
NET DEBT	Short-term finance debt + long-term finance debt, net of cash and cash equivalents
EBITDA MARGIN, %	EBITDA/ Revenues
NET PROFIT MARGIN, %	Net profit / Revenues
RETURN ON EQUITY, %	Net Profit / Shareholders equity
RETURN ON ASSETS, %	Net Profit / Total assets
MARKET CAPITALIZATION	Number of shares at end of financial period multiplied by closing price on last trading day of the financial period
ENTERPRISE VALUE (EV)	Market capitalization + net debt + minority interests
TOTAL DEBT RATIO	(Total current liabilities + total non-current liabilities) / Total assets
CURRENT RATIO	Total current assets / Total current liabilities
QUICK RATIO	(Total current assets - inventories) / Total current liabilities
P/E	Closing price on a last trading day of financial year / Earnings per share
EPS	Net profit attributable to equity holders of the parent company / Average number of shares during the financial period

CEO AND CHAIRMAN'S STATEMENT

Dear Consumers, Shareholders, Partners,

The year 2019 became a period when the Group balanced between some important achievements in the new export markets and difficulties triggered by unfavourable developments in the macro-economic situation, as well as situation in the dairy markets of core countries of the Group's business.

In particular, Milkiland continued an expansion in the Chinese dairy market by supplying dry milk products, primarily WMP, to this country. The Group also supplied Kosher dairy products to Israel, namely dry milk products and butter, further reinforced its presence in the Central Asia countries dairy markets.

At the same time, in the Ukrainian dairy market the Group faced a pressure on its business operations triggered by growing inputs costs on the back of rising farm-gate raw milk prices (+8% on average in 2019 on y-o-y basis). Thanks to this trend and also to revaluation of UAH against EUR by c. 19% as of December 31, 2019 in comparison with the beginning of the last year, the raw milk prices in Ukraine in 2019 exceeded the EU-average, which provoked the expansion of the imported dairy, primarily from EU, to Ukraine. Free trade regime with European Union supported this situation.

The import of the dairy goods to Ukraine in 2019 soared by c. 48% on y-o-y basis. In particular, the volumes of imported cheese in the last year were by 73%, butter - by 46%, WMP - by 65% higher than in 2018. This massive import imposed a pressure to the local producers, especially the cheese-makers, and brought a lot of them to the brink of zero profitability. Also, the revaluation of UAH in 2019 became unexpected "black gift" to Ukrainian exporters, including in dairy industry by diminishing the competitiveness of the prices for export dairy goods, primarily, dry milk products in USD terms.

As the result, the financials of Milkiland Ukraine in 2019 were depressed: the top-line of the business declined 5.2% to EUR 125.8 million in 2019 in comparison with EUR 132.6 million in 2018.

In 2019 second year in a row the situation repeated when in Russia the Group faced with the biggest undermining issue for its result. The reason behind this led in costs inflation triggered by increased farm-gate raw milk prices in Russia (+ 9.3% in 2019 on average on y-o-y basis) and limited ability of the Group to increase prices for finished goods to compensate this trend. The latter was connected with the position of the key accounts clients, namely, Russian retail chains, which continuously postponed the prices increase of the dairy products on their shelves during last year. Taking into the account that the Group's business in Russia remains the biggest operation of the Group holding 57% of the consolidated revenues in 2019, the reduced financial results of Ostankino were the main trigger for the correction of Milkiland's top line and noticeable decline of the Group's EBITDA in the last year.

In Poland the Group's subsidiary Milkiland EU was trying to overcome the generation of the losses by restructuring of its business. In line with this policy the severe cost-cutting measures were implemented in the Group's Polish production plant Ostrowia. Its operations were idle from September to December 2019, then resolved by the end of the last year on the back of lower prices for raw milk and whey in the Polish market and more favorable prices dynamics for Ostrowia's made dry milk products, such as WPC 80 and permeate. Our key goal towards Polish business in 2020 is to fully restore its branded goods sales in order to balance the volatility of commodity prices.

The above mentioned difficulties in the countries of the Group's operations prevented the Group from financial stabilization of its business in 2019 and resolution of the sustainable growth of its business.

At the same time, the management of the Group in 2019 fulfilled a significant efforts aimed at the resolution of the key problems inherited from the last crisis years. In particular, an important steps were done to settle the issues with the syndicate of main creditors of the Group, namely UniCredit Bank Austria AG and AO Raiffeisenbank, under the Loan Facility Agreement dated 16 December 2011. By November 2019, the full sum of the indebtedness of Milkiland to these creditors in the amount of USD 58.58 (EUR 52.13 million or c. 66% of the total indebtedness of the Group as of December, 31, 2019) million were assigned to the new Lender. Milkiland has been continuing the negotiations with the new Lender in order to sign the debt restructuring agreement on the mutually acceptable conditions.

During the foregoing year our team will focus on sustainability of the Group, aiming to deliver a final stabilization of its business and resolution of its development. Here we can count on better export prospects of the Ukrainian and Polish-made dry milk products, including in the new export markets. Our team will put an additional attention on the development of the local competence of the Group in the markets of its operations, including by introduction of new, innovative, high value-added dairy goods with the significant competitive potential.

Our people are hardened by crisis and well-motivated to achieve better results. We still believe to our ability to deliver stable and growing business to our shareholders.

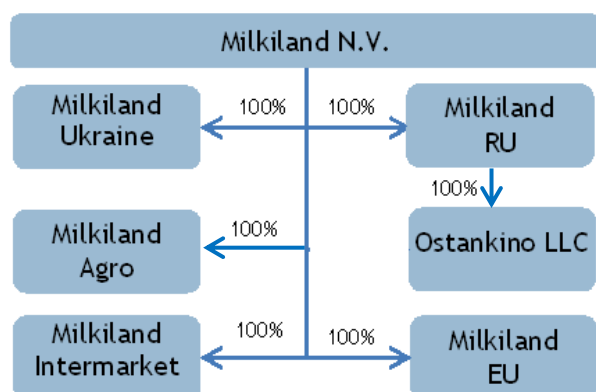

**Oleg Rozhko,
Chairman of the Board**

**Anatoliy Yurkevych,
Chief Executive Officer**

**REPORT OF THE BOARD OF DIRECTORS
ON OPERATIONS FOR THE YEAR 2019**

The Group Overview

Milkiland (the Company or the Group) is an international, diversified dairy producer with core operations in Ukraine, Russia and Poland. The Group's holding company Milkiland N.V. is incorporated in the Netherlands, while commercial activities are conducted through its subsidiaries in respective geographies. The Group's aggregated structure chart is presented below.

The Group's business in Ukraine includes dairy business (Milkiland Ukraine controlling 10 dairy plants) and milk farming (Milkiland Agro), also the Company controls extensive milk collection system throughout the country. Milkiland Ukraine collects and processes about one third of the Group's milk, and produces a wide range of products that it sells both locally and overseas. Milkiland Agro is a farming subsidiary of Milkiland N.V. operating cattle livestock, including milking cows and arable land in lease.

The Group's Russian business consists of Ostankino Dairy (Ostankino) and Milkiland RU. Ostankino is the Moscow-based producer of whole milk products, a TOP-5 in the local Moscow dairy market, which is the largest regional CIS dairy market. Milkiland RU is responsible for distribution of the Group's cheese products in Russia, and development of Milkiland's production base in this country.

In 2012 the Group launched its EU business having acquired Polish-based cheese plant Mazowiecka Spółdzielnia Mleczarska Ostrowia. This facility is a modern cheese plant capable to produce a wide range of dairy products such as hard cheese (up to 15,000 tons p.a.), curd, processed cheese, yoghurts and variety of dry milk products.

The Group's Milkiland Intermarket was established in 2012 for the purpose of marketing the Group's products globally. Intermarket's product line mainly consists of dry milk products, butter, and hard cheese.

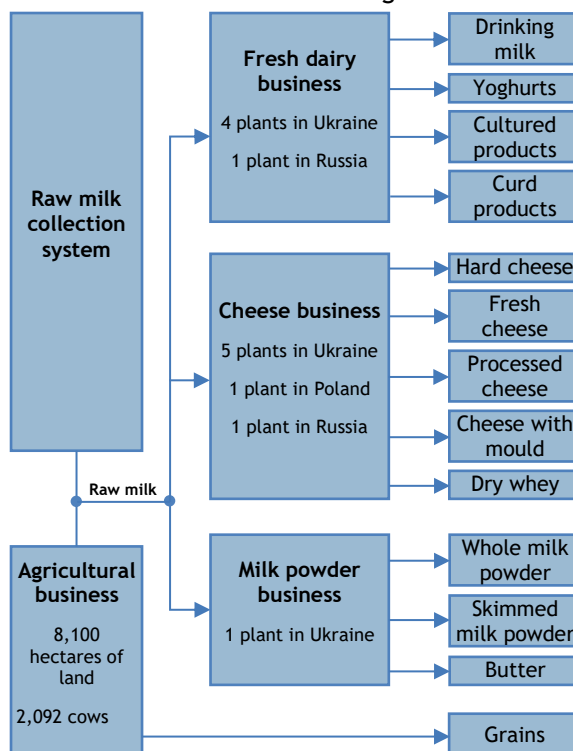

The Group's total annual milk processing capacity exceeds 1.3 million tons. Product line consists of whole milk products, various types of cheese, butter, and dry milk products.

In 2019 Milkiland's consolidated revenues were c. EUR 126 million representing c. 5.2% slide compared to 2018.

Annual revenue, EUR million

Milkiland develops as universal milk processor with production assets diversified across its local markets and with a significant level of vertical integration, in order to enable reliable access to raw milk - one of the core restraints for dairy producers in Ukraine. Such model makes possible to offer a wide range of quality products to the Group's customers, while controlling costs and sustaining margins. Milkiland's business model is outlined in the diagram below:

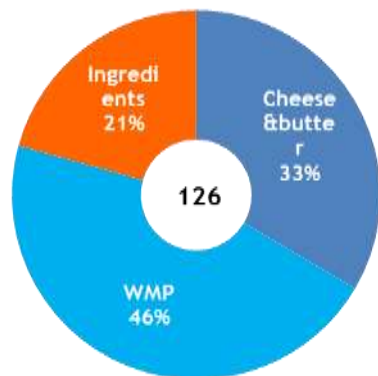

Milkiland's milk procurement comprises its own dairy farming business (Milkiland Agro) and extensive raw milk collection system from third party farms and individual farmers. In order to secure larger volumes of in-house milk the Group commenced construction of the modern 6,800 stalls dairy farm in 2012. The first section of a new dairy farm was put in operation. In 2019 Milkiland Agro provided for c. 8% of the Group's total milk intake in Ukraine.

In order to secure milk supply from third parties especially small farms and individual farmers Milkiland established a long-term partnership with a national-milk cooperative Moloko-Kraina that has grown to provide c. 44% of the Group's raw milk intake in Ukraine in 2019.

Raw milk collected by the Group is delivered to three core production streams: fresh dairy, cheese, and milk powders. This approach allows to deliver higher flexibility and better profitability of the business, as Milkiland can quickly switch between product lines.

Whole milk dairy and cheese&butter are Milkiland's core product segments providing together c.79% of the Group's revenues in 2019.

Revenue breakdown by product in 2019

Whole milk dairy business includes Moscow-based Ostankino and 4 dairy plants in Ukraine, producing a wide range of fresh dairy such as drinking milk, kefir, yoghurts, sour cream, ryazhenka, tvorog etc. Milkiland's fresh dairy is sold nation-wide in Ukraine and mainly focused on Moscow city and Central regions of Russia.

The Group's cheese business is comprised of five production units in Ukraine and Polish-based Ostrowia cheese plant. Also, Milkiland controls a cheese plant Rylsk Syrodel in Russia (Kursk region). Milkiland is one of the leading CIS players in this segment offering a wide variety of cheeses such as: hard, fresh, curd and processed cheese. The Group is successful in introducing high value added specialty products such as cheese with white and blue mould, being one of the few local players in this attractive segment.

The Group sells its cheese primarily in Ukraine, Russia and Kazakhstan.

Milkiland's milk powder business has one of the largest and most efficient drying facilities in Ukraine, operating mainly in high season, when raw milk is produced in large quantities. Milk powder and butter are sold both locally and abroad to more than 30 countries worldwide. Starting from 2012 Milkiland reinforced its positions in this segment by acquiring of Ostrowia plant, which is equipped with state-of-the-art facilities for production of high value added dry whey products (WPC-80 and permeate).

Sales of whey milk powder products are mostly done on B2B basis, with large international traders and food-processing companies being the Group's major customers. B2B sales comprised around 21% in the total revenue in 2019.

All Milkiland's brands are targeting a wide audience of families that are keen of healthy diet and natural dairy products. Most of the Group's products are medium priced and widely affordable.

The Company's key brands are Dobryana, Ostankinskoye, 36 kopeyek, Ostrowia and Milkiland.

Dobryana is positioned as the Group's international brand actively deployed in Russian, Ukrainian and other CIS markets, as well as in EU and global markets. Dobryana is also the largest selling brand of the Group.

Ostankinskoye is a traditional "medium +" brand for whole milk products produced by Ostankino Dairy, well known by Moscow consumers. Another Group's trademark in Russia is 36 kopeyek, "medium -" brand.

The Group markets products locally in Poland under Ostrowia brand name.

In 2019 all key brands of the Group were expanded with new products, e.g. the Group supported its presence at the Kosher products market of Israel, continued its sales in EU, Chinese and other promising markets.

Revenue breakdown by geography in 2019

In terms of geographical revenue breakdown Russia is the largest market of Milkiland contributing about 57% to the Group’s total consolidated revenue in 2019. In Russia the Group is active in whole milk products and hard cheese.

Sales in Ukraine account for about 40% of the Group’s revenue and include all range of dairy products. Poland secured 3% of the Group’s total revenue in 2019.

The geographical breakdown somewhat shifted in 2019 from Ukraine and Russia to other markets in response to the Group’s strategy to develop sales on its key operational markets and find new export markets. For more information, refer to *Key Products, Production and Sales* section.

Key Products, Production and Sales

The first half of 2019 was quite favorable for the global dairy market, with prices supportive, output volumes lower and Chinese imports higher than in 2018. However, in the second half of the year, the market sentiment changed on the backdrop of the anticipated recession in some economies. Dairy producers were unable to pass high farm-gate prices through the supply chain to the final consumers or translate them into production growth.

According to UN Food and Agriculture Organization (UN FAO), the world milk production increased by 1.4% in 2019 on y-o-y basis, to 852 million tons. A rise in milk output in almost all production regions was partially offset by a decline in milk production in Oceania.

In particular, Asia was the main driver for production growth, followed by Europe, North America, South America, Africa, Central America and the Caribbean. In Asia, milk output in 2019 increased by 10 million tons, or by 2.9 percent from 2018, to nearly 360 million tons, with over 90 percent of coming from India and Pakistan. China's milk output increased further in 2019, following a rebound already in 2018.

In Europe, milk output in 2019 estimated at 226 million tons, up by 0.5 percent, mostly due to expanded output in the European Union and the Russian Federation, more than offsetting declines in Ukraine and Switzerland. In the European Union, milk deliveries rose by 700 000 tons to 167 million tons, up by 0.4 percent over 2018 but still registering the lowest rate of annual growth since 2016. In Russian Federation, rising contribution of large modern dairy farms was sufficient to overcome declining output of small-scale farms. Milk production in Ukraine declined, albeit the rate of decline was slightly lower than in 2018.

In North America, milk output expanded to 108.6 million tons, an increase of 0.4 percent, entirely originating in the United States of America, with that of Canada remaining flat. In Oceania, milk output is estimated at 30.7 million tons in 2019, down 2.5 percent from 2018, as outputs fell both in Australia and New Zealand. Production in Australia fell by as much as 6.6 percent, caused by the drought that eroded the quality and extent of pastures and the availability of water, which also raised feed costs.

Higher global milk output also resulted in a dairy exports rise by moderate 1% in milk equivalent. Shipments of cheese, WMP and butter rose the most, while SMP exports declined. According to UN FAO data, demand from China, the Russian

Federation and the Philippines and Indonesia was the main driver for exports growth. Much of the global expansion was supplied by Europe and Oceania.

SMP and WMP were the most traded dairy products (in milk equivalent), followed by cheese, whey powder and butter. The volume of cheese exports expanded the most in 2019, by 4.9%, followed by WMP (+2.4%), butter (+4.6%), but decline in SMP (-1.4%) and whey powder (-6.8%).

International dairy prices averaged 3.0 % higher in 2019 compared to a year earlier when it fell by 4.6 %. Dairy prices rose (24 %) between January and May 2019 before retreating during the second half of the year. The rise during January to May was primarily driven by limited availability of exports from Oceania in the face of strong global import demand.

International dairy prices (US\$ per ton)

Source: UN FAO data

Across the dairy products, the annual average value for SMP registered the highest year-on-year increase (32.7 %), followed by those of cheese (7.8 %) and WMP (3.8 %), partially offset by a decline in butter prices (-15.7 %). SMP prices increased, although its average value remained low compared to other dairy products. Firmer prices in 2019 were mostly driven by strong import demand while supplies were tight, especially from the European Union, where slow growth in milk deliveries forced producers to limit spot supplies in order to fulfil long-term export commitments.

Milkiland defines its home markets as CIS countries, namely Russia and Ukraine. This is one of the largest food markets globally, ranking No.5 after China, EU, USA, and India, and a very dynamic one with strong growth fundamentals. Starting from 2013, upon launching of Ostrowia

operations, the Group is also active in the Polish and EU market.

While per capita consumption of dairy products in Russia and Ukraine is significantly lower than in the developed EU countries, there are many opportunities for using local competence to develop in these countries.

In Russia, raw milk output increased 1.8% y-o-y last year, to 31.2 million tons, as a result of better performance of large-scale dairy farms and increasing milk yields, offsetting output reduction by small-scale farms. Russia's total cow's population declined 2.3% y-o-y as of end-2019, continuing a long-term declining trend. In turn, as a result of growing demand for dairy products production and rising dairy prices globally, Russia's farm-gate raw milk prices increased 9.3% y-o-y on average in 2019, to RUB 24.84/kg (11.9% y-o-y in EUR terms, to EUR 0.34/kg).

Per capita consumption of dairy in Russia, kg

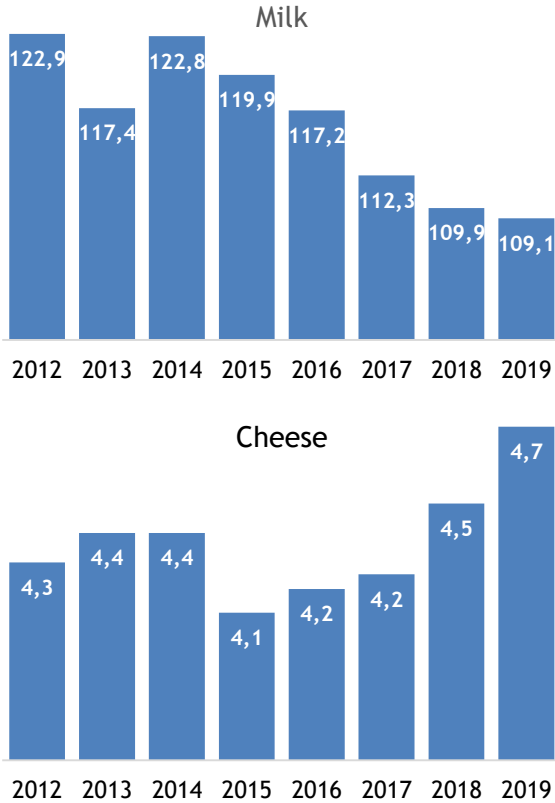

Source: <http://www.clal.it>

In Russia, restrictions introduced by Russian authorities on food products imported from a number of countries, including the EU and Ukraine, contributed to higher demand for locally produced food products. However, in 2019 the Russian Federation increased its dairy imports by 15.3% y-o-y to almost 4.0 million tons milk equivalent as local producers failed to meet the growing demand.

While total cow's population in Ukraine also further declined by 4.9% y-o-y in 2019, total raw milk production also lost 3.8% y-o-y to reach c.9.7 million tons, as milk yields improvements at large-scale farms was offset by output decline in households' sector. Because of continuous stagnation in raw milk production in Ukraine, local farm-gate raw milk prices grew 8% y-o-y, to UAH 8.2/kg (+20% y-o-y in EUR terms, at EUR 0.28/kg).

Per capita consumption of dairy in Ukraine, kg

Source: <http://www.clal.it>

In Poland, just like in Russia and Ukraine, total cows' population also declined by 2.1% y-o-y. However, due to better per cow yields, cows' raw milk deliveries to dairies improved 1.9% y-o-y, to 12.1 million tons. This growing raw milk supply supported the stability of local farm-gate milk prices at PLN 1.36 /kg (representing a slight decrease of 0.9% in euro terms, to EUR 0.317 /kg).

In 2019, Milkiland also used the favorable demand trends from China and expanded ingredients exports there, as well as started to export kosher food to Israel.

China, with its growing per capita consumption of dairy products is the world largest dairy importer contributing to c. one-fifth of the world imports or 15.7 million tons milk equivalent in 2019 (+6.4% from the previous year).

Milkiland is active in all main segments of the dairy market. Contrary to many players focusing on a certain market segment, the Group

welcomes diversification, as additional flexibility across the product line helps to manage prices fluctuation, both in raw materials and end products.

The Group allocates its product portfolio into three main groups based mainly on consumer base, marketing and logistics:

- Whole milk product group (white palette) includes all types of packaged fresh dairy with relatively short shelf life;
- Cheese and butter group (yellow palette) are in general longer shelf life consumer products that could be sold in package, or repackaged in retail outlets, or by weight;
- Ingredients are mainly B2B dairy products sold in bulk such as skimmed milk powder, dry whey, WPC-80, permeate, etc. Also, this segment included agricultural products of Milkiland’s farms sold to third parties.

Milkiland’s core strategic product groups are whole milk products and cheese where the Group sees the most significant growth potential. Butter and milk powder are opportunistic products that are produced for the purposes of diversification and flexibility, in periods when prices are attractive, and there is a surplus of raw milk in the market.

Whole Milk Products Segment

Whole milk is the largest and the most diverse dairy segment in the CIS region. It includes a variety of products such as drinking milk and highly popular cultured products (sour cream, kefir, ryazhenka etc.), and curd-based snacks (tvorog, curd desserts etc.). Yoghurts are a relatively new product to the market, but their consumption has been developing.

In 2019, as a result of declining whole milk products production, Russia increased dairy imports of cream and yoghurts, as well as bulk milk. Drinking milk output declined 1.6% on y-o-y basis and curd cheese output declined by 7.2% y-o-y, production of different types of fermented milk products declined by 2.1% on y-o-y basis.

Generally, the stagnation in disposable income of Russian population in 2019 limited local dairy prices growth potential. However, prices for curd cheese in Russia improved 3.1% y-o-y last year in RUB terms, for sour cream – by 3.2% y-o-y, while average prices for other fermented milk products even declined by 8.0% on y-o-y basis.

Russia's prices for fermented milk products other than sour cream in 2017-19 (RUB/kg; excl. VAT)

Source: <http://gks.ru>

On the supply side farm-gate raw milk prices in Russia in 2019 grew by 9.3% y-o-y on the backdrop of growing demand and recovering global prices.

Russia's prices for raw milk in 2017-19 (RUB/kg; excl. VAT)

Source: <http://gks.ru>

From the market perspective, year 2019 was rather favorable for Ukrainian whole milk product producers. Local WMP output stood at 1% higher y-o-y, mainly because of higher production of packaged drinking milk and fermented milk products. Yet improvement in average selling prices was more material, ranging from +10% to +13% on y-o-y basis thus partially offsetting an 8% rise in the farm-gate raw milk prices. Average drinking milk prices also rose by 2.5% y-o-y in UAH terms; however, this rise failed to improve the squeezed producer margins.

Ukraine's prices for raw milk in 2017-19 (UAH/kg; excl. VAT)

Source: <http://ukrstat.gov.ua>

Whole milk dairy remains one of the most competitive segments in the CIS, with a number of global players offering their best products. The Group also invests and develops its own brands. Milkiland's core international brand Dobryana, as well as regional brand Ostankinskoye are present on the local markets in Russia and Ukraine.

At the same time the Group's total 2019 whole-milk products sales decreased by 11% in EUR terms, to c. EUR 57.6 million, mainly triggered by decreasing sales volumes both in Russia and Ukraine. This decrease in volume terms was partially offset by Ukrainian hryvnia appreciation in the second half of 2019.

In Ukraine, the Group in 2019 was active in the whole-milk products segment with the stable market share of c.1% (same as in 2018). Benefiting from recovery in local dairy prices and stronger Ukrainian hryvnia vs. euro, Milkiland's WMP sales in Ukraine improved 2% y-o-y in EUR terms.

Segment's EBITDA improved to EUR 0.6 million vs. negative EUR 0.7 million a year ago, mainly due to better prices and appreciation of the Ukrainian hryvnia in the second half of the year. The segment's 2019 EBITDA margin thus improved by 2 pp y-o-y to 1%.

The share of fresh dairy in the total sales in volume terms was 72% in 2019 vs. 60% in 2018. The share of WMP segment in the Group's 2019 consolidated revenues stood at 46%, 3 pp. less than in 2018.

Whole milk dairy segment remains Milkiland's strong strategic priority, as the Group sees high growth potential here.

Also, according to the Company's estimations, c.40% of fresh dairy consumption in its core markets still falls to home-made products. Such informal consumption will diminish in favor of

industrially processed dairy as the consumer habits shift, thus being significant additional growth driver for the Group's business.

The Group believes that it has good assets in right places both in Russia and Ukraine to capitalize on these trends. Ostankino is uniquely located to serve Moscow population with fresh short shelf life dairy. Milkiland's Ukrainian whole milk plants are also favorably positioned nearby large cities such as Kyiv, Kharkiv, Sumy, Lviv, Dnipro and Kryvyi Rig.

Cheese and Butter Segment

Cheese is the second-largest dairy market in the CIS after whole milk products.

In Russia, abundant supply of raw milk and milk powder in 2019 contributed to higher cheese production, as processors converted perishable raw milk and milk powder inventories into cheese with longer shelf life. As a result, 2019 cheese production grew 10.9% on y-o-y basis. Unlike cheese, butter production in Russia stayed almost stable, adding less than 1% after a drop in 2018 caused by lower global demand.

The food embargo imposed by Russian authorities against the EU, Ukrainian dairy producers and their colleagues from some other countries, hit the supply of cheese harder than any other dairy category, resulting in 37% drop in cheese imports in 2014 to c. 200 thousand tons in comparison with 2013. Since that time, the imports have been gradually recovering and reached c.269 thousand tons in 2019 (up 7.6% on y-o-y basis), with c. 85% out of this volume imported from Belarus (+1 pp y-o-y). In turn, butter imports grew 31% after a drop in 2018, with those supplies coming mainly from Belarus also (61% of total volume, -15pp on y-o-y basis).

The Russian industry has gained sufficient capacity to fill the shelves in the economy product category after four years of trade restrictions. However, growing demand, mainly for high quality hard cheese, could not support the increasing local production of lower-quality products (Russian products in the premium group still cannot compete with quality European-made cheese).

Building up cheese stocks and declining consumer purchasing power prevented average hard cheese prices in Russia from growing despite the higher raw milk price, thus squeezing producer margins. At the same time, the increasing share of imports of butter in 2019 brought average butter price up 10.6% in comparison with 2018.

Russia's prices for hard cheese in 2017-19 (RUB/kg; excl. VAT)

Source: <http://www.gsk.ru>

In Ukraine, cheese production lost its two-year positive rally of 2017 and 2018 following eight years of sequential decline amid economic downturn in the country started in 2008 and introduction of food import ban in 2015 within the framework of the conflict with Russia. In particular, in 2019 the output of this product lost 12% on y-o-y basis.

On the backdrop of the Ukrainian hryvnia appreciation and high raw milk prices, cheese imports continued to grow substituting expensive Ukrainian cheese with quality Polish and other EU equivalents. While Ukrainian cheese exports declined by another 16% y-o-y, to minor 6.5 thousand tons, imports grew by c. 73% in comparison with 2018 to c. 24 thousand tons. Import supplies mainly came from the EU countries, also demonstrating growing demand for high quality hard cheese. At the same time, growing cheese imports and high input prices contributed to an 11% increase in average selling price in UAH terms last year.

Ukraine's prices for hard cheese in 2017-19 (UAH/kg; excl. VAT)

Source: <http://ukrstat.gov.ua>

The volatility of world prices for butter led to a decline in butter production in Ukraine by 15% y-o-y to c. 89 thousand tons. On the back of correction in international butter prices last year (-26.7% y-o-y to \$4,411/t), butter exports from Ukraine dropped 40% y-o-y to 18 thousand tons, while imports grew substantially but remained immaterial in volume terms. Reflecting lower supply and high input prices, average butter prices added 7.1% y-o-y on average in 2019.

In Poland, where Group operates its Ostrowia cheese making facility, cheese production grew 1.6% y-o-y, to some 879 thousand tons, while butter production stood 1.3% higher, at 225 thousand tons. Polish cheese and butter exports declined by c. 1.2% and 15.7% y-o-y respectively in 2019. At the same time, despite growing production volumes and lower exports, following the global market trends, average prices for Cheddar cheese in Poland slightly increased by 1.46% in Polish zloty terms.

In turn, prices for butter in Poland followed the international trends and declined in euro terms by hefty 18.3% y-o-y.

Poland's prices for Cheddar cheese in 2017-19 (PLN/kg; excl. VAT)

Source: Ministerstwo Rolnictwa i Rozwoju

In 2019, Group's cheese & butter segment revenues declined by 17% y-o-y, to EUR 42.1 million, accounting for 33% of the overall 2019 revenues, as company decreased its cheese sales by c. 35% y-o-y, both in Russia and Ukraine. At the same time, a price rise in Ukraine and

Ukrainian hryvnia appreciation in the second half of 2019 partially offset the negative effect.

Segment's EBITDA dropped 64% y-o-y to EUR 0.7 million, mainly on the back of lower prices for cheese in Russia. The segment's 2018 EBITDA margin decreased by 2 pp y-o-y to 2%.

The Group's management will continue putting their efforts on the improving profitability of the cheese & butter segment by focusing on local markets and searching new opportunities to expand a market share on the profitable Russian market.

In Ukraine Milkiland offers higher value-added aged, mould cheeses to support the market share of the Group in the local market.

Polish Ostrowia focuses on the development of the cheese distribution network in the local Polish market until the Russian market is closed for the EU producers and also searching for new export opportunities in EU market and globally.

Ingredients Segment

The Group's strategy of diversification and close integration with raw milk suppliers presumes presence in other dairy categories, such as dry milk products. This category includes skimmed milk powder (SMP), whole milk powder (WMP) and other B2B products made from whey (WPC 80 and permeate). Milkiland's sales in these categories may vary significantly from year to year, depending on global commodity prices for dry milk products. Usually, Milkiland uses high season of raw milk surplus to dry milk in order to sell it throughout the year.

SMP quotes started their recovery in 2019 on the backdrop of lower SMP availability from Oceania in the first half of the year adding c. 39% on annual terms. However, lower butter prices contributed to producer margin squeeze. WMP was traded just marginally better than in 2018, adding 7% in euro terms. At the same time, such a quick rise in the SMP price contributed to lower import demand for SMP, fueling in turn the demand for WMP. Global WMP exports expanded to 2.6 million tons in 2019, up 2.3 percent from 2018, consolidating the last year's recovery, after three years of retrenchments. A sharp increase in imports by China (the world largest importer), along with those of Saudi Arabia, the Russian Federation, Cuba among others, was principally behind the trade expansion in 2019, which was partially offset by import curtailments by Algeria, United Arab Emirates and Oman, among others.

Production of skimmed milk powder is closely tied to butter production. That said, correction in butter output contributed to reduction in dry milk products output in Ukraine - SMP output in 2019 declined 10% y-o-y to c. 34 thousand tons. At the same time, production of WMP grew 36% y-o-y to c. 17 thousand tons. As a result of lower output volumes, Ukraine's skimmed milk powder export declined by 13% last year, to 20 thousand tons. However, Ukraine has fully benefitted from the global demand rise for WMP exports. Unlike SMP, WMP export volumes more than doubled in volumes terms to over 8.8 thousand tons, while Ukraine became a Top-4 WMP exporter to China having exported over 4 thousand tons. Despite lower whey production and dry whey exports, Ukraine also stayed a top-10 exporter of whey to China having exported almost 11 thousand tons in 2019. Local Ukrainian dry milk and whey prices improved significantly in 2019.

Ukraine's average prices for milk and whey powders in 2017-19 (UAH/kg; excl. VAT)

Source: <http://ukrstat.gov.ua>

In Russia production of SMP increased by 17% y-o-y in volume terms last year. This increase in domestic production contributed to a 7% fall in the SMP imports.

In turn, in Poland 2019 SMP output stood 4.6% lower y-o-y as a response to lower demand. WMP output grew by 2.6% y-o-y. While exports of WMP grew to meet the rising demand, exports of SMP and dry whey and whey protein concentrate (WPC) decreased by 14.8% and 5.6% y-o-y, to 113 thousand tons and 207 thousand tons respectively. A sharp decrease in local prices for whey in the second half of the year discouraged the local producers from both production and exports, when Milkiland EU had to stop production at Ostrowia for several months.

Poland's average prices for whey powder in 2017-19 (EUR/t; excl. VAT)

Source: *Ministerstwo Rolnictwa i Rozwoju*

In 2019, the Group's subsidiary Milkiland Intermarket increased milk and whey powder sales by 70% y-o-y in volume terms. However, amid correction in WMP quotes and a temporary halt in Ostrowia operations, Milkiland's revenues in Ingredients segment grew 52% y-o-y, to EUR 26 million.

Segment's EBITDA stood at negative EUR 0.8 million, representing -3% EBITDA margin (down 6 pp y-o-y) mainly due to negative price trends in Poland and therefore generated losses partially offset by Milkiland Intermarket export operations.

Financial Performance and Financial Position

The Table below provides selected financial data as of and for the twelve months ended 31 December 2019 and 2018 in thousand Euro.

Selected financial data

	2019	2018

Revenue

Lower sales of the Polish division of the Group, growing competition in the key market of Russia, which led to decrease of revenues sales in this country, partly offset by increased sales of the Group at the global commodity dairy markets led

to decline of the Group's top line in 2019 by 5.2% y-o-y to c. EUR 125.8 million.

The table below sets forth an overview of the revenue generated by the Group in 2019 and 2018 by product segments.

Breakdown of the Group's consolidated revenue by product in 2018-2017

	2019		2018		2019 vs. 2018	
	Revenue ('000 EUR)	Share in total (%)	Revenue ('000 EUR)	Share in total (%)	'000 EUR	%
Cheese & butter	42,105	33%	50,745	38%	(8,640)	-17%
Whole milk products	57,636	46%	64,746	49%	(7,110)	-11%
Ingredients and other	26,020	20.7%	17,104	12.9%	8,916	52.1%
Total	125,761	100.0%	132,595	100.0%	(6,834)	-5.2%

Sales of cheese&butter decreased by 17% on y-o-y basis to EUR 42 million, mainly due to the decrease in cheese volume sales in key operational market of Russia and also in Polish market. Lower butter sales volumes to export markets of EU and Central Asia countries on the back of the correction in international butter prices also contributed to this decline.

For more information on cheese and butter production and sales, refer section *Key Products, Production and Sales*.

Sales of whole milk products declined 11% y-o-y to EUR 57.6 million, mainly on a back of decline of the respective sales in Russian division (Ostankino) due to intensified competition from the local players. These sales represented c. 46%

of the total consolidated revenue in 2019 vs. c. 49% in 2018.

Being a major revenue contributor of the Group in the previous years, in 2019 Ostankino, the Group’s main subsidiary in Russia, passed this position to Milkiland Ukraine. Contrary to decline of Ostankino’s whole-milk products sales in value terms in 2019 by c.12%, Milkiland Ukraine managed to increase the respective sales by 2% on y-o-y basis. This increase was also supported by the noticeable revaluation of UAH against EUR (by c. 10% on average on y-o-y basis) in 2019. As the result, in 2019 Milkiland Ukraine delivered c. 40% of Milkiland sales vs c. 38% generated by Ostankino.

For more information on whole milk production and sales, refer section *Key Products, Production and Sales*.

Sales in the Ingredients segment leapt by 52% in 2019 in comparison with 2018 fuelled by 70% increase of the sales of milk and whey powder in volume terms, including to China and Israel. Its share in the total Milkiland’s revenues grew by 7.8 pp. to c. 21%.

For more information on Ingredients production and sales, refer section *Key Products, Production and Sales*.

Cost of sales

The Group’s consolidated cost of sales decreased c.3% to EUR 109.3 million, the main driver was 8.7%-deflated raw materials costs (from EUR 81 million to EUR 74.0 million), mainly due to correction of milk processing volumes in Russia and Poland. For more information on milk markets, refer section *Key Products, Production and Sales*.

In 2019 Milkiland continued its downward integration aimed to secure raw milk supplies in Ukraine, including supporting milk cooperatives and developing in-house milk production. The Group continued cooperation with National Milk Cooperative Moloko-Kraina (a nation-wide cooperative that united a number of smaller cooperatives). In-house farming facilities focused on better per cow yields to cut the costs.

The Group’s cost of sales structure in 2018-2019

In 2019, labour costs increased by c.4%% to EUR 7.7 million, mainly due to increase of real wages of the personnel in Ukraine, where the majority of production assets of the Group are located. Transportation costs in 2019 were up c.22% in comparison with 2018 on the back to increased sales volumes in Ukraine and export sales by Milkiland Intermarket.

Breakdown of the Group's cost of sales in 2019-2018, '000 EUR

	2019		2018	
	Amount ('000 EUR)	Share in consolidated revenue, %	Amount ('000 EUR)	Share in consolidated revenue, %
Raw and other materials	73,971	58.8%	81,042	61.1%
Wages and salaries	7,696	6.1%	7,408	5.6%
Depreciation	6,329	5.0%	8,091	6.1%
Transportation costs	3,756	3.0%	3,069	2.3%
Gas	3,001	2.4%	3,868	2.9%
Other	14,554	11.6%	9,722	7.3%
Total	109,307	86.9%	113,200	85.4%

Gross profit

As a result of decreasing top line and moderate correction in the cost of sales, Milkiland's gross profit decreased by 15.6% y-o-y to EUR 16.5 million implying the decrease of gross profit margin to 13% in 2019 compared to 14.7% in 2018.

Selling and distribution expense

The Group's selling and distribution expenses declined by 10.3% in 2019 on y-o-y basis to EUR 10.3 million, which represented 8.2% in the consolidated revenue in the last year. This dynamics was triggered by 34% decrease of transportation costs due to lower sales volumes in Russian segment. At the same time, labour-intensive costs increased by 5.3% y-o-y, while marketing and advertising expenses grew considerably (c. 1.5 times y-o-y) on the back of the efforts of the Group aimed at promotion of sales volumes growth.

Administrative expense

The Group's administrative expenses decreased c.3% y-o-y to EUR 11.8 million in 2019, representing 9.4% in the consolidated revenue in 2019 vs. 9.2% in 2018. This dynamics is mainly associated with the optimization of the Group's personnel, as well as noticeably lower consulting fees.

Other expenses, net

In 2019 the Group generated EUR 14.8 million of other expenses, net compared to EUR 5.4 million

of those expenses in 2018. The major driver of higher expenses in 2019 was loss from the disposal of non-current assets in the amount of EUR 11.1 million related to sale of construction in progress (non-finished trading centre) by one of the subsidiaries of Milkiland.

Operating profit and EBITDA

Lower gross profit together with other higher other expenses, net in 2019 resulted in the Group's negative operating profit of EUR 20.4 million vs negative EUR 10.1 million in 2018. In turn, consolidated EBITDA of the Group declined c. 72% in 2019 to c. EUR 0.6 million. EBITDA margin decreased from 1.6% in 2018 to 0.5% in 2019.

Finance expense

In 2019 finance expenses declined by c. 18% to EUR 8.4 million on y-o-y basis, as a result of restructuring in loan portfolio and discounting of loans. The revaluation of Ukrainian Hryvnia and Russian rouble against euro and US dollar led to non-cash foreign exchange income of EUR 17.4 million in 2019, compared to income of EUR 0.1 million in 2018.

Profit before tax and Profit for the year

As a result of still negative operating income partly offset by finance income, the Group recognized a loss before tax of EUR 11.4 million (compared to loss of EUR 20.2 million in 2018). Net loss for 2019 accounted for EUR 11.6 million vs negative result of EUR 20.1 million in 2018.

Financial Position

Assets structure in 2015-2019, EUR million

Assets

The Group's total assets increased by 17% from EUR 151.9 million as of December 31, 2018, to EUR 177.8 million as of December 31, 2019.

In 2019 Milkiland's current assets increased by 2 times in comparison with 2018 to EUR 77.7 million.

During 2019 cash and cash equivalents increased 7 times from EUR 0.3 million to EUR 2.3 million.

The Group's euro-denominated inventories rose as of end-2019 by 16% to EUR 11.7 million in comparison with c. EUR 10.1 million as of end-2018.

Trade accounts receivable rose significantly by 2.8 times to c. EUR 54 million in 2019 on y-o-y basis.

Other taxes receivable comprise mainly export VAT receivable from the Ukrainian government. In 2019, VAT receivable increased by c.15% y-o-y. Although the Group's export sales increased over the last year, VAT recoverable payments were partially paid with the rest postponed for 2020.

Non-current assets decreased by c.12% to EUR 100.1 million, mainly triggered by a natural decline due to D&A and also disposal of land and buildings, equipment within the Ostankino bankruptcy case.

Current assets represented 44% of the total assets, non-current assets, 56% of the same index

Equity and liabilities in 2015-2019, EUR million

as of December 31, 2019 (25% and 75%, respectively, as of December 31, 2018).

Liabilities and equity

The Group's total liabilities in 2019 increased by 27.5% y-o-y to EUR 200.3 million as of December 31, 2019.

Current liabilities grew 29.4% to EUR 184.8 million, while non-current liabilities increased by 8.5% to c. EUR 15.5 million. Such changes in liabilities breakdown were mainly due significant increase of trade and other payables partly offset by lower short term loans and borrowings due to partial repayment of debt.

Net debt of the Group stood at c. EUR 76.7 million as of December 31, 2019. Total Debt Ratio constituted 1.13 vs. 1.03 as of December, 31, 2018. Net Debt/EBITDA ratio increased from 40.54 to 131.13 due to noticeable decline in EBITDA in 2019.

For more information on loans and borrowings contracted by the Group, refer to the *Consolidated Financial Statements* and section *Material Factors and Events*.

Debt ratios of the Group in 2015-2019

Currency translation reserve decreased over the reported year (negative EUR 45.7 million on December 31, 2019 vs. negative EUR 36.1 a year before).

However, the additional EUR 2.9 million loss in retained earnings in 2019 and a c.6.6% y-o-y decline in revaluation reserve shifted the

negative total equity of the Group to EUR 22.5 million from negative EUR 5.2 million as of December, 31, 2018.

Current liabilities as of December, 31, 2019 stood at EUR 184.8 in comparison with EUR 142.8 as of December 31, 2018.

Decrease in short-term loans and borrowings partly offset by increase in the Group's current assets led to negative Working capital of c. EUR 107 million.

The Group's current and quick ratios in 2019 increased to 0.42 and 0.36 in comparison with 0.27 and 0.19, respectively in 2018.

Over 2019 the Group's average operating cycle had increased to 117 days on the back of increase in average payment period from 153 days in 2018 to 255 days in 2019 and rise in average collection period from 53 days in 2018 to 106 days in 2019.

Balance sheet items and liquidity analysis

Ratios	Definitions	2019	2018
Production and inventory cycle, days	Average inventory to sales revenue times number of days in the period	32	26

Summary cash flow statement

	2019	2018
<i>Cash flow from operating activities:</i>		
Operating cash flows before working capital changes	488	2,958
Changes in assets and liabilities, net	10,730	1,818
Cash provided by (used in) operations:	(1,850)	(1,649)
Net cash from operating activity	9,368	3,127
<i>Investing activities:</i>		
Proceeds from sale of property, plant and equipment	-	-
Acquisition of property, plant and equipment	(1,061)	(1,060)
Acquisition of subsidiaries, net of cash acquired	5	27
Increase of other non-current assets	-	-
Net cash from investment activity	(1,056)	(1,033)
<i>Financing activities:</i>		
Acquisition of non-controlling interest	-	-
Commission paid	-	-
Dividends paid	-	-
Proceeds from borrowings	2,590	145
Repayment of borrowings	(8,896)	(2,571)
Net cash from financial activity	(6,306)	(2,426)
Net increase in cash	2,006	(332)
Effect of exchange rate changes on cash and cash equivalents	15	(750)
Cash at beginning of the period	334	1,416
Cash at the end of the period	2,355	334

Net cash at the end of the period increased 7 times to EUR 2.4 million thanks to a higher positive cash flow from the operating activities.

Milkiland relies on cash provided by operating activities as a primary source of liquidity in addition to banking credit financing.

Key Investments in 2019 and Sources of their Financing

In 2019, the Group's key investments were addressed mainly to maintenance of all its assets in Ukraine, Russia and Poland.

The following table represents the Group's key investments in 2015 through 2019 by type.

Key investments in 2015 through 2019, thousands of Euros

	2019	2018	2017	2016	2015
Property, plant and equipment	1,061	1,060	2,811	1,653	3,261
Acquisition of associates and subsidiaries	(5)	(27)	793	(10)	
Proceeds from sale of property, plant and equipment	1,056	1,033	3,604	1,643	3,261
Total investments	1,061	1,060	2,811	1,653	39261

Last year's investments were financed mainly from operational cash flows. For more details on

the Company's financial arrangements in 2019, refer to section *Material Factors and Events*.

Investment Plans for 2020 and Sources of their Financing

The Group's investment budget for 2020 will be limited to the maintenance costs and chosen investments to the new products introduction in the key markets of the Group. The general investment budget amount will comprise up to c. EUR 1.5 million.

For more information, refer to section *Fulfilment of Strategy in 2019 and Outlook for 2020*.

In 2020 the Group intends to finance its investment program mainly from its operational cash flows.

Shareholder Structure

As of December 31, 2019 the following shareholders provided information concerning direct or indirect (through subsidiaries)

ownership of at least 5% of the total votes at the General Shareholders Meeting of Milkiland N.V.

Shareholder structure of Milkiland N.V. as of December 31, 2019

Shareholder	Number of shares	Percentage of owned share capital	Number of votes at the General Meeting	Percentage of votes at the General Meeting

TOTAL	31,250,000	100.00%	31,250,000	100.00%

Share Price Performance

In 2019 Milkiland share price was following the mixed trend with an absolute stock performance during a year of c. 110%.

The major influence on the performance of the Group's shares at WSE had the unfavourable dynamics of Milkiland's financials on the back of declining results in the countries of operations, as well as weak export performance.

Another reason of negative sentiment of investors was connected to general cautious approach to Ukraine due to still non-stable macroeconomic environment, deep dependence of the country from external financing, as well as non-resolved military conflict in the East of the country. Still having significant part of its assets in Ukraine, the Group was subject of the general scepticism to the perspective of the investments to Ukrainian assets.

At the same time, on a company-related risks level, some achievements on the way of settlement of the relations with the Group's key creditors, namely Syndicate of international banks, by assignment of their rights to the new creditor, was a major reason of an advance in Milkiland N.V. shares quotations in 2019.

By the year-end Milkiland was trading with EV/EBITDA'19 of 136.2.

Management and Personnel

Composition of the Company's Board

As of December 31, 2019 the composition of the Board of Directors of Milkiland N.V. was as follows:

- Oleg Rozhko (Non-Executive Director, Chairman of the Board of Directors);
- Anatoliy Yurkevych (Executive Director, Chief Executive Officer);
- Olga Yurkevich (Executive Director, Chief Operation Officer);
- Vyacheslav Rekov (Non-Executive Director, member of the Audit Committee);
- Willem S. van Walt Meijer (Non-Executive Director, Chairman of the Audit Committee);
- Pavlo Sheremeta (Non-Executive Director, member of the Audit Committee).

For information on the Company's remuneration policy and remuneration of the members of the Board of Directors, refer to *Corporate Governance Report, section Remuneration Report*.

Other information

Except for Mr. Anatoliy Yurkevych and Mrs. Olga Yurkevich, who indirectly together hold 73.52% of the Company's shares, and Mr. Vyacheslav Rekov, who indirectly holds 5.0% of the Company's shares, neither member of the Company's board of Directors nor any Key Executive holds any shares or stock options over such shares in the Company.

During the last financial year there were no agreements concluded between the Company and its management personnel, which provide for compensation in case of their resignation or being removed from their position without a good reason, or being removed as a result of the Company being merged with the another company.

Personnel

As of December 31, 2019 Milkiland employed 2,729 people. Out of them 56 specialists were employed by LLC "Milkiland N.V.", a managing company of the Group located in Kyiv, Ukraine. Another 57 persons worked at a head office of Ukrainian subsidiary of the Company - LLC "Milkiland-Ukraine".

Due to the fact that Milkiland's production activities are arranged through production subsidiaries (cheese and whole milk products plants), the majority of the Company's personnel is based in Ukrainian regional production units

(1,969 people, including 338 employees in LLC "Milkiland Agro" and its subsidiaries).

Milkiland EU Sp. z o. o. a head company of the Polish Group in Warsaw and its subsidiaries, including Ostrowia Sp. z o. o. employed 33 specialists.

The Group's Russian head-company LLC "Milkiland RU" and Moscow-based production unit LLC "Ostankino Dairy" employed 15 and 467 people, respectively. Other Russian subsidiaries had 245 employees in total.

The key companies within the Group, first of all, the managing company LLC "Milkiland N.V." and the Company's subsidiaries such as LLC "Ostankino Dairy", LLC "Milkiland RU", and Milkiland EU Sp. z o. o., have their own HR departments and are responsible for hiring and dismissing their personnel. Candidates for top-managerial and other key positions for all companies of the Group are being selected by the HR Department of LLC "Milkiland N.V." only.

Candidates' selection is conducted through the formal procedure ensuring sufficient level of required skills and compliance to the Group's corporate culture.

Staff structure comprises about 3.3% of top managers, 9.1% other managerial stuff, and about 20.2% is service staff. The remaining 67.5% is mainly a work force.

Milkiland provides equal employment and personnel development opportunities for professionals in Ukraine, Russia and Poland regardless of their gender, religion, nationality or political preferences.

Training and Professional Development

The Group strongly believes that high level of competency of its employees is a key factor of efficiency and market success. In 2019 the internal and external training programs were developed for the key jobs. 915 employees or over one third of the Group's employees were trained by internal and external trainers. Production and technical employees were trained under staff development programs focusing on production safety and quality management, including HACCP-oriented programs at LLC "Ostankino Dairy", EU quality and safety requirements at LLC "Milkiland-Ukraine". All new employees have completed skill development on-boarding programs.

Corporate Social Responsibility

The Company recognizes that Corporate Social Responsibility is an integral part of its business practice, culture and strategy. The Company is therefore committed to running its business to ethical, legal and professional standards.

We respect human rights as an absolute and universal standard. Furthermore, the Company refrains from discrimination on any basis.

The Group measures our business success not only in terms of financials, but also in terms of customer safety and satisfaction, employees' engagement, maintaining strong governance practices and supporting the communities in the cities and villages of our presence.

The Group is not only focused on environmental issues by implementing state-of-the-art technologies and making the chain and the production process more sustainable, but also undertakes a responsibility to support the local communities where the Group operates by

developing social infrastructure and investing in creation other social values.

In 2019 Milkiland continued supporting of local communities in areas where production assets are located. Primarily, this is day-to-day aid such as procurement of goods and services for of schools and kindergartens, purchasing of the gifts for children, charity payments to local NGO's, support of local sports events and local community celebrations.

Milkiland's Ukrainian subsidiaries supported NGO's and local families of the people by implementing sponsorship programs.

Corporate Social Responsibility goals and values of the Group are reflected in the corporate documents such as 'Milkiland N.V. Code of Conduct', 'Milkiland N.V. Diversity Policy', 'Best Practice for GWP Listed Companies 2016', which are published at the Company's web-site: http://www.milkiland.nl/en/investors/general_information/corporate_documents/

Material Factors and Events

Material factors and events during the reporting period

Financing arrangements

Restructuring of the Loan Facility by a Syndicate of international Banks

On September 24, 2014 Milkiland published an official statement that it failed to fulfil some conditions of the Loan Facility Agreement with the syndicate of international banks, namely UniCredit Bank Austria AG and ZAO Raiffeisenbank dated 16 December 2011 (hereinafter “the Syndicate”, “the Loan Facility Agreement”), and started negotiations to enter into a Loan Restructuring Agreement with the banks representing the Syndicate.

On 6 January 2017 Milkiland published an official statement that JSC “Ostankino Dairy” and Milkiland N.V. received the Demand Notice under the Deed of Guarantee made between JSC “Ostankino Dairy” as a Guarantor, and Raiffeisen Bank International AG, as an Agent of the financial parties dated 14 August 2012, in relation to the Loan Facility Agreement.

Further in 2017 the Group was continuing the negotiations with the Syndicate, in particular, in March 2017 Milkiland contracted Alvarez&Marsal for joint preparation of the updated Independent Business Review and Options Paper for further negotiations aimed at the Loan restructuring or refinancing by the third parties.

The respective findings were presented to the Syndicate by Alvarez&Marsal in September 2017.

The negotiations with the Syndicate had been continued in 2018-2019.

On 8 October 2018 Milkiland published an official statement that on 5 October 2018 the Economic Court of the City of Kyiv commenced legal proceedings against PE “Ros”, a Ukrainian subsidiary of the Group, under a claim of Raiffeisen Bank International AG, acting as Security Agent (the “Security Agent”) under the Loan Facility Agreement.

The Security Agent claimed an enforcement of the real estate and movable property of PE “Ros”, mortgaged to the Lenders according to the Mortgage agreement dated 28 August 2012, signed to ensure the fulfillment the obligations of the Company to the Lenders under the Loan Facility Agreement.

The Group also received another 12 court claims of the same nature from Raiffeisen Bank International AG against other 5 Ukrainian subsidiaries of Milkiland, including, DE “Agrolite”, PE CF “Prometey”, PJSC “Chernigiv milk plant”, DE “Aromat”, LLC “Malka-trans”, which were addressed to the Economic Courts related to the destination of the defendants, in particular, Economic Courts of Chernigov, Dnipropetrovsk, Khmelnytsky and Sumy oblasts (regions) of Ukraine.

The total value of the above mentioned claims was as follows: USD 81.12 million and UAH 0.64 million and EUR 0.022 million (c. EUR 69.38 million).

All of the court claims include PJSC “Raiffeisen Bank Aval” as a third party of the court cases without the stand alone claims regarding the matters of the respective disputes.

On March 20, 2019 Milkiland published an official statement that the Assignment agreement between Raiffeisen Bank International, as “the Agent”, and UniCredit Sp. A., as the “Existing Lender”, and Swestal Holding Ltd., as the “New Lender”, was signed on 13 March 2019 and came into force on 19 March 2019.

According to the Assignment agreement, the Existing Lender assigned absolutely to the New Lender all the rights of the Existing Lender under the Loan Facility Agreement with the Syndicate.

The New Lender also undertook the commitment of the Existing Lender comprising as of the date of Assignment agreement USD 29,290,000 of principal and all of the Existing Lenders rights, interest and liabilities under the Loan Facility Agreement and the related Finance Documents under this agreement.

On November 28, 2019 Milkiland published an official statement that the Assignment agreement between Raiffeisen Bank International, as “the Agent”, and AO Raiffeisenbank, as the “Existing Lender”, and Swestal Holding Ltd., as the “New Lender”, was signed on 18 November 2019 and came into force on the same date.

According to the Assignment agreement, the Existing Lender assigned absolutely to the New Lender all the rights of the Existing Lender under the Loan Facility Agreement with the Syndicate.

The New Lender also undertook the Existing Lender Commitment comprising as of the date of Assignment agreement USD 29,290,000 of principal and all of the Existing Lenders rights, interest and liabilities under the Loan Facility

Agreement and the related Finance Documents under this agreement.

Thus, after the closure of those two deals all rights of the Syndicate were assigned to the New Lender, which became a sole creditor of Milkiland under Loan Facility Agreement in the total amount of USD 58,580,000 (EUR 52.13 million as of 31 December 2019).

As an implication of the assignment of the rights under Loan Facility Agreement, the New Lender became a legal successor of Raiffeisen Bank International AG, as the Security Agent under this Agreement. Thus, it became a claimant in the 13 claims to different Ukrainian subsidiaries of Milkiland mentioned above. As of today, the New Lender had not confirmed the claims under 11 court cases, which were consequently left without consideration by the respective courts. The remaining 2 legal cases are still being considering by the respective courts, but the management expects them also to be left without consideration in the nearest future.

The Group is continuing the negotiations with the New Lender and with a new hope expecting to finish them by finding a mutually accepted way of settlement of this indebtedness in the foreseeable future.

Shifting of the publication date of the Annual Report of Milkiland Group for 2018

On April 24, 2019, Milkiland published an official statement that on 24 April 2019, the Company received the independent auditor's report on the audit of the consolidated financial statements of Milkiland Group for 2018 from Accon AVM avm Controlepraktijk B.V., the external, independent auditor of the Company.

Due to the aforementioned, the publication of the Annual Report of Milkiland Group for 2018 was shifted to the early date of 24 April 2019 unlike it the previously announced 30 April 2019 but then published at 30 April 2019.

Material factors and events after the reporting date

Implementing of an arbitrage management of LLC "Kursk milk"

On March 20, 2020, Milkiland published an official statement that the Company received the information that on March 6, 2020, the Arbitrage Court of Kursk oblast (region) of Russian Federation adopted a decision of insolvency of LLC "Kursk milk" ("the Debtor"), subsidiary of Milkiland, and implemented of an arbitrage management of LLC "Kursk milk" within the bankruptcy procedure of the Debtor,

according to the petition of Public JSC Bank "Vozrozhdenie" ("the Creditor").

This petition was claiming the inability of the Debtor to repay the indebtedness to the Creditor in the total amount of RUB 101.9 million (c. EUR 1.2 million) during for more than 3 months term.

By the above mentioned Court decision, Mr. Alexander Volchkov was appointed as an arbitrage administrator of LLC "Kursk milk".

The Company together with LLC "Kursk milk" is striving for entering into the debt settlement agreement with the creditors and fulfilment of its conditions.

Intended transfer of corporate seat of Milkiland N.V. from the Netherlands to Cyprus

On April 22, 2020, Milkiland published an official statement that on the Board of Directors of Milkiland N.V. adopted a resolution on ratifying the plan to cross-border migrate and transfer the Company's seat from Netherlands to Cyprus by means of converting the Company from a public company governed by Dutch Law (naamloze vennootschap) to a public limited liability Company under Cyprus Law (the "Re-domiciliation"). The Board also ratified a management report which explained the rationale for the proposed migration (the "Management Report"). The Board also recommended to the Annual General Meeting of Shareholders of Milkiland 2020 to approve the cross-border migration and transfer of corporate seat of Milkiland from the Netherlands to the Republic of Cyprus and to convert the legal form of Milkiland from a public company organized under the laws of the Netherlands to a public limited company under the laws of Cyprus. The publication of the convening notice for the Annual General Meeting of Shareholders of Milkiland 2020 will take place at least 42 days before the meeting.

The plan for Re-domiciliation takes into account the judgment of the European Court of Justice of 16 December 2008, Case C-210/06 regarding *Cartesio Oktató és Szolgáltató bt*, that deals with cross-border transfer of the seat of a company within the meaning of article 48 of the Treaty Establishing the European Community (the "EC"). The European Court of Justice determined in the *Cartesio-Judgement* that the right to establishment laid down in article 43 taken with article 48 EC - that deals with the freedom of establishment of companies - implies that companies can transfer their corporate seat to another Member State without dissolution and liquidation of the company, provided that they convert into a company governed by the law of the other Member State, to the extent that it is

permitted to do so under the laws of that other Member State.

Furthermore, Cyprus Law permits that a public company incorporated under the laws of the Netherlands converts itself into a public limited liability company governed by Cyprus law without being dissolved.

The new name of the Company after the Re-domiciliation will be Milkiland Public Company Limited. The Company will be a public limited liability company organized and existing under the laws of Cyprus, having its corporate seat in Nicosia, Cyprus and registered with the Cyprus Registrar of Companies.

Pursuant to the Management Report, the main purpose of implementing the Re-domiciliation is to simplify the structure of the group of companies of which the Company is a part of.

The Re-domiciliation will take place without the Company being dissolved or ceasing to exist and it will not lead to the reincorporation of the Company. Consequently, the shares in the capital of the Company will not be replaced by new shares and will still be listed on the Warsaw Stock Exchange.

The Re-domiciliation will not affect any legal relationship between the Company and third parties. The Re-domiciliation will not entitle any third parties to terminate any existing agreement and legal relationship with the

Company. The business of the Company will be continued and will not change as a result of the Re-domiciliation.

As a result of the Re-domiciliation, the Company will no longer be subject to Dutch corporate law and will become subject to Cyprus corporate law.

The shares in the capital of the Company will not be replaced by new shares. The voting rights and rights to profit and other distributions will not be affected by the Re-domiciliation.

The Re-domiciliation will cause the corporate seat of the Company to be transferred from Amsterdam, the Netherlands, to Nicosia, Cyprus. Consequently, the Company will lose its corporate domicile in the Netherlands. As a result thereof creditors will no longer be able to commence legal proceedings against the Company in the Netherlands based on its corporate domicile. Creditors will be able to commence legal proceedings against the Company in the Netherlands based on agreements provided that such agreements are governed by the laws of the Netherlands or provided that parties to such agreement have agreed that proceedings are to be submitted to the exclusive jurisdiction of the courts of the Netherlands.

The Company is intending to complete the Re-domiciliation by the end of August, 2020.

Going Concern Assumptions

Financial situation as per 31 December 2019

Key financial indicators 2019

Per December 31, 2019 the equity of Milkiland amounts to EUR 22.5 million negative. A loss amounting to EUR 11.6 million has been realized over 2019. Operating cash flows were positive amounting to EUR 9.4 million and the net cash flow was positive for EUR 2.0 million.

Loan covenants

As at 31 December 2019 the Group was in breach of certain financial covenants under a few bank loans mostly due to devaluation of the local currency. This situation started in 2014 and is still applicable. The breaches relate to the following covenants:

- Tangible net worth should not at any time be less than EUR 105,000 thousand;
- Borrowing to EBITDA ratio in respect of any relevant period will not exceed 3.5 to 1;

- EBITDA to interest expenses ratio in respect of any relevant period will not be less than 3.25 to 1.

Non-compliance with covenants gives banks a formal right to demand early repayment of loans. The management notified all banks about expected prospective non-compliances.

Since October 2018 Milkiland had been participating in 13 legal claims on recovery of the real estate and movable property of several Ukrainian subsidiaries of the Group mortgaged to the Lenders. 11 of these cases were left without consideration, but remaining 2 are still considering by the respective courts. For more information regarding this issue please refer *Material Factors and Events*.

Local operations

In the course of 2017 the Arbitration Court of the City of Moscow declared the JSC "Ostankino Dairy" bankrupt based on the claim of one of its Creditors, Bank "Vozrozhdenie". As of 31 December 2019, the majority of production

assets of Ostankino, including buildings and equipment, were sold under the procedures of competitive auctions. Ostankino is fulfilling the operations based at the agreements with the new Owner on leasing the production buildings and equipment, expiring on 31 July 2020 with the possibility of further prolongation. It is unclear whether the new Owner will have an intention to prolong these agreements after the above mentioned date.

Also, in March 2020 the Arbitrage Court of Kursk oblast (region) of Russian Federation adopted a decision of insolvency of LLC "Kursk milk", subsidiary of Milkiland, and implemented of an arbitrage management of LLC "Kursk milk" within the bankruptcy procedure of this company. For more information regarding this issue please refer *Material Factors and Events*.

The Polish segment of the Group in 2019, namely Milkiland EU subsidiary controlling cheese making plant Ostrowia, was financially supported by the Group due to the loss making operations. Ostrowia was idle from September to December 2019 in line with implemented cost cutting measures. The production activities were resumed in December 2019 on the back of better situation with the global prices for the plant's main produce, namely WPC-80 and permeat, as well as lower prices for inputs in Poland.

The above circumstances could materially affect the ability of Milkiland to continue as a going concern.

Matters considered in determining the appropriateness of the going concern assumption

Syndicated loan

On March 20 and November 28, 2019, respectively, Milkiland published an official statements claiming the assignment of the full sum of indebtedness under Loan Facility Agreement with the Syndicate of banks in the amount of USD 58,580,000 (c. EUR 52.3 million) to a New Lender, namely, Swestal Holding Ltd.

For more information regarding this issue please refer *Material Factors and Events*.

The Group's management is continuing the negotiations on the restructuring of the above mentioned indebtedness with a New Lender and hopes to achieve the progress on this issue in the near future.

LLC Kursk Milk's Creditors

With regards to the LLC Kursk milk bankruptcy, this event caused another possible material

threat to the going concern ability of Milkiland and its operations in the Russian market. The ability of the Group to continue its operations there is dependent on upcoming negotiations during the bankruptcy procedures and finding of the mutually acceptable solution of the settlement of the indebtedness to Kursk milk's Creditors.

Other

Besides assignment the rights under Loan Facility Agreement and the settlement of the indebtedness to LLC Kursk Milk's Creditors, the Group is in progress of improving the profitability and cash flows for the Group as a whole. This includes plans to stabilize the financial standing in all of the countries of operations, as well as further development of export of Milkiland's dairy, including to the newly opened markets.

In conclusion

The ability of the Group to continue its operations is dependent upon the New Lender under Loan Facility Agreement, finding a mutually acceptable solution of the settlement of the indebtedness to LLC Kursk milk's creditors, prolongation of the leasing agreements with the new Owner of majority of Ostankino' assets, as well as improvement of future profitability and cash flows.

Based on the going concern assessment - the material uncertainty regarding the going concern assumption combined with the matters considered in determining the appropriateness of the going concern assumption - made by management, Milkiland concluded that it is deemed appropriate to prepare the financial statements on the going concern basis.

Fulfilment of Strategy in 2019 and Outlook for 2020

Strategic priorities

Milkiland's strategic goal is to become an international diversified dairy Group with clear market leadership in cheese and strong position in whole milk products segment in CIS, balanced presence in EU dairy market and ability to capitalize at global international trade of dairy products. To achieve this goal, Milkiland business has been growing both organically and through selective acquisitions, tapping the existed consolidation potential, especially in the cheese market in CIS.

Milkiland distinguishes itself as "supplier of choice" for consumers in its core markets (Russia, Ukraine and Poland) offering a full range of everyday dairy products at the highest value for money. The Group aims to achieve and maintain this by controlling the whole supply chain – from farm to supermarket's shelves, thus ensuring high quality and affordable price.

Milkiland's primary focus is fresh dairy and cheese, the largest and fast growing dairy segments of CIS dairy market. The Group believes that it knows how to create products appealing to its consumers with their healthy, genuine qualities and superior taste.

The Group is actively promoting its international and local brands, including Dobryana for CIS market, Ostankinskoye and 36 Kopeyek for Russian market, as well as Ostrowia brand, a traditional trademark well-known for Polish customers.

Better economic background for the Group's business in 2019 on the back of increased competition

The macroeconomic situation in the key markets of the Group's business in Russia and Ukraine in 2019 became more positive in comparison with last several years.

In particular, GDP of Russia grew by 1.3% in the last year on y-o-y basis, while real disposal income of Russians increased by c. 1.0%. The country posted low CPI, which stood at 4.5%.

In turn, Ukrainian real GDP in 2019 grew by 3.2% on y-o-y basis, while real disposal income of Ukrainians increased by c. 6.5%. The CPI posted a dynamics of +4.1% (December 2019 to December 2018).

Both countries in 2019 faced a trend of revaluation of the national currencies, namely Russian rouble and Ukrainian hryvnya against EUR, the reporting currency of the Group.

In particular, by the end of 2019 in comparison with the end of 2018 Russian rouble appreciated against EUR by c.13%, while Ukrainian hryvnya - by c. 16%.

In the last year Russia and Ukraine also admitted intensifying competition in the local dairy markets, which was triggered by the factors of a different nature.

In Ukraine the decreased domestic volumes of raw-milk production (by c. 3.8% in comparison with 2018) triggered the increase of raw milk farm gate price, which were by c. 8% on average higher than in 2018. Reinforced by the noticeable UAH revaluation against EUR, this price by the end of 2019 exceeded the EU-average.

In the conditions of the imposed free-trade regime with EU under the framework of the respective FTZ agreement between Ukraine and European Union, the above mentioned trends provoked massive dairy import to Ukraine, primarily from EU-countries. In particular, in 2019 the cheese import volumes to Ukraine leapt by 73% on y-o-y basis, import of whole milk products rose by 45%, butter - by 46%.

The galloping import took place on the back of decreasing domestic production of the majority categories of dairy goods in Ukraine in 2019, butter output in 2019 decreased by 15%, cheese & cheese products - by 14% y-o-y. The dairy export from Ukraine was also dropped significantly, except of SMP export, which in 2019 doubled in volume terms on y-o-y basis.

As the result, the imported dairy pressure left to the Ukrainian dairy producers very limited opportunity to capitalize on growing consumer demand in the country. The local cheese producers felt a maximum influence of this factor.

Contrary to Ukraine, domestic production of raw milk in Russia in 2019 grew by c. 5% on y-o-y basis. Based on that, Russian dairy producers increased a production of the dairy goods, including of cheese - by 12% in comparison with 2018, milk & sour - by 8%, yogurts - by 3%, SMP - by 21% on y-o-y basis.

Growing domestic production increased a demand for raw milk from processors. As the result, the farm-gate raw milk price in Russia in 2019 increased by c. 9% on average y-o-y.

At the same time, in the conditions of practically stagnating consumer demand in Russia, the above mentioned factors led increased competition between local dairy producers.

This competition was reinforced by the implementation of State Informational System “Mercury” envisaging the marking of dairy goods, including milk, sour, cheeses starting from July 2019. As the result, the legal dairy producers challenged each other in conquering the market segments previously occupied by “grey”, low-quality, sometimes infringing dairy products.

In a view of intensifying competition in the dairy markets of Russia and Ukraine, the growth opportunities, as well as the ability of the Group to increase margins in those key markets in 2019, were limited.

In general, in 2019 Milkiland continued its policy aimed at the development of the sales at new export markets and participation in international trade of dairy goods through its Milkiland Intermarket subsidiary. Additional efforts were targeted at growing local competence in the markets of its operations in Russia, Ukraine and Poland.

Strategy fulfilment in 2019

Last year Milkiland penciled a correction on a top-line level of the business, when the Group’s revenue decreased by c. 5% to c. EUR 125.8 million in comparison with the year 2018. This correction was triggered by decline of sales volumes in the main product segments, including whole-milk products and cheese&butter, partly offset by the significant leap in the sales volumes of dry milk products.

Lower margins of Milkiland’s business country segments of Russia and Ukraine, as well as still negative operational results of Polish segment were behind the decline of Milkiland’s EBITDA to c. EUR 0.6 million in 2019 from c. EUR 2.1 million in 2018.

In the last year the Group continued a policy aimed at searching of a new markets and geographical diversification of sales. In line with this policy, Milkiland Intermarket continued a development of its export business in Israel by selling to this country the Group’s made butter and dry milk products, which passed Kosher treatment. New steps to advance at Chinese dairy market were made, where the Group supplied the relatively high volumes of WMP.

In 2019 Milkiland RU, a Russian subsidiary of the Group, followed the positive trajectory of 2018 by continuing its efforts aimed at further localization of the production and sales of cheeses under Milkiland’s brands in Russia. This led to growth of the top-line of the Company’s business

by c. 4% to c. 23.7 EUR million, while the Company’s EBITDA increased by 19% to c. EUR 1.3 million.

Moscow-based Ostankino Dairy, the main subsidiary of the Group in Russia, continued a tough period it entered in 2018. Intensifying competition of the local players, especially in the key accounts channel (retail chains), led to decrease of Ostankino revenue in 2019 by c. 15% on y-o-y basis to c. EUR 48 million, while EBITDA stood at practically zero level in comparison with the negative EUR 0.6 million in 2018.

In Ukraine, Milkiland Ukraine subsidiary focused its efforts on development of its local sales, primarily in the key-accounts channel, as well as on development of the export sales. As the result, the Company increased the domestic sales of whole-milk products in value terms, export sales volumes of dry milk products rose by 1.5 times in comparison with 2018. This led to increase of the Company’s revenue by c. 23% to c. EUR 50 million in 2019 on y-o-y basis. Despite this, competitive pressure combined with revaluation of UAH in 2019, which harmed the margins on the dry milk products export sales, led to the noticeable decline of the company’s EBITDA. It decreased by c. 63% to c. EUR 0.6 million in 2019 in comparison with EUR 1.6 million in 2018.

Milkiland EU, the Polish subsidiary of the Group decreased a top-line by c. 68% in 2019 to c. EUR 3.9 million on y-o-y basis. The plant was idle from September to December 2019 in line with severe cost-cutting measures implemented by Milkiland. Also, the prices for its main products, namely WPC-80 and permeate, were following the non-favorable trends during a majority of the last year. As the result of these factors, as well as higher input prices in the Polish market, the company posted negative EBITDA of EUR 1.3 million versus the negative EBITDA of c. EUR 0.4 million in 2018.

In 2019 Milkiland continued its vertical integration efforts by supporting of in-house milk production by Milkiland-Agro subsidiary. In particular, the company concentrated on the increase of milking cows’ headcount and improving of milk yields.

Strategic outlook for 2020

In 2019 the Group still did not achieve a task of restoration of profitability of its business.

The current year is expected to be crucial for reaching a break-even point for generation of the new value of the business. The Group’s management is going to achieve this by continuing a policy aimed at strengthening of the market positions of Milkiland in the countries of

its operations, as well as on searching for new, and advancing at the existed export markets.

Milkiland's Russian division aims its efforts on streamlining of products portfolio in order to increase the share of high value-added healthy modern dairy, as well as on growing local cheese production.

The goals of the Ukrainian division are of two major types, as follows: to strengthen the positions in the local dairy market, especially in cheese segment and several niche segments, including lactose-free dairy, special types of cheese, and to build a sustainable export-oriented model of its business. Forecasted further devaluation of the Ukrainian Hryvnia

in 2020-2021 remains the supporting factor for reaching of the export goals.

Milkiland EU in 2020 is concentrating at the development of local distribution network in Poland for locally produced cheese, including in order compensating the volatility of the global prices for its key dry milk products. The traditional task of the searching for the new export markets for latter remains relevant in 2020.

The Group's investment budget for 2020 is limited on the maintenance level and some expenses on introduction to the local markets of its operations the high value-added products. The amount of the respective investments will stand on the level of c. EUR 1.5 million.

Material Risk Factors and Threats to the Group

A number of risks could materially affect the Group's business, financial condition and results of operations.

Described below are the risks and uncertainties that, as we believe, are material, but these risks and uncertainties may not be the only ones faced by the Group.

Business and industry risks

Exports to Russia

Russian market was the important market for the Group's cheese export from Ukraine to Russia. Every year it significantly contributed to the positive financial results of the Group in general.

Nevertheless, since 2014 Russian market is not available for Ukrainian dairy export. In July 2014, Russia banned all dairy and milk-containing imports from Ukraine.

In August 2014 Russian government introduced an embargo on food products imported from the countries supporting sanctions over Russian Federation on annexation of Crimea and support for insurgents in the Eastern Ukraine. The list included, inter alia, the EU countries, the USA, Canada, Australia and others.

Starting from January 1, 2016 Russia put a ban on exports of some agricultural and food products from Ukraine (including dairy products). These restrictions were applicable in 2019 and still applicable in the current year.

The Group does not expect that Russia will lift existing trade barriers for Ukrainian dairy exports or allows selected producers, such as the Group or its subsidiaries, to resume deliveries in the following year. The existing ban on dairy exports from Ukraine significantly affected the Group's financial results in the past years and continues to be among the factors that influence the Group's business, financial condition and results of operations.

Input cost increase

The Group's business is subject to fluctuations of farm-gate raw milk prices in the markets of operations, as well as and shortages of the raw milk volumes, which sometimes are beyond its control. This factor was present in Group's operations through 2019.

Although historically the Group has been able to pass on increases in raw material prices to its consumers, there is no assurance that it will be able to do so in future as this will depend to a large extent on market conditions. Even if the Group is able to pass these costs on to

consumers, an increase in selling prices could be implemented with time lag and also may inhibit consumer appetite for Group's products.

For these reasons, significant increase in price of raw materials could materially adversely affect the Group's business.

Raw milk deficit

Raw milk is a key input in the Group's production process and ensuring a sufficient supply of raw milk is crucial for the Group's business.

The production of raw milk in Ukraine and Russia was stagnating over last years and is subject to seasonal fluctuations, with a surplus typically being produced in spring and summer while there is a reduction in supply during the winter months.

In 2019 the raw milk production in Ukraine c. 3.8% on y-o-y basis according to the data of State Statistic Service of Ukraine.

In 2019 in Russia the raw milk production increased for 1.8% accordingly to RosStat. Nevertheless, in the nearest years in Russia is expected the general moderate decrease of the milk shipment for industrial processing up based on expected decline of milking cow herd and improving milking yield expectations.

In the following years the Group could face difficulties in sourcing supplies of raw milk on commercially acceptable terms.

Also the Group may face additional difficulties in sourcing a sufficient amount of high-quality raw milk from suppliers in Ukraine for export of dairy products with specific certification (e.g., Kosher) and other high-quality parameters.

Exports VAT refunds

Although not specific to the agricultural industry, the Group benefits from VAT refunds in connection with its exports sales. Because exports sales are generally taxed at the rate of 0%, the Group's input VAT is subject to reimbursement by the government.

In the past due to a high budget deficit in Ukraine, many taxpayers entitled to VAT refund did not receive such refund on a timely basis.

Since January 25, 2017 the Ukrainian government have been implementing a new procedure of "automatic" VAT refund aimed to ensure transparency and fair VAT reimbursement.

Although the Group until now managed to collect VAT receivables on exports in Ukraine in sufficient amounts, there is no guarantee that it will be able successfully receive such refunds

in the future. This possibility may adversely affect its results and operations.

Contamination of the Group's products

As a producer of food products, the Group's business is subject to certain risks related to the actual or alleged contamination or deterioration of its ingredients or its principal products, or of similar products sold by other producers.

Such risk is a general risk for food producers. The Group takes all necessary steps to ensure the high-quality products, including implementation of the quality management systems like ISO 9001:2000, HACCP, sanitation compliance for production facilities, and exclude contamination or deterioration possibilities.

Any such actual or alleged contamination or deterioration could adversely impact the Group's reputation, sales and profitability.

Competitive pressure

Failure by the Group to anticipate, identify or react to changes in consumer tastes or in competitors' activities could result in reduced demand for the Group's products, which in turn could result in the Group not being able to maintain its market shares or to recover development, production and marketing costs.

Since January 1, 2016 the EU and Ukraine have provisionally applied their Deep and Comprehensive Free Trade Agreement (DCFTA). The competition on the EU and Ukrainian dairy markets is also affected by the new rules established by the DCFTA.

The DCFTA requires Ukrainian dairy producers to phase out within 7 years, the production and sales of dairy products under names that are protected in the EU as Geographic Indications.

The Group historically used some of such names for own products. In order to meet the DCFTA requirements and stay competitive the Group is planning and implementing changes to Group's operations, marketing and rebranding strategies.

Also, in 2019 significant dairy import, primarily from EU countries, took place in Ukrainian dairy market, thus, intensifying the competitive pressure on local dairy producers. For additional information refer *Fulfilment of Strategy in 2019 and Outlook for 2020*.

Antimonopoly proceedings

As the Group is one of the leading milk processors in Ukraine with strong positions nationwide and specifically in the regions of its operations, it could be subject of legal proceedings, including those under competition legislation, which could have an adverse effect on the Group's future business.

Country risks

Economic considerations

The global financial crisis started in 2020 due to global coronavirus outbreak, as well as lack of political stability in Ukraine, have led to significant decrease in economies of Milkiland's home markets. The negative trends in Russian and Ukrainian economy may continue if local governments are not able to overcome crisis consequences in 2020 and incoming years. This inability might negatively affect Milkiland's business.

Exchange and interest rate risk

Fluctuations of exchange rates of local currencies used by the Group on key markets in Russia (RUB) and Ukraine (UAH), may have an adverse effect on the financial results of the Group.

In particular, RUB and UAH closely affected by the global changes of oil prices and commodity prices, including for grains and metals, respectively.

Significant fluctuations of these prices within the framework of global economic crisis of 2020 and incoming years might trigger the volatility of Russian and Ukrainian currencies, thus, depressing the financial results of Milkiland.

Risks of legislation and judicial system

The Russian Federation and Ukraine are still developing a modern legal framework required for proper functioning of a market economy. The significant amount of legislation still is a heritage of a Soviet period.

The often legislation changes and the rapid evolution of the respective legal systems result in ambiguities, inconsistencies and anomalies in their application. In addition, legislation in Russia and Ukraine sometimes leaves substantial gaps in the regulatory infrastructure.

All of these factors, together with lack of transparency, make judicial decisions in the Russian Federation and Ukraine difficult to predict and makes effective redress uncertain.

Additionally, court claims are often used to further political aims. The Group may be subject to these claims and may not be able to receive a fair hearing.

Additionally, court judgments are not always enforced properly or followed by law enforcement agencies. All of these weaknesses could affect the Group's ability to enforce its rights or to defend itself against claims by others, which could have a material adverse effect on the Group's business.

The ability of Milkiland to continue the operations

Reaching the agreement with the New Lender under Loan Facility Agreement, implications of the bankruptcy cases of Ostankino, LLC "Kursk milk" might negatively effect on Milkiland's ability to continue its operations.

For the additional information of this issue please refer *Going Concern Assumptions*.

Political and governmental considerations

The Group performs its activities in Ukraine in the environment of political and economic crisis that started in November 2013, including continuing military conflict in the East of the country with the involvement of the Russian Federation.

The assets of the Group in Ukraine are mainly located in Central, West and North-East of the country and not in the current tumultuous East of Ukraine.

However, as a possible consequence of the current crisis, the economic and financial situation in Ukraine could further deteriorate, which, inter alia, could lead to a significant devaluation of Ukrainian and Russian currencies, declining demand for FMCG goods at one of the Group's core markets, difficulties with performing foreign trade operations.

Inability to appoint an audit firm/auditor to provide the independent auditor opinion on Milkiland's Annual financial accounts for the year 2019

Recent changes in Dutch audit services market, namely, decrease of the number of audit firms with the license to audit Public Interest Entities (PIE's) led to inability of Milkiland to appoint an independent auditor to issue of the opinion on the Group's financial accounts for 2019.

For additional details regarding this issue, as well as measures taken by the Group to resolve it in order to save the interests of all of Milkiland's stakeholders, please refer *Corporate Governance Report*.

As a possible implication of this situation, Milkiland might not be able to be in compliance with the requirements of Dutch Financial Markets Supervision Act (FMSA), namely, Article 5:25c of this Act, stating that the issuer shall make public its annual financial report within for months after the end of each financial year. The annual financial report shall comprise the audited financial statements, the management report and (in short) statements of a true and fair view.

In case of possible break of these requirements, the Dutch Authority for Financial Markets (*Stichting Autoriteit Financiële Markten*) in the Netherlands ("AFM") as a supervisor of FMSA may impose various measures to the offender.

This may have an adverse effect on Milkiland's business, as well as, possibly, its financial results.

Tax assessments from Dutch Tax Authority

Milkiland received the Tax assessments from Dutch Tax Authority ("the DTA") dated 14 April 2020 in the total amount of EUR 651,145 in relation to payment of VAT tax obligations for the period from 2012 to 2016.

The Group has commencing the official communications with the DTA asking the possibility of the restructuring of the above mentioned tax obligations due to negative financial results of Milkiland N.V. in 2014-2019 years.

Currently, it is unknown whether the DTA will agree the restructuring of those obligations of any kind. The reject of the DTA may have an adverse effect of Milkiland's financial results.

CORPORATE GOVERNANCE REPORT

Introduction

Milkiland N.V. (the "**Company**"), having its registered office in the Netherlands and which shares are admitted to trading on a regulated market, is subject to the principles and best practice provisions of the amended Dutch Corporate Governance Code (the "**Code**") effective as of 1 January 2017.

It can be found at:

www.commissiecorporategovernance.nl

Moreover, since Company's shares are listed on the Warsaw Stock Exchange, the Company is subject to the principles of Corporate Governance as stated in the Code of Best Practice for WSE Listed Companies in 2016 (the "**WSE Code**") which can be found at <https://www.gpw.pl/best-practice>

The Code contains principles and best practice provisions that regulate relations between the management board, the supervisory board and the general meeting of shareholders. The Company should state in its annual report how it applies the principles and best practice provisions of the Code in its annual report for the financial year 2019 and should, where applicable, explicitly explain why and to what extent a provision deviates from the principles stated in the Code.

The Company's application of the Code is described in the separate section of the annual report 2018 as approved on 21 June 2019 by the Annual General Meeting of Shareholders, which can be found at:

http://www.milkiland.nl/upload/iblock/079/MLK_Annual_Report_2018-approved-by-GSM.pdf

This is to be read in conjunction with this section and is deemed to be incorporated into this section.

The Code provides that if a company's general meeting of shareholders explicitly approves the corporate governance structure and policy and endorses the explanation for any deviation from the best practice provisions, such company will be deemed to have complied with the Code.

Main points of corporate governance structure

The Company is a public company with limited liability (*naamloze vennootschap*) incorporated under Dutch law, having its registered office at De Cuserstraat 93, 1081CN Amsterdam, the Netherlands.

The Company has the following subsidiaries:

- Milkiland EU Sp. z o.o. (Poland),
- LLC Milkiland-Ukraine (Ukraine) with its 23 subsidiaries in Ukraine, 3 in Panama, 1 in Scotland, 1 in Poland,
- Milkiland N.V. LLC (Ukraine),
- JSC "Ostankino Dairy" (Russian Federation),
- LLC "Ostankino Dairy" (Russian Federation),
- Milkiland RU LLC with its 3 subsidiaries in Russian Federation,
- MLK Finance Limited (Cyprus),
- Milkiland Intermarket (CY) LTD (Cyprus), with its subsidiaries - 1 in Ukraine and 1 in Kazakhstan,
- Moloko-Kraina LLC (Ukraine),
- Milkiland Agro LLC (Ukraine).

Board of Directors

The Company has a one-tier corporate governance structure managed by the Board of Directors. The Board of Directors is responsible for the management of the Company, its overall results, as well as its mission, vision and strategy. The Board of Directors consists of six directors: two Executive Directors and four Non-Executive Directors. The majority of the Board of Directors is made up of non-executive directors. All non-executive directors have provided statements of independence.

The Board of Directors charges the Executive Director(s) with the operational management of the Company, the preparation of the decision-making process of the Board of Directors and the implementation of the relevant decisions. The Executive Director(s) determine the division of duties between them. A division of tasks between the Directors may be determined by the Board of Directors. Such division shall require the approval of the General Meeting of Shareholders pursuant to article 13.4 of the Articles of Association. The Non-Executive Director(s) are charged with the supervision of duties by the Executive Directors and of the general affairs, policy of the Company and monitoring the implementation of the Company's strategy.

Board of Directors - Composition and division of duties

During the year 2019, the composition of the Board of Directors was as follows:

Mr. Anatoliy Yurkevych: Executive Director, appointed as of August 28, 2007 and reappointed as of June 21, 2019, for another four year period; Chief Executive Officer, responsible for running the Company, implementation of strategic goals and achievement of planned financial results, date of birth: 30.08.1968, gender: male, nationality: Ukraine;

Mrs. Olga Yurkevich: Executive Director, appointed as of August 28, 2007 and reappointed as of June 21, 2019, for another four year period; Chief Production Officer, responsible for supply of raw materials, production and quality assurance, date of birth: 22.11.1946, gender: female, nationality: Kazakhstan;

Mr. Vyacheslav Rekov: Non-Executive Director, appointed as of August 28, 2007 and reappointed as of June 21, 2019 for another one year period; responsible for strategic acquisitions and integration of new businesses; maintaining communication with investors, Member of the Audit Committee, date of birth: 10.02.1975, gender: male, nationality: Ukraine;

Mr. Willem Scato van Walt Meijer: Non-Executive Director, appointed as of December 6, 2010 and reappointed as of June 21, 2019, for another one year period; Head of the Audit Committee, responsible for supervising the Board's activities in respect to provision of financial information, internal controls, relations with external auditors, date of birth: 08.07.1958, gender: male, nationality: the Netherlands;

Mr. Oleg Rozhko: Non-Executive Director, Chairman of the Board of Directors, appointed as of June 22, 2012 and reappointed as of June 21, 2019, for another one year period; responsible for coordination of the Board and ensuring that proper corporate governance is in place, date of birth: 26.05.1977, gender: male, nationality: Ukraine;

and

Mr. Pavlo Sheremeta: Non-Executive Director, appointed as of June 30, 2017, and reappointed as of June 21, 2019, for another one year period; Member of the Audit Committee, responsible for improvement of businesses processes in human resources, talent acquisition, and personnel education, ensures business strategy development, date of birth: 23.05.1971, gender: male, nationality: Ukraine.

On 30 June 2017 the Company adopted and published current division of duties and responsibilities for the Company's Directors which can be found at the Company's website: http://www.milkiland.nl/en/investors/general_information/corporate_documents/

Board of Directors - Terms of Reference

The Terms of Reference of the Board of Directors, which provide for certain duties, composition, procedures and decision-making of the Board of Directors, were adopted on 28 August 2017 in accordance with article 13.4 of

the Company's Articles of Association and the best practice provisions under chapter 2 of the Code. The Terms of Reference of the Board of the Company are applied and interpreted with reference to the Code and can be viewed on the Company's website:

http://www.milkiland.nl/en/investors/general_information/corporate_documents/

The Chairman of the Board of Directors determines the agenda, presides over meetings of the Board of Directors and is responsible for the proper functioning of the Board of Directors. The Chairman of the Board of Directors shall always be a Non-Executive Director and is appointed by the General Meeting of Shareholders. All members of the Board of Directors have access to the advice and services of the corporate secretary, who is charged with ensuring that the Board of Directors' procedures are followed and that the Board of Directors acts in accordance with its statutory obligations under the Articles of Association. The corporate secretary is appointed by the Board of Directors for each meeting of the Board of Directors.

Board of Directors - Issue of shares and acquisition of own shares

According to the Articles of Association (Art. 5) the Board of Directors has the authority to propose to the General Meeting of Shareholders to issue shares. Such a proposal shall contain the price and the further terms and conditions of the issue. The General Meeting of Shareholders may resolve to designate the Board of Directors, for a fixed period not exceeding five years, as the body authorized to issue shares.

Also, the Board of Directors may be granted, by the General Meeting of Shareholders, the right to resolve upon the exclusion or limitation of preemptive rights.

Article 6 of the Articles of Association stipulates that the Company shall have the right to acquire fully paid-up shares in its own share capital against payment of a consideration, provided:

- a. the shareholders' equity minus the acquisition price is not less than the sum of the paid and called-up part of the share capital and the reserves which must be maintained by law or under the Articles of Association;
- b. the aggregate par value of the shares in its share capital to be acquired and of those already held by the Company and its subsidiaries and of those for which the Company and its subsidiaries hold a right of pledge, does not exceed half of the issued share capital; and
- c. the General Meeting of Shareholders has authorized the acquisition. The authorization by the General Meeting of Shareholders will be valid for at most eighteen months and shall stipulate

the number of shares that may be acquired, how they may be acquired and the upper and lower limit of the acquisition price.

For the purpose of subparagraph a. above, the determining factor shall be the amount of the shareholders' equity stated in the last adopted balance sheet minus the acquisition price.

The General Meeting of Shareholders of 2019 gave the authorization to the Board of Directors to issue, acquire own shares and to exclude or limit the pre-emptive rights.

Board of Directors - Representation

Executive Board Member(s) have the authority to represent the Company, including the authority to represent the Company acting individually. The Company may grant special and general powers of attorney to persons regardless of whether or not they are employed by the Company authorizing them to represent the Company and bind it vis-à-vis third parties.

Board of Directors - Conflict of interest

In the event that the Company has a conflict of interest with a Director, in the sense that the Director in private enters into an agreement with, or is party to a legal proceeding between him and the Company, the Company shall be represented by one of other Executive Directors. If there are no such other Directors, the Company shall be represented by two Non-Executive Directors acting individually. If there are no such Non-Executive Directors, the General Meeting of Shareholders shall appoint a person to that effect. Such person may be the Director in relation to whom the conflict of interest exists. In all other cases of a conflict of interest between the Company and a Director, the Company can also be represented by that Director. The General Meeting of Shareholders shall at all times be authorized to appoint one or more other persons to that effect.

Transactions with members of the Board of Directors in which they have significant conflicts of interest will be disclosed in the Annual Report if any.

Board of Directors - Appointment, suspension, dismissal and profile

Members of the Board of Directors may be appointed for a maximum period of four years. Starting on the day of the General Meeting of Shareholders at which they are appointed and ending on the day of the annual General Meeting of Shareholders that is held in the fourth year of their appointment. Members of the Board of Directors may immediately be reappointed. Members of the Board of Directors can be suspended or dismissed by the General Meeting of Shareholders. If the General Meeting of

Shareholders has suspended a Director, the General Meeting of Shareholders shall within three months of the date on which the suspension has taken effect, resolve either to dismiss such Director, or to terminate or continue the suspension, failing which the suspension shall lapse. A resolution to continue the suspension may be adopted only once and in such event the suspension may be continued for a maximum period of three months commencing on the day the General Meeting of Shareholders has adopted the resolution to continue the suspension. If within the period of continued suspension the General Meeting of Shareholders has not resolved either to dismiss the Director concerned or to terminate the suspension, the suspension shall lapse.

The Company has a profile of its Directors, which indicates the size and composition of the Board of Directors, the activities and expertise and background of the Directors. The profile of the Board of Directors can be viewed on the Company's website:

http://www.milkiland.nl/en/company/board_of_directors/ .

Board of Directors - Committees

The Board of Directors has an audit committee (the "Audit Committee"). The Board of Directors may establish any other committee as the Board of Directors shall decide. According to best practice provision 2.3.2 of chapter 2 of the Code, only Non-Executive Directors can take place in the Audit Committee, a remuneration committee and a selection and appointment committee.

The Audit Committee is responsible for annually reviewing and reassessing the adequacy of the rules governing the committee as established by the Board of Directors. The Audit Committee will be charged with advising on, and monitoring the activities of the Board of Directors, with respect to inter alia, the integrity of the Company's financial statements, the Company's financing and finance related strategies and tax planning. The members of the Audit Committee of the Company are Mr. Willem Scato van Walt Meijer (the Chairman), Mr. Vyacheslav Rekov and Mr. Pavlo Sheremeta. The Terms of Reference of the Audit Committee can be viewed on the Company's website:

http://www.milkiland.nl/en/investors/general_information/corporate_documents/

Board of Directors - Evaluation

The Company plans to develop and adopt the evaluation policy of the Board of Directors, based on which the activity and contribution of all Executive Directors and Non-Executive Directors will be evaluated. Mentioned

evaluation policy will be published at the Company's website.

Board of Directors - Miscellaneous

None of the Executive Directors holds more than two supervisory board memberships of listed companies or is a chairman of such supervisory board other than a group company. The total number of the Company's shares held by members of the Board of Directors is 24,536,388, amounting to approximately 78.52% of the issued and paid up share capital of the Company. The shareholding of the Directors has been notified with the AFM.

With respect to acquiring ownership interest of securities and transactions in securities by the Directors, the Company follows the Company's Board Securities Rules.

With respect to acquiring shares in the Company's capital by the Directors as well as other people that are involved with the Company, the Company follows the provisions of the EU Market Abuse Directive and the Company's Insider Trading Rules that reflect the provisions of this Directive.

The Company's Board Securities Rules and Insider Trading Rules can be viewed on the Company's website:

http://www.milkiland.nl/en/investors/general_information/corporate_documents/

Shareholders and shares

The Company's authorized capital amounts to five million Euros (EUR 5,000,000.00). The issued share capital of the Company amounts to EUR 3,125,000.00, which is divided into 31,250,000 shares with a nominal value of ten eurocent (EUR 0.10) each, all of the same class and kind. There are no shares issued with special rights or privileges attached to them. There are no restrictions imposed by the Company on the transfer of shares or certificates.

There have been no conflict of interest situations between the Company and its shareholders.

Shares and General Meeting of Shareholders

At least once a year, a General Meeting of Shareholders is held. General Meetings of Shareholders are convened by the Board of Directors.

In 2019, the one General Meetings of Shareholders was held. The principal decisions taken by the General Meeting of Shareholders are:

- adoption of the annual accounts for the financial year 2018, granting of discharge to

the members of the Board of Directors for their tasks during the financial year 2018;

- the authorization of the Board of Directors for a period of 18 months following June 21, 2019 to:
 - i) repurchase shares for a price not higher than 10% of the opening price of the Company's shares quoted on the Warsaw Stock Exchange on the day of acquisition;
 - ii) resolve to issue and/or to grant rights to subscribe for shares, which authorization is limited to 10% of the issued share capital of the Company, to be increased with an additional 10% in respect of mergers and acquisitions;
 - iii) restrict or exclude pre-emptive rights in respect of such issue of shares and/or rights to subscribe for such shares;
- reappointment of Mr. Oleg Rozhko, Mr. Willem Scato van Walt Meijer, Mr. Vyacheslav Rekov and Mr. Pavlo Sheremeta as Non-Executive Directors of the Board of Directors;
- reappointment of Mr. Anatolij Yurkevych, Ms. Olga Yurkevich as Executive Directors of the Board of Directors.

Notices of a General Meeting of Shareholders are posted on the Company's website and are made in accordance with the relevant provisions of applicable laws and regulations. The notice convening a General Meeting of Shareholders shall be published no later than the 42nd day prior to the day of the meeting. The agenda and the explanatory notes thereto shall also be published on the Company's website at the same time. The agenda for the Annual General Meeting of Shareholders shall contain, inter alia, the adoption of the annual report, the reservation and dividend policy, a proposal to declare dividends, the proposal to grant discharge to the members of the Board of Directors from liability. Shareholders, insofar entitled to make such request according to the law, can request the Board of Directors in writing to include subjects to the agenda at least 60 days before the date on which the General Meeting of Shareholders is convened.

In accordance with Dutch law, the record date for the exercise of the voting rights and the rights relating to General Meetings of Shareholders shall be the 28th day before the date of the relevant General Meeting of Shareholders. And holders of shares as per the record date will be entitled to vote, irrespective of any transfer of such shares between the record date and the date of the General Meeting of Shareholders.

At General Meetings of Shareholders, each ordinary share entitles the holder thereof to cast one vote.

The General Meeting of Shareholders is entitled to resolve to grant approval to decisions of the Board of Directors regarding the identity or the character of the Company, including major acquisitions and divestments.

Bilateral contacts with shareholders

To comply with the best practice provision 4.2.2 of the Code the Company developed a Policy on bilateral contacts with shareholders of Milkiland N.V. approved by the Board of Directors on 28 August 2017 that can be found on the Company's website:

http://www.milkiland.nl/en/investors/general_information/corporate_documents/?PAGEN_2=1

Internal risk management and control systems

The Board of Directors is responsible for the system of internal risk management and controls of the Company and for reviewing its operational effectiveness.

On 28 August 2017 the Board of Directors adopted the Whistleblower rules and the Code of Conduct of the Company aimed to regulate the internal procedure of reporting about the irregularities of a general, operational and financial nature within Milkiland N.V. and its group companies and/or to report alleged irregularities that relate to the performance of the members of the management of the Company. These documents have been published at its corporate website: http://www.milkiland.nl/en/investors/general_information/corporate_documents/

The internal risk management and control systems are designed to identify significant risks and to assist the Board of Directors and the Company in managing the risks that could prevent the Company from achieving its objectives.

The Board of Directors is responsible for establishing and maintaining adequate internal risk management and control systems. Such systems are designed to manage rather than eliminate the risk of failure to achieve important business objectives, and can only provide reasonable and not absolute assurance against material misstatements of loss.

In order to provide effective internal control of the financial statements preparation and accuracy of financial information, the Company has developed and implemented a three-level system of internal control:

- The first level of control (technical) foresees the checks of the prepared financial statement using mathematical formulas which allow revealing mismatches and discrepancies in the values. This level of control is conducted by the heads of financial departments of the Company's subsidiaries.
- The second level of control is provided by the financial department at the level of Chief Financial Officer of Milkiland N.V. who performs a thorough check and ensures the compliance with the Company's policies and processes.
- The third level of control is performed by Internal Audit Department who identifies the Company's risks areas. At this level of control the independent external auditor is invited from time to time.

After all three-level control is performed the financial statement together with deliberates and findings (if any) are presented to the Board of Directors.

The Company recognizes the importance of internal control and envisages improving its existing function.

Internal audit department

In deviation from principle 1.3 of the Code the Company will not appoint a senior internal auditor because the internal audit is performed by the Internal Audit Department (the "IAD") and partially by licensed independent external auditors under the supervision of the Audit Committee.

As a part of the Company's long-term strategy, on 14 November 2018 the Internal Audit Department Charter (the "IADC") was adopted. According to IADC the internal audit activity governed by compliance with the mandatory elements of the International Professional Practice Framework, including Core Principles, the Code of Ethics, and the International Standards for the Professional Practice of Internal Auditing. These regulations are designed and approved by the Institute of Internal Auditors.

The IAD reports to Audit Committee, Board of Directors and the Chief Executive Officer. The Head of the IAD reports periodically to senior management and the Audit Committee regarding compliance of the internal audit activity to the mandatory elements of International Professional Practice Framework.

The IAD's responsibilities and functions are as follows:

- development of periodic (annual, semi-annual, quarter) internal audit plan;
- implementation of periodic internal audit plan;
- formation of audit team of professionals with sufficient knowledge, skills, experience and professional certification;
- preparation of an audit report in order to communicate the audit findings;
- following up on plan of recommendations and corrective actions provided by the IAD in order to ensure that the identified risks and major deficiencies are effectively addressed and remediated within the mutually agreed timeframe;
- preparation and presentation to the Audit Committee of reports on a monthly basis summarizing the status and the results of internal audit activity;
- review the Company's antifraud practices together with management and the Audit Committee;
- investigation of suspected fraudulent activities within the Company and notifying the results to the management and the Audit Committee;
- Ensure the principles of integrity, objectivity in its work, and adherence to policies and procedures designed to guide the internal audit.

The IAD meets regularly with external auditors for discussion of an internal and external audit schedules and for sharing with professional experience. These meetings also ensure that two functions (internal and external) are coordinated and there is no duplication.

Diversity policy

On November 10, 2016 the Board of Directors has approved the Company's Diversity Policy as recommended by provisions I.Z.1.15 of the WSE Code and provision 2.1.5 of the Code. The Diversity Policy is published at the Company website at:

http://www.milkiland.nl/en/investors/general_information/corporate_document

The diversity policy of the Company is a part of a long-term vision which can ensure realization of the Company's business strategy and achievement of business priorities. Diversity principles are incorporated into all aspects of human resource management in the Company, such as workforce planning, recruitment and selection, performance management, learning and development, leadership development etc. The Company values and respects people with diverse backgrounds and perspectives.

The Company's diversity policy for employees includes several aspects:

- Equal employment opportunity - the Company encourages a gender-balanced employment of professionals with different backgrounds, a merit-based promotion, and culture that does not tolerate discrimination or harassment during the employment;
- Workplace safety - the Company provides a healthy and safe workplace with a positive working atmosphere for all employees; the Company are adapting the workplace for its employees with disabilities and all other employees to accommodate their special needs, and to make their workplace more safe and comfortable;
- Respect and inclusion - the Company ensures the understanding and fulfillment of the diversity policy by all the employees and works on improved relationships, understanding and teamwork between employees, based on mutual respect of individual diversity;
- Diversity support - the Company promotes equal pay and gender diversity within the Company and provides employment opportunities for people with disabilities.

The Company constantly improves and supports its internal and external diversity initiatives.

The WSE Code and the Code recommends that the composition of management bodies of the Company shall be diverse in terms of gender, age, education, professional experience. In the Company the management and supervisory duties are performed by the Board of Directors, which in 2018 consisted of five men and one woman, of diverse age, nationality and professional background. The Company understands and supports this recommendation and considers involving more women in the Board of Directors.

Compliance with the WSE Code and the Code

On October 13, 2015 Supervisory Board of WSE approved Best Practice for GPW Listed Companies 2016 (WSE Code), effective as from January 01, 2016. The Company incorporated in the Netherlands is subject to the provisions and principles of the Code. However, since its shares listed on WSE, the Company is subject to the principles of corporate governance set out in the WSE Code. On May 13, 2016 the Company has published its Report on compliance with WSE Code on its corporate website at:

http://www.milkiland.nl/en/investors/general_information/corporate_documents/.

Since the WSE Code rules are similar to the rules provided under the Code, the Company complies with a majority of the principles and best practice provisions of the Code as well.

It is noted that the one-tier board structure of the Company deviates from the recommendations of WSE Code, which prescribes the existence and functioning of two separate governing bodies. However, the Company's one-tier board structure corresponds to the recommendation of the Code and best suits to the Company's management goals.

The Company explains why it does not comply with the following recommendations of the WSE Code and the Code:

- Company pursues sponsorship and charity activities, but does not have an established policy in this respect. As a result annual reports do not publish information about a relevant policy as recommended by provision I.R.2 of the WSE Code.

The Company published the selected financial data for the last 5 years on the website in addition to the periodic financial reports to comply with provision I.Z.1.8 of the WSE Code:

http://www.milkiland.nl/en/investors/general_information/key_data_of_the_group/

On 30 June 2017 the Company published current division of duties and responsibilities for the Company's Directors on the website to comply with provisions I.Z.1.3, II.Z.1 of the WSE Code.

On 19 May 2017 the Company published on its corporate website the information about an absence of specific internal rule which recommended by provision I.Z.1.11 of the WSE Code. The Company stated that it follows applicable Dutch laws regarding changing the company authorized to audit financial statements of the Company, and the Company believes that the continuity of the external auditor limited by the applicable Dutch laws would be more beneficial for the Company.

More information is published in the Company's Report on compliance with WSE Code and on its corporate website.

The Company explains why the following best practice provisions of the Code are not applied:

In deviation from provision 2.3.2 and chapter 3 of the Code, the Company has not established a remuneration committee nor a selection and appointment committee. The remuneration of members of the Board of Directors of the Company is defined by shareholders on Annual General Meetings each year. The Board of Directors conducts the relevant duties that are

charged upon this committee on the basis of the Code.

Principles 2.2.1 of the Code provides that a management board member is appointed for a maximum period of four years, a member may be reappointed again for a term of not more than four years at a time. The Company does not comply with this best practice provision of the Code due to its Executive Directors Mr. Anatoliy Yurkevych and Mrs. Olga Yurkevich have been acting as an Executive Directors of the Company since 2007 year. Below the Company explains the reason for such reappointment.

Principle 2.2.2 of the Code provides that a supervisory board member is appointed for a maximum period of four years and may be reappointed one another four-year period. The supervisory board members may subsequently be reappointed again for a period of two years, which appointment may be extended by at most two years. The Company does not comply with this best practice provision of the Code due to Mr. Vyacheslav Rekov and Mr. Willem Scato van Walt Meijer have been acting as the Company's Non-Executive Directors since 2007 and 2010 years respectively. Below the Company explains the reason for such reappointment.

The Company believes that, in deviation from the provisions 2.2.1 and 2.2.2 of the Code reappointment of the abovementioned members of the Board of Directors has a positive impact to the Company's business activity and that these members act in the best Company's interests. The Directors has a wide experience and a deep understanding of the Company's business processes and made a substantial contribution to the Company's development.

The Company's application of the Code is described in the separate section of the annual report 2018, which can be found at:

http://www.milkiland.nl/upload/iblock/079/MLK_Annual_Report_2018-approved-by-GSM.pdf.

In each subsequent year the Company will explain its compliance with the Code as a separate section of the annual report.

Report of Non-Executive Directors

In 2019 Mr. Pavlo Sheremeta, Mr. Vyacheslav Rekov, Mr. Willem Scato van Walt Meijer, Mr. Oleg Rozhko proceeded to perform their duties as Non-Executive Directors of the Company. The profile of Non-Executive Directors of the Company is published at the Company's website at:

http://www.milkiland.nl/en/company/board_of_directors/

The Non-Executive Directors are charged with supervising, monitoring and advising the Executive Directors with respect to all responsibilities of the Board of Directors. The statements of fulfillment of the independence criteria were provided by all Non-Executive Directors: Mr. Willem Scato van Walt Meijer, Mr. Oleg Rozhko, Mr. Vyacheslav Rekov, and Mr. Pavlo Sheremeta.

The Non-Executive Directors drew up the retirement schedule with the information regarding the total years of appointment and information on the next reappointment of the members of the Board of Directors which is published at the Company's website at: http://www.milkiland.nl/en/investors/general_information/corporate_documents/.

In carrying out their tasks, all of the above mentioned Non-Executive Directors gave their advice and expertise for the best Company practice. Mr. Oleg Rozhko is a Chairman of the Board of Directors, Mr. Willem Scato van Walt Meijer is a Chairman of the Audit Committee and Mr. Vyacheslav Rekov and Mr. Pavlo Sheremeta are members of the Audit Committee. The Audit Committee met 9 times during 2019 financial year. The duties of the Audit Committee were duly performed. The Audit Committee provided their Audit Committee Opinion which is a part of the Report.

Throughout the 2019 the Non-Executive Directors worked on development and maintenance of systems of internal control and assessing the effectiveness of these systems, and as a part of this, had an active dialogue with the Executive Directors. This resulted in adoption of the Internal Control Framework on 29 August 2019. As a contribution to a long-term strategy, in 2019 the Non-Executive Directors together with Executive members of the Board discussed the fraud prevention measures in the Company, and as a part of this a Speak up Policy is considered to be implemented in the Company. The Speak up Policy will allow and encourage employees and third parties to report identified or suspected misconduct and irregularities confidentially.

There were no irregularities in the 2019 financial year that required interventions by the Non-Executive Directors.

Remuneration policy and remuneration report

The objective of the Group's remuneration policy is to provide a compensation program allowing for the attraction, retention and motivation of members of the Board of Directors who have chartered traits, skills and background to successfully lead and manage the Company. The remuneration policy focuses on long-term value creation for the Company and its subsidiaries and takes into account the internal pay ratios within the Company.

The updated Remuneration Policy of the Company is adopted on 15 June 2018 and published on the Company's website: http://www.milkiland.nl/en/investors/general_information/corporate_documents/.

The Remuneration Policy is based on best principles of the Code.

The remuneration of members of the Board of Directors is defined by shareholders on Annual General Meetings each year pursuant to proposals of the Board of Directors. The remuneration of the Board of Directors is not dependent on the results of the Company.

Individual-specific responsibilities are taken into consideration in respect of the determination and differentiation of the remuneration of the members of the Board of Directors.

The Group's policy towards the members of the Board of Directors and Key Executives, as well as employment contracts of the members of the Board of Directors and Key Executives do not provide for any benefits in the case of dismissal or termination of such person's service, employment contract or other similar agreement. The members of the Board of Directors and Key Executives are not granted any pensions, retirement or similar benefits.

Information about the remunerations accrued to the Company's Directors in 2019 for rendered services is presented in the table below.

Directors' remuneration stands for directors' fees, salaries of Executive Directors, bonuses and other incentive payments. The Company's remuneration policy in 2019 provided for reimbursement of Directors expenses incurred in connection with their service for the Company, including attendance of the Board of Directors or its committees meetings.

Name	Position in 2019	First Appointment	Period of accrual of remuneration	Gross Remuneration (EUR)	Expenses reimbursement (EUR)	Total (EUR)
Oleg Rozhko	Chairman of the Board of Director	22.06.2012	from 01.01.2019 to 31.12.2019	30,000	0	30,000
Olga Yurkevich	Executive Director, Chief Production Officer	28.08.2007	from 01.01.2019 to 31.12.2019	25,000	0	25,000
Anatoliy Yurkevych	Executive Director, Chief Executive Officer	28.08.2007	from 01.01.2019 to 31.12.2019	5,000	0	5,000
Vyacheslav Rekov	Non-executive Director, Member of Audit Committee	28.08.2007	from 01.01.2019 to 31.12.2019	30,000	0	30,000
Willem Scato van Walt Meijer	Non-executive Director, Head of Audit Committee	06.12.2010	from 01.01.2019 to 31.12.2019	50,000	11,262	61,262
Pavlo Sheremeta	Non-Executive Director, Member of Audit Committee	30.06.2017	from 01.01.2019 to 31.12.2019	25,000	0	25,000

REPRESENTATIONS OF THE BOARD OF DIRECTORS

Representation of the Board of Directors on the Compliance of Annual Financial Statements

The Board of Directors hereby represents, to the best of its knowledge, that the statutory financial statements of the Company and its consolidated subsidiaries for the year ended 31 December 2019 are prepared in accordance with the applicable accounting standards and that they give a true and fair view of the assets, liabilities, financial position and the result of the Company and its consolidated subsidiaries, and that the report of the Board of Directors for the year ended December 31, 2019 gives a true and fair view of the position of the Company and its consolidated subsidiaries as at December 31, 2019 and of the development and the performance of the Company and its consolidated subsidiaries during the year ended December 31, 2019, including a description of the key risks that the Company is confronted with.

Representation of the Board of Directors on Appointment of an Entity Qualified to Audit Annual Financial Statements

During the period from the end of March 2019 till October, 2019 the Company (i) had been negotiating with all audit firms having PIE license (a license for audit of a public interest entities) in the Netherlands and (ii) by results of the negotiations, all the audit companies had informed the Company about their unavailability to accept an audit engagement from the Company.

As a result, the Company did not enter into engagement agreement with any audit firms and did not appoint the auditor in the Netherlands to audit its annual financial statements for 2019.

The Board of Directors of Milkiland on the meeting held on April 22, 2020 recommended to the Company's shareholders meeting which will hold on June, 26, 2020 to approve the cross-border migration and transfer of corporate seat of the Company from the Netherlands to the Republic of Cyprus and conversion of the legal form of the Company from a public company organized under the laws of the Netherlands to a public limited company under the laws of Cyprus.

The Re-domiciliation procedure of Milkiland is expected to be completed by the end of August, 2020. After completion of Re-domiciliation the Company will engage to audit its annual financial statements for 2019 audit company on Cyprus with a PIE license (the preliminary negotiations regarding future engagement were conducted) which will provide the services of auditing of annual financial statements for 2019 of Milkiland.

Preparation of auditing of annual financial statements for 2019 of the Company is anticipated to be finished by the end of November 2020 or at early December 2020 the latest and then audited annual financial statements for 2019 of the Company will be published on the Company's website and simultaneously filed with the AFM as required the Dutch law.

Representation of the Board of Directors Relating to the System of Internal Control

In line with the best practice provision 1.4.2 and provision 1.4.3 of the Code and bearing in mind the recommendations of the Code, the Company issues a declaration about the effectiveness of the system of internal control of the processes on which the financial reporting is based.

In 2019, the Board of Directors assessed the effectiveness of the system of internal controls for financial reporting. During the investigation on which this assessment was based, no shortcomings were identified that might possibly have a material impact on the financial reporting. On the basis of the results of the above assessment and the risk analysis that was carried out at the Company within the framework of governance and compliance, the Board is of the opinion, after consulting with the Audit Committee, that the system of internal controls provides a reasonable degree of certainty that the financial reporting contains no inaccuracies of material importance. There is an inherent limitation in that systems of internal control cannot provide an absolute degree (though they can provide a reasonable degree) of certainty in regards to the prevention of material inaccuracies in the financial reporting and the prevention of losses and fraud.

On August 29, 2019 the Board of Director adopted the Internal Control Framework that develops and maintains the systems of internal control.

In our view the system of internal controls, focused on the financial reporting, functioned effectively over the past year. There are no indications that the system of internal controls will not function effectively in 2020.

Representation of the Board of Directors on the long-term value creation and realisation

The Board of Directors is guided in its duties by the interests of the Company and its subsidiaries and focuses on the long-term value creation strategy, taking into careful consideration the relevant interests of its shareholders. The contributions made to the long-term value creation realization in the financial year 2019 are as follows, making decision in line with the Company's long-term value creation strategy.

In 2020 the Board of Directors will continue developing and implementing the long-term value creation strategy as recommended by the best practice provisions of the Code.

Board of Directors of Milkiland N.V.

April, 28, 2020

A. Yurkevych

O. Rozhko

P. Sheremeta

V. Rekov

W.S. van Walt Meijer

Audit Committee opinion

The function of internal audit of Milkiland N.V. is performed by Internal Audit Department that comprised in 2019 by the Head of Internal Audit Department. The Head of Internal Audit Department has necessary qualification including comprehensive and strong experience and competence to perform his duties. The Head of Internal Audit Department is accountable to the Audit Committee and receives all necessary support and information from the Company. The Head of Internal Audit Department also closely collaborates with accounting, financial controlling and other departments of the Group including joint visits to the production sites.

The Internal Audit Department operates in the Company according to the principles of integrity, fair presentation, due professional care, confidentiality, independence and the evidence-based approach, and conducts audits according to the ISAs and International Standards for the Professional Practice of Internal Auditing.

The Internal Audit Department of the Company drew up the audit plan for 2019 financial year (the "Audit Plan") involving the Board of Directors, the Audit Committee and the external auditors. The Audit Committee reviewed the Audit plan and agreed its resources requirements. During 2019 Internal Audit Department carried out different tasks regarding operational and financial processes being presented and discussed by the Audit Committee. Head of Internal Audit Department is permanently invited to the meetings of the Audit Committee where he presents the results of the audits, investigation and ad-hoc check. All findings and recommendations made by the Head of Internal Audit Department are reviewed

and discussed by the Audit Committee including corrective and preventive actions and follow-up plans, with the Board of Directors approving those items as required from a corporate governance perspective.

The Board of Directors of Milkiland N.V. approved Internal Control Framework in 2019 as a base of process development to reach the objectives more effective.

The Audit Committee assists and advises the Board of Directors of the Company in monitoring the integrity of the financial statements of the Group and the Company, in monitoring the compliance with legal and regulatory requirements and monitoring the independence and performance of the Internal Audit Department and external auditors.

The Audit Committee carried out an evaluation of the performance of the internal audit in 2019 financial year and concluded the following:

- internal controls are in place and effective with any deficiencies are promptly solved according to the priorities approved by the Audit Committee;
- the Company's processes, plans and standards are best suited to achieve its objectives and serve its stakeholders in a legal and ethical manner;
- there is a reasonable level of assurance that the risk of significant misstatement in the financial reporting and the risk of incompliance with critical regulations does not exceed an acceptable level.

Therefore, the Audit Committee sees Internal Audit Department as an effective tool of the internal risk management and control systems in the Company.

Notes to the consolidated financial statements

1 The Group and its operations

These consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS) as endorsed by the European Union for the year ended 31 December 2019 for Milkiland N.V. (the “Company”) and its subsidiaries (together referred to as “the Group” or “Milkiland”).

The financial statements were approved by the Board of Directors of the Company on 28 April 2020 and are subject to adoption by the shareholders during the General Shareholders Meeting.

The Company was incorporated on 13 July 2007 under Dutch law as a private limited liability company (B.V.). On May 23, 2009 the Company was converted into a public limited liability company (N.V.). The address of its registered office is Amsterdamse Bos, Cuserstraat 93, 1081 CN Amsterdam, the Netherlands and the principal place of business is 9, Boryspilska Str., 02090, Kyiv, Ukraine. Chamber of Commerce number is 34278769.

The authorized share capital of the company amounts to EUR 5,000,000 consisting of 50,000,000 ordinary shares with a nominal value of EUR 0.10 each.

The designation may be renewed each time for a period not exceeding five years. No designation made pursuant to a resolution passed by the General Meeting of Shareholders may be cancelled, unless cancellation of such designation was specifically permitted in the applicable designation. For as long as the Board of Directors is designated, the General Meeting of Shareholders shall not have this power.

As at 31 December 2019 the Company is controlled by 1, Inc. Cooperatief (holding 73.52% of shares). The Company is ultimately controlled by Anatoliy Yurkevych and Olga Yurkevich. Commencing from 6 December 2010, the Company became listed on the Warsaw Stock Exchange having placed 20% of newly issued and 2.4% of existing shares to investors.

The Company mainly acts as a holding company and exercises control over the operations of its subsidiaries.

Milkiland is a diversified dairy processing Group, producing and distributing dairy products in EU and CIS, with the key markets in Russia, Ukraine and Poland. The production facilities of the Group are located in these 3 countries and are able to process up to 1,330 thousand tons of milk per year. The plants purchase milk from local farmers and produce different kind of dairy products, including, cheese, butter, whole-milk products, as well as dry milk products.

As at 31 December 2019 the Group employed 2,729 people (2018: 3,238 people).

MILKILAND N.V.

Consolidated statement of changes in equity

(All amounts in euro thousands unless otherwise stated)

Going concern assumptions

Financial situation as per 31 December 2019

Key financial indicators 2019

Per December 31, 2019 the equity of Milkiland amounts to EUR 23.9 million negative. A loss amounting to EUR 11.6 million has been realized over 2019. Operating cash flows were positive amounting to EUR 9.4 million and the net cash flow was positive for EUR 2.0 million.

Loan covenants

As at 31 December 2019 the Group was in breach of certain financial covenants under a few bank loans mostly due to devaluation of the local currency. This situation started in 2014 and is still applicable. The breaches relate to the following covenants:

- Tangible net worth should not at any time be less than EUR 105,000 thousand;
- Borrowing to EBITDA ratio in respect of any relevant period will not exceed 3.5 to 1;
- EBITDA to interest expenses ratio in respect of any relevant period will not be less than 3.25 to 1.

Non-compliance with covenants gives banks a formal right to demand early repayment of loans. The management notified all banks about expected prospective non-compliances.

Since October 2018 Milkiland had been participating in 13 legal claims on recovery of the real estate and movable property of several Ukrainian subsidiaries of the Group mortgaged to the Lenders. 11 of these cases were left without consideration, but remaining 2 are still considering by the respective courts. For more information regarding this issue please refer *Material Factors and Events*.

Local operations

In the course of 2017 the Arbitration Court of the City of Moscow declared the JSC "Ostankino Dairy" bankrupt based at the claim of one of its Creditors, Bank "Vozrozhdenie". As of 31 December 2019, the majority of production assets of Ostankino, including buildings and equipment, were sold under the procedures of competitive auctions. Ostankino is fulfilling the operations based at the agreements with the new Owner on leasing the production buildings and equipment, expiring on 31 July 2020 with the possibility of further prolongation. It is unclear whether the new Owner will have an intention to prolong these agreements after the above mentioned date.

Also, in March 2020 the Arbitrage Court of Kursk oblast (region) of Russian Federation adopted a decision of insolvency of LLC "Kursk milk", subsidiary of Milkiland, and implemented of an arbitrage management of LLC "Kursk milk" within the bankruptcy procedure of this company. For more information regarding this issue please refer *Material Factors and Events*.

The Polish segment of the Group in 2019, namely Milkiland EU subsidiary controlling cheese making plant Ostrowia, was financially supported by the Group due to the loss making operations. Ostrowia was idle from September to December 2019 in line with implemented cost cutting measures. The production activities were resumed in December 2019 on the back of better situation with the global prices for the plant's main produce, namely WPC-80 and permeat, as well as lower prices for inputs in Poland.

The above circumstances could materially affect the ability of Milkiland to continue as a going concern.

Matters considered in determining the appropriateness of the going concern assumption

Syndicated loan

On March 20 and November 28, 2019, respectively, Milkiland published an official statements claiming the assignment of the full sum of indebtedness under Loan Facility Agreement with the Syndicate of banks in the amount of USD 58,580,000 (c. EUR 52.3 million) to a New Lender, namely, Swestal Holding Ltd.

For more information regarding this issue please refer *Material Factors and Events*.

The Group's management is continuing the negotiations on the restructuring of the above mentioned indebtedness with a New Lender and hopes to achieve the progress on this issue in the near future.

LLC Kursk Milk's Creditors

With regards to the LLC Kursk milk bankruptcy, this event caused another possible material threat to the going concern ability of Milkiland and its operations in the Russian market. The ability of the Group to continue its operations there is dependent on upcoming negotiations during the bankruptcy procedures and finding of the mutually acceptable solution of the settlement of the indebtedness to Kursk milk's Creditors.

Other

Besides assignment the rights under Loan Facility Agreement and the settlement of the indebtedness to LLC Kursk Milk's Creditors, the Group is in progress of improving the profitability and cash flows for the Group as a whole. This includes plans to stabilize the financial standing in all of the countries of operations, as well as further development of export of Milkiland's dairy, including to the newly opened markets.

In conclusion

The ability of the Group to continue its operations is dependent upon the New Lender under Loan Facility Agreement, finding a mutually acceptable solution of the settlement of the indebtedness to LLC Kursk milk's creditors, prolongation of the leasing agreements with the new Owner of majority of Ostankino' assets, as well as improvement of future profitability and cash flows.

Based on the going concern assessment - the material uncertainty regarding the going concern assumption combined with the matters considered in determining the appropriateness of the going concern assumption - made by management, Milkiland concluded that it is deemed appropriate to prepare the financial statements on the going concern basis.

2 Summary of significant accounting policies

Basis of presentation. These consolidated financial statements of the Group have been prepared in accordance with the requirements of International Financial Reporting Standards (further - IFRS) as endorsed by the European Union and also comply with the financial reporting requirements included in Part 9 of Book 2 of the Dutch Civil Code.

These consolidated financial statements of the Group have been prepared using the historical cost convention, as modified by the revaluation of property, plant and equipment, and certain financial instruments measured in accordance with the requirements of IAS 39 *Financial instruments: recognition and measurement*.

New and revised Standards and Interpretations to be applied by the Company

IFRS 9 Financial Instruments

The Company has applied IFRS 9 *Financial Instruments* (IFRS 9), beginning from 1 January 2019. This standard replaced the previous IAS 39 *Financial Instruments: Recognition and Measurement* (IAS 39).

The standard introduces new requirements for classification and measurement, impairment, and hedge accounting. IFRS 9 is effective for annual periods beginning on or after 1 January 2019, with early application permitted. Retrospective application is required, but comparative information is not compulsory. As the main financial assets used by the Company are limited to trade and other receivables, the adoption of IFRS 9 will not have a significant effect on the classification, valuation and measurement of the Company's financial assets. The company does not use hedging or derivatives accounting of which could be impacted by the new standard. The adoption of IFRS 9 will have no impact on the classification and measurement of the Company's financial liabilities.

The Company did not recalculate the comparative information that was presented in accordance with IFRS 39. The difference arising from the application of IFRS 9 was recognized directly in the retained earnings and other equity components at the date of first-time adoption - 1 January 2019. The definition of a business- model within which the financial asset is, was made on the basis of the facts and circumstances that existed at the date of the first-time adoption of IFRS 9. Analysis of whether contractual cash flows for debt instruments are solely payments of the principal and interest was performed on the basis of the facts and circumstances that existed at the time of the initial recognition of these assets.

The requirements of IFRS 9 for classification and measurement did not have a significant effect on the Company.

The application of IFRS 9 changed the approach to calculating impairment losses on financial assets. Instead of the incurred loss method used by IAS 39, the expected credit loss model is applied.

The Company applies the simplified approach of IFRS 9 to estimating expected credit losses on trade and other receivables. To assess expected credit losses, trade and other receivables were distributed according to the general characteristics of credit risk and ageing.

IFRS 15 Revenue from Contracts with Customers

IFRS 15 supersedes IAS 11 *Construction Contracts*, IAS 18 *Revenue* and related Interpretations and it applies, with limited exceptions, to all revenue arising from contracts with its customers. IFRS 15 establishes a five-step model to account for revenue arising from contracts with customers and requires that revenue be recognized at an amount that reflects the consideration to which an entity expects to be entitled in exchange for transferring goods or services to a customer.

IFRS 15 requires entities to exercise judgment, taking into consideration all of the relevant facts and circumstances when applying each step of the model to contracts with their customers. The standard also specifies the accounting for the incremental costs of obtaining a contract and the costs directly related to fulfilling a contract. In addition, the standard requires extensive disclosures.

In accordance with IFRS 15 *Revenue from Contracts with Customers* (IFRS 15), revenue is recognized when goods or services are transferred to a customer in the amount of compensation to which the Company expects to receive the right in exchange for transferring the promised goods or services to the buyer.

The Company applied IFRS 15 from 1 January 2019 using a modified retrospective approach. Under this transition method, the Company applied the standard only to those contracts that are not executed at the date of transition to IFRS 15.

When using a modified retrospective approach, the cumulative effect of the first-time adoption of IFRS 15 is recognized at the date of the first-time adoption as an adjustment to the opening balance of retained earnings (as of 1 January 2019). In doing so, comparative information has not been restated and is still presented in accordance with IAS 18.

The Company analyzed the impact of IFRS 15 on its accounting policies and financial statements, during which various streams of income of the Company were considered. According to the Company's management, changes in accounting policies do not have a significant impact on the financial statements and do not require adjustment of retained earnings as of 1 January 2019.

Application of other IFRSs

Amendments to IFRS 2 Classification and Measurement of Share-based Payment Transactions

Amendments address three main areas: the effects of vesting conditions on the measurement of a cash-settled share-based payment transaction; the classification of a share-based payment transaction with net settlement features for withholding tax obligations; and accounting where a modification to the terms and conditions of a share-based payment transaction changes its classification from cash settled to equity settled.

On adoption, entities are required to apply the amendments without restating prior periods, but retrospective application is permitted if elected for all three amendments and other criteria are met. These amendments do not have any impact on the Company's financial statements.

Amendments to IFRS 4 Applying IFRS 9 Financial Instruments with IFRS 4 Insurance Contracts

The amendments address concerns arising from implementing the new financial instruments standard, IFRS 9, before implementing IFRS 17 *Insurance Contracts*, which replaces IFRS 4. The amendments introduce two options for entities issuing insurance contracts: a temporary exemption from applying IFRS 9 and an overlay approach.

These amendments did not have any impact on the Company's financial reporting.

Amendments to IAS 40 *Investment Property*. The amendments clarify the procedure for the transfer of property to/from the category of investment property. Transfers are made if and only if there is an actual change in the nature of the use of the object - i.e. when the asset begins or stops meeting the definition of investment property and there is evidence of a change in the nature of its use. A change in management's intentions regarding an asset does not in itself constitute a basis for its transfer to another category. The revised examples of factors proving a change in the nature of the use of an asset that the Board included in the amended edition of IAS 40 are not exhaustive - i.e. other forms of evidence are possible that give rise to the transfer of an asset. The amendments did not affect the Company's financial statements.

IFRIC Interpretation 22 Foreign Currency Transactions and Advance Considerations

The Interpretation clarifies that, in determining the spot exchange rate to use on initial recognition of the related asset, expense or income (or part of it) on the derecognition of a non-monetary asset or non-monetary liability relating to advance consideration, the date of the transaction is the date on which the Company initially recognizes the non-monetary asset or non-monetary liability arising from the advance consideration. If there are multiple payments or receipts in advance, then the Company must determine the date of the transactions for each payment or receipt of advance consideration. This Interpretation does not have any impact on the Company's financial statements.

Annual IFRS Improvements (2014 - 2016 period).

IFRS 1 First-time adoption of IFRS.

IFRS 1 has been amended to remove short-term exemptions dealing with IFRS 7 *Financial Instruments: Disclosures*, IAS 19 *Employee Benefits* and IFRS 10 *Consolidated Financial Statements*. The reliefs provided are no longer applicable and had been available to entities for reporting periods that have now passed.

IAS 28 Investments in Associates and Joint Ventures.

IAS 28 has been amended to clarify that a venture capital organization, or a mutual fund, unit trust and similar entities (including investment-linked insurance funds) may choose, on an investment by investment basis, to account for its investments in joint ventures and associates at fair value or using the equity method. The amendment also makes it clear that method chosen for each investment is to be made on initial recognition.

Improvements did not have any impact on the Company's financial statements.

IFRS and IFRIC interpretations not yet effective

IFRS 16 Leases. IFRS 16 replaces IAS 17 *Leases*, IFRIC 4 *Determining whether an Arrangement contains a Lease*, SIC-15 *Operating Leases-Incentives* and SIC-27 *Evaluating the Substance of Transactions Involving the Legal Form of a Lease*. IFRS 16 sets out the principles for the recognition, measurement, presentation and disclosure of leases and requires lessees to account for all leases under a single on-balance sheet model similar to the accounting for finance leases under IAS 17. The standard includes two recognition exemptions for lessees - leases of 'low-value' assets (e.g., personal computers) and short-term leases (i.e., leases with a lease term of 12 months or less). At the commencement date of a lease, a lessee will recognize a liability to make lease payments (i.e., the lease liability) and an asset representing the right to use the underlying asset during the lease term (i.e., the right-of-use asset). Lessees will be required to separately recognize the interest expense on the lease liability and the depreciation expense on the right-of-use asset.

Lessees will be also required to remeasure the lease liability upon the occurrence of certain events (e.g., a change in the lease term, a change in future lease payments resulting from a change in an index or rate used to determine those payments). The lessee will generally recognize the amount of the remeasurement of the lease liability as an adjustment to the right-of-use asset.

IFRS 16 is effective for annual periods beginning on or after 1 January 2019. Early application is permitted, but not before an entity applies IFRS 15. A lessee can choose to apply the standard using either a full retrospective or a modified retrospective approach. The standard's transition provisions permit certain reliefs.

The Company has not assessed the impact of IFRS 16 on the reporting date.

IFRS 17 Insurance Contracts. IFRS 17 is a new financial reporting standard for insurance contracts that addresses the recognition and measurement, presentation and disclosure of information. IFRS 17 will replace IFRS 4 Insurance Contracts, which was issued in 2005. IFRS 17 applies to all types of insurance contracts (life insurance and insurance other than life insurance, direct insurance and reinsurance), regardless of the type of an entity that issues them, as well as certain guarantees and financial instruments with discretionary participation conditions. There are several exceptions from the scope of application.

IFRS 17 becomes effective for reporting periods beginning on or after 1 January 2021, and comparative information is required. Earlier application is permitted provided that the entity also applies IFRS 9 and IAS 15 on or before the date of the first application of IAS 17. This standard is not applicable to the Company.

Amendments to IFRS 9 - Prepayment Features with Negative Compensation

Under IFRS 9, a debt instrument can be measured at fair value or at fair value through other comprehensive income, provided that the contractual cash flows are “solely payments of the principal and interest on the outstanding principal amount” (SPPI criterion) and the instrument is within the relevant business model allowing such a classification.

The amendments to IFRS 9 clarify that a financial asset meets the SPPI criterion regardless of which event or circumstance leads to early termination of the contract, and also regardless of which party pays or receives a reasonable compensation for early termination of the contract.

These amendments are applied retrospectively and come into force for annual periods beginning from 1 January 2019. Early application is allowed. These amendments will not affect the Company's financial statements.

Amendments to IFRS Consolidated Financial Statements and IAS 28 Investments in Associates and Joint Ventures - Sale or Contribution of Assets between an Investor and its Associate or Joint Venture

The amendments address the contradiction between IFRS 10 and IAS 28, in terms of accounting for the loss of control over a subsidiary that is sold to or contributed to a dependent organization or joint venture. The amendments clarify that profit or loss resulting from the sale or contribution of assets constituting a business, as defined in IFRS 3, in a transaction between an investor and its associate or joint venture is recognized in full. However, profit or loss resulting from the sale or contribution of assets that are not a business is recognized only to the extent of participation interests held by non-organization investors in a dependent organization or joint venture.

The IASB has postponed the effective date of this amendment for an indefinite period, but early application is permitted prospectively.

Amendments to IAS 19 Employee Benefits - Plan Amendment, Curtailment or Settlement

The amendments address the accounting treatment in cases when a plan amendment, curtailment or settlement occurs during the reporting period. The amendments clarify that if a plan amendment, curtailment or settlement occurs during the reporting period, an entity must determine the cost of the services of the current period and the net interest in relation to the rest of the period after the plan amendment, curtailment or settlement based on the actuarial assumptions and discount rates used to reassess the net defined benefit plan liability (asset).

These amendments apply to events that occurred on or after the start of the first annual reporting period beginning on or after 1 January 2019. Early application is allowed. These amendments will apply only to future plan amendment, curtailment or settlement.

Amendments to IAS 28 Investments in Associates and Joint Ventures - Long-term Interests in Associates and Joint Ventures

The amendments clarify that an entity applies IFRS 9 to long-term interests in an associate or joint venture that does not use the equity method, but which, in fact, form part of the net investment in an associate or joint venture (long-term investments). It is understood that the model of expected credit losses according to IFRS 9 is applied to such long-term investments.

The amendments also explain that when applying IFRS 9, an entity does not take into account losses incurred by an associate or joint venture or loss from impairment of net investments recognized as adjustments to a net investment in an associate or joint venture arising from the application of IFRS 28 Investments in Associates and Joint Ventures.

These amendments are applied retrospectively and are effective for annual periods beginning on or after 1 January 2019. Application is allowed before this date. The amendments will have no impact on the Company's financial statements.

IFRIC 23 Uncertainty over Income Tax Treatments.

Whenever requirements of tax legislation are unclear in relation to a particular operation or to specific circumstances, the main criterion is whether the probability is high that the tax authority will agree with the tax claims interpretation chosen by an entity.

If the answer is positive, the entity shall reflect the same amount in the financial statements and consider the need to disclose the existence of uncertainty. If the answer is negative, the amount reported in the financial statements will differ from the amount in the tax return, because it is estimated taking into account the existing uncertainty.

To reflect this uncertainty, one of the following two estimation methods is used, depending on which one will allow to a high accuracy to predict the outcome of the uncertainty:

- the most likely amount, or
- the expected value.

The Interpretation also requires that judgments and estimates that have been formed by the entity were reviewed in the event of a change in facts and circumstances - for example, due to a tax audit or actions taken by the tax authorities, subsequent changes to the tax rules, or after the expiration of the period during which the tax authority has the right to verify the correctness of the tax calculation.

The interpretation is applied to annual periods beginning on or after 1 January 2019; early application is permitted. Currently the Company is assessing the impact of IFRIC 23 application on the financial statements.

Amendments to IAS 1 Presentation of Financial Statements and IAS 8 Accounting Policies, Changes in Accounting Estimates and Errors in respect of materiality determination

The IFRS Committee decided to clarify the definition of materiality, making it more consistent and suitable for all standards. The previous definition in IAS 1 emphasized that the omission or incorrect reflection of significant elements affects the economic decisions of users made on the basis of financial statements. In the new definition, information is considered material if its omission, incorrect reflection or hiding in the financial statements may, in accordance with reasonable expectations, influence the decision of the main users of general-purpose financial statements, who make them based on such financial statements that contain information about the specific reporting entity.

The amendments apply to periods beginning on or after 1 January 2020; early application is permitted. The amendment will not affect the Company's financial statements.

Amendments to IFRS 3 Business Combinations

The amendments clarify the key definition of business.

In the prior definition, business was defined as a set of activities and assets that can be managed to provide income in the form of dividends, lower costs or other economic benefits directly to investors or other owners, members or participants.

According to the new definition, a business is an integrated set of processes and assets capable of implementation and management in order to provide goods or services to customers, generation of investment income (such as dividends or interest) or generation of other income from ordinary activities.

The amendments apply to periods beginning on or after 1 January 2020; early application is permitted. The amendment will not affect the Company's financial statements.

There are no other IFRSs or IFRIC interpretations that are not yet effective that would be expected to have a material impact on the Group.

Consolidated financial statements. Subsidiaries are all entities (including structured entities) over which the Group has control. The Group controls an entity when the Group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. Subsidiaries are fully consolidated from the date on which control is transferred to the Group. They are deconsolidated from the date that control ceases.

The purchase method of accounting is used to account for the acquisition of subsidiaries. The cost of an acquisition is measured at the fair value of the assets given up, equity instruments issued and liabilities incurred or assumed at the date of exchange, plus costs directly attributable to the acquisition. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured at their fair values at the acquisition date, irrespective of the extent of any non-controlling interest. The excess of the cost of acquisition over the fair value of the net assets of the acquired company at each exchange transaction represents goodwill. If the cost of acquisition is less than the fair value of the net assets of the subsidiary acquired, the difference is recognized directly in the statement of comprehensive income.

All intergroup transactions, balances and unrealized gains on transactions between Group companies are eliminated; unrealized losses are also eliminated unless the cost cannot be recovered. Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies of the Group.

Non-controlling interest is that part of the net results and of the net assets of a subsidiary, including the fair value adjustments, which is attributable to interests which are not owned, directly or indirectly, by the Group. Non-controlling interest forms a separate component of the Group’s equity.

IAS 7 Statement of Cash Flow requires an entity to present statement of cash flows as an integral part of its primary financial report. Cash flows of the Group are classified and presented into operating activities, investing and financing activities using indirect method.

Segment reporting. Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision-maker. The chief operating decision-maker, who is responsible for allocating resources and assessing performance of the operating segments, has been identified as the Board of Directors that makes strategic decisions.

Government grants. Government grants received on capital expenditure are included in other non-current liabilities and amortized during the useful life of the asset purchased. Grants for revenue expenditure are netted against the cost incurred by the Group. Where retention of a government grant is dependent on the Group satisfying certain criteria, it is initially recognized as deferred income. When the criteria for retention have been satisfied, the deferred income balance is released to the consolidated statement of comprehensive income or amortized during the useful life of the asset purchased.

Property, plant and equipment. Property, plant and equipment is stated at fair value in accordance with IAS 16 and IFRS 13. Fair value is determined by external appraisers who use either the market or cost approach for determining fair value.

Valuation of property and equipment is performed frequently enough to ensure that the fair value of a revalued asset does not differ materially from its carrying amount. Fair value is based on the valuations by external independent appraisal agencies.

Depreciation is charged to the consolidated statement of comprehensive income on a straight line basis to allocate costs of individual assets to their residual value over their estimated useful lives of the assets:

	Useful life, years
Buildings, constructions	20-50
Plant and equipment	5-30
Other	1-15

Construction in progress represents the cost of property, plant and equipment, including advances to suppliers, which has not yet been completed. No depreciation is charged on such assets until they are available for use.

Any revaluation surplus is credited to the asset revaluation reserve included in the net assets attributable to participants in the consolidated statement of financial position, except to the extent that it reverses a revaluation decrease of the same asset previously recognized in profit or loss, in which case

it is recognized in profit or loss. A revaluation discount is recognized in profit or loss, except that a discount directly compensates a previous surplus of the carrying amount of these assets during a previous period and refers to the revaluation reserve.

An annual transfer from the asset revaluation reserve to retained earnings is made for the difference between the depreciation based on the revaluation carrying amount of the asset and depreciation based on the asset original cost. Additionally, accumulated depreciation as at the revaluation date is eliminated with immediate decrease of the gross carrying amount of the asset and the net amount is restated to the revalued amount of the asset. Upon disposal, any revaluation reserve relating to the particular asset being sold is transferred to retained earnings.

When each major inspection is performed, its cost is recognized in the carrying amount of the plant and equipment as replacement if the recognition criteria are satisfied.

An item of property and equipment is derecognized upon disposal or when no future economic benefits are expected from its use. Any gain or loss arising on retirement of the asset (calculated as the difference between the net disposals proceeds and the carrying amount of the asset) is included in the statement of comprehensive income in the year the asset is derecognized.

The asset's residual values, useful lives and methods of depreciation are reviewed, and adjusted if appropriate, at each financial year end.

Intangible assets (excluding goodwill). Intangible assets acquired separately are measured on initial recognition at an original cost. The original cost of intangible assets acquired in a business combination is their fair value as at the date of acquisition. Following the initial recognition, intangible assets are carried at cost less any accumulated amortization and any accumulated impairment losses. Internally generated intangible assets, excluding capitalized development costs, are not capitalized and expenditure is reflected in the statement of comprehensive income in the reporting year in which the expenditure is incurred.

The useful lives of intangible assets are assessed to be definite. Intangible assets with definite lives are amortized over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortization period and the amortization method for an intangible asset with a definite useful life are reviewed at least at each reporting year-end. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset is accounted for by changing the amortization period or method, as appropriate, and treated as changes in accounting estimates. The amortization expense on intangible assets with definite lives is recognized in the statement of comprehensive income in the expense category consistent with the function of the intangible asset.

Software is amortized under the straight-line method over its useful life comprising 2-4 years.
Trade Marks of purchased subsidiaries are amortized under the straight-line method over its useful life comprising 10 years.
Land lease rights of purchased subsidiaries are amortized under the straight-line method over its useful life comprising 5-7 years.

Investment property. Investment property is stated at fair value in accordance with IAS 40 and IFRS 13. Fair value is determined by external appraisers who use multiple valuation techniques: cost approach and income approach for determining fair value.

Valuation of investment property is performed frequently enough to ensure that the fair value of a revalued asset does not differ materially from its carrying amount. Fair value is based on valuations by external independent appraisal agencies.

Goodwill. Goodwill represents the excess of the cost of an acquisition over the fair value of the acquirer's share of the net identifiable assets, liabilities and contingent liabilities of the acquired subsidiary at the date of exchange. Goodwill on acquisitions of subsidiaries is included in Intangible assets in the statement of financial position. Goodwill is carried at cost less accumulated impairment losses, if any.

Goodwill is allocated to cash generating units for the purposes of impairment testing. The allocation is made to those cash generating units or groups of cash generating units that are expected to benefit from the business to which the goodwill arose.

Impairment of non-financial assets. The Group assesses at each reporting date whether there is an indication that an asset may be impaired. If any such indication exists, or when annual impairment testing for an asset is required, the Group makes an estimate of the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's fair value less costs to sell and its value in use and is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. Where the carrying amount of an asset exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. Impairment losses of continuing operations are recognized in the Statement of comprehensive income in those expense categories consistent with the function of the impaired asset.

An assessment is made at each reporting date as to whether there is any indication that previously recognized impairment losses may no longer exist or may have decreased. If such indication exists, the recoverable amount is estimated. A previously recognized impairment loss is reversed only if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognized. If that is the case the carrying amount of the asset is increased to its recoverable amount. That increased amount cannot exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognized for the asset in prior years. Such reversal is recognized in profit or loss. After such a reversal the depreciation charge is adjusted in future periods to amortize the asset's revised carrying amount, less any residual value, on regular basis over its remaining useful life.

Biological assets. The Group classifies livestock (primarily cattle) and unharvested crops as biological assets. Biological assets are carried at their fair value less estimated costs to sell, except when the fair value cannot be measured reliably. If fair value cannot be measured reliably, biological assets are carried at cost less accumulated depreciation and accumulated impairment losses. Costs to sell are the incremental costs directly attributable to the disposal of an asset, excluding finance costs and income taxes.

Management's estimation of the useful lives of livestock amounts to 8 years.

Gain (loss) from changes in fair value of biological assets included in the consolidated statement of comprehensive income represents the net difference between the excess of the fair value less estimated costs to sell of biological assets over their total cost at the end of reporting period, and the corresponding amount at the beginning of the reporting period.

Agricultural produce. The Group classifies harvested crops as agricultural produce. After harvesting, agricultural produce is treated as inventories.

Inventories. Inventories are valued at the lower of cost and realizable value.

Inventory is accounted for at FIFO method.

Cost includes acquisition costs and the costs related to inventories delivery to their location and bringing to the working condition.

Cost of the inventories manufactured and production in progress includes the cost of raw materials, direct labor input and other direct expenses, as well as appropriate overheads (as calculated in conditions of ordinary use of production capacities). Net realizable value is the estimated selling price less all estimated production costs and the estimated business and distribution costs.

Financial instruments. Financial instruments reported in the Group's statement of financial position include financial investments, loans provided, trade and other receivables, cash and cash equivalents, loans received, trade and other accounts payable. Financial instruments initially are stated at fair value

plus transaction costs, except financial instruments at fair value through profit and loss. Financial instruments are stated in the statement of financial position at the moment of bargain in respect of an appropriate financial instrument. Valuation order of financial instrument will be considered below.

Financial instrument or some part of a financial instrument is written off in the financial statements when the Group loses its rights or repays liabilities related to this financial instrument. When financial asset is written off, the difference between received and accrued compensation and carrying amount is recognized in the statement of comprehensive income. When a financial liability is written off, the difference between paid or accrued compensation and a current carrying amount is recognized in the statement of comprehensive income.

Recognition of financial instruments. The Group recognizes financial assets and liabilities in its consolidated statement of financial position when, and only when, it becomes a party to the contractual provisions of the instrument. Financial assets and liabilities are recognized using trade date accounting.

Financial assets and liabilities are offset and the net amount is reported in the consolidated statement of financial position when there is a legally enforceable right to offset the recognized amounts and there is an intention to settle on a net basis, or realize the asset and settle the liability simultaneously.

In compliance with IFRS 9 financial assets are divided into 4 categories as follows:

- financial assets at fair value through profit and loss;
- loans and accounts receivable;
- investments held to maturity;
- financial assets available for sale.

When a financial asset or financial liability is recognized initially, it is measured at its fair value plus, in the case of a financial asset or financial liability not at fair value through profit and loss, transaction costs that are directly attributable to the acquisition or issue of the financial asset. When the Group becomes a contractual party, it determines embedded derivatives in the contract, if any. Embedded derivatives are separated from the host contract that is not assessed at fair value through profit or loss in case the economic character and risks of embedded derivatives materially differ from similar quotients of the host contract.

The Group determines the classification of its financial assets after initial recognition and, where allowed or appropriate, reevaluates this designation at each financial year-end.

All acquisition or sale transactions related to financial assets on `standard terms` are recognized at the transaction date, i.e. at the date when the Group undertakes an obligation to acquire an asset. Acquisition or sale transactions on `standard terms` mean acquisition or sale of financial assets that requires to supply an asset within the term determined by legislation or rules accepted in a certain market.

Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in the active market. Such assets are reflected at amortized cost using the effective interest method after their initial evaluation. Amortized cost is calculated taking into account all discounts or bonuses that arose at acquisition and includes commissions being an integral part of the efficient interest rate as well as transaction costs. Gains and expenses are recognized in the statement of comprehensive income when assets are derecognized or impaired, as well as through the amortization process.

After initial recognition, extended loans are measured at fair value of the funds granted that is determined using the effective market rate for such instruments, if they materially differ from the interest rate on such loan granted. In future loans are measured at amortized cost using the effective interest rate method. Difference between the fair value of the funds granted and loan reimbursement amount is reported as interest receivable during the whole period of the loan. Amortized cost is calculated taking into account all transaction expenses and discounts or bonuses that arose at repayment.

Loans that mature more than 12 months after the consolidated statement of financial position date are included into non-current assets.

Cash and cash equivalents comprise cash balances and call deposits with original maturities of three months or less. Bank overdrafts that are repayable on demand and form an integral part of the Group's cash management are included as a component of cash and cash equivalents for the purpose of the consolidated statement of cash flows.

Investments held-to-maturity

If the Group has the positive intent and ability to hold debt securities to maturity, then such financial assets are classified as held-to-maturity. Held-to-maturity financial assets are recognized initially at fair value plus any directly attributable transactions costs. Subsequent to initial recognition held-to-maturity financial assets are measured at amortized cost using the effective interest method, less any impairment losses. Any sale or reclassification of a more than insignificant amount of held-to-maturity investments not close to their maturity would result in the reclassification of all held-to-maturity investments as available-for-sale, and prevent the Group from classifying investment securities as held-to-maturity for the current and the following two financial years.

Fair value

The Group disclose the classification of financial assets and financial liabilities measured at fair value using a fair value hierarchy that reflects the significance of the inputs used in making the fair value measurement. The fair value hierarchy has the following levels:

- quoted prices (unadjusted) in active markets for identical assets or liabilities (Level 1);
- inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices) (Level 2); and
- inputs for the asset or liability that are not based on observable market data (unobservable inputs) (Level 3).

The level in the fair value hierarchy within which the financial asset or financial liability is categorized is determined on the basis of the lowest level input that is significant to the fair value measurement. Financial assets and financial liabilities are classified in their entirety into only one of the three levels.

The estimated fair value of financial instruments and liabilities is determined by reference to market information using appropriate methods of evaluation. However, a qualified opinion would be necessary to interpret marketing information for the purpose of fair value estimation. Correspondingly, at evaluation it is not necessary to indicate the estimated realization amount. Using different marketing assumptions and/or valuation techniques might affect the fair value significantly.

The estimated fair value of financial assets and financial liabilities is determined using the discounted cash flows model and other appropriate valuation methods at the year-end; it does not indicate the fair value of such instruments at the reporting date of these consolidated financial statements. Such estimations do not report any bonds or discounts that might result from the proposal to sell simultaneously the whole package of certain financial instruments of the Group. The fair value estimation is based on assumptions as to future cash flows, current economic situation, risks inherent to various financial instruments and other factors.

The fair value estimation is based on existing financial instruments without any attempts to determine the cost of an expected futures transaction and the cost of assets and liabilities not considered to be financial instruments. Besides, tax ramification (branching) related to realization of non-realized profit and loss might impact the fair value estimation and therefore was not accounted for in these consolidated financial statements.

Financial assets and financial liabilities of the Group include cash and cash equivalents, receivables and payables, other liabilities and loans. Accounting policy as to their recognition and evaluation are presented in the relevant sections of these notes.

During the reporting period the Group did not use any financial derivatives, interest swaps or forward contracts to reduce currency or interest risks.

Fair value of biological assets

Due to the absence of an active market as defined by International Accounting Standard IAS 41 Agriculture, the fair value of biological assets is estimated by present valuing the net cash flows expected to be generated from the assets discounted at a current market-determined pre-tax rate.

Fair value of agricultural produce

Management estimates the fair value of agricultural produce not sold at the end of reporting period by reference to quoted prices in an active market, as required by International Accounting Standard IAS 41. In addition, costs to sell at the point of harvest are estimated and deducted from the fair value. The fair value less costs to sell becomes the carrying value of inventories at the date of harvesting.

Non-derivative financial liabilities

At initial recognition financial liabilities can be attributed to those estimated at fair value through profit and loss, if the following criteria are met: (i) attributing to this category excludes or materially reduces inconsistency in accounting methods that might otherwise arise at liability assessment or recognition of profit or loss related to such liability; (ii) liabilities comprise a part of financial liability group that is being managed and results of which are assessed at fair value in compliance with risks management policy; (iii) financial liability includes an embedded derivative that should be reported separately in the consolidated financial statements.

As at 31 December 2019 the Group had no financial liabilities that could be attributed to those estimated at fair value through profit and loss. Trade payables and other short-term monetary liabilities, which are initially recognized at fair value, subsequently carried at amortized cost using the effective interest method. Interest bearing liabilities are subsequently measured at amortized cost using the effective interest rate method, which ensures that any interest expense over the period to repayment is at a constant rate on the balance of the liability carried in the consolidated statement of financial position.

Interest expense in this context includes initial transaction costs and discount payable on redemption, as well as any interest or coupon payable while the liability is outstanding.

Impairment of Financial Assets

The Group assesses at each reporting date whether there is any objective evidence that a financial asset or a group of financial assets is impaired.

Assets reported at amortized cost

If there is objective evidence that an impairment loss has been incurred in loans and accounts receivable that are reported at amortized cost, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future expected credit losses that have not yet been incurred) discounted at initial effective interest rate for such financial asset (i.e. at the effective interest rate calculated at initial recognition). The carrying amount of the asset is reduced directly or using the reserve. The loss amount is recognized in the statement of comprehensive income.

The Group first assesses individually whether objective evidence of impairment exists individually for financial assets that are individually significant, or collectively for financial assets that are not individually significant. If the Group determines that no objective evidence of impairment exist for an individually assessed financial asset, whether significant or not, it includes the asset into a group of financial assets with similar credit risk characteristics and collectively assesses them for impairment. Assets that are individually assessed for impairment and for which an impairment loss is, or continues to be, recognized are not included in a collective assessment of impairment.

If, in a subsequent year, the amount of the estimated impairment loss decreases because of an event occurring after the impairment was recognized, the previously recognized impairment loss is recovered. Any subsequent loss recovery is recognized in the statement of comprehensive income in the amount that the carrying amount of an asset should not exceed its amortized cost at the recovery date.

Provision for impairment loss is created in receivables in case there is objective evidence (e.g. a possibility of the debtor's insolvency or other financial difficulties) that the Group might not gain all amounts due to the delivery terms. Carrying amount of receivables is then reduced through the allowance account. Impaired debts are derecognized as soon as they are considered to be bad.

Financial investments available for sale

Impairment losses on available for sale investments are recognized by transferring the cumulative loss that has been recognized in other comprehensive income, and presented in the fair value reserve in equity, to profit or loss. The cumulative loss that is removed from other comprehensive income and recognized in profit or loss is the difference between the acquisition cost, net of any principal repayment and amortization, and the current fair value, less any impairment loss previously recognized in profit or loss. Changes in impairment provisions attributable to time value are reflected as a component of interest income.

Interest-bearing loans and borrowings. All loans and borrowings are initially recognized at the fair value of the cash amount received less loan related costs.

After initial recognition, interest-bearing loans and borrowings are subsequently measured at an amortized cost using the effective interest rate method. Gains and losses are recognized in net profit or loss when liabilities retired, as well as through the amortization process.

Trade and other payables. Trade and other payables are recognized and initially measured under the policy for financial instruments mentioned above. Subsequently, instruments with a fixed maturity are re-measured at amortized cost using the effective interest rate method. Amortized cost is calculated by taking into account any transaction costs and any discount or premium on settlement. Financial liabilities which do not have a fixed maturity are subsequently carried at fair value.

Leases. The Group leases certain property, plant and equipment. Leases of property, plant, and equipment where the Group has substantially all the risks and rewards of ownership are classified as finance leases. Finance leases are capitalized at the lease's commencement at the lower of the fair value of the leased property and the present value of the minimum lease payments. Each lease payment is allocated between the liability and finance charges so as to achieve a constant rate on the finance balance outstanding. The corresponding rental obligations, net of finance charges, are included in other long-term payables. The interest element of the finance cost is charged to the statement of comprehensive income over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period. The property, plant and equipment acquired under finance leases are depreciated over the useful life of the asset.

Contingencies. Contingent liabilities are not recognized in the consolidated financial statements unless it is probable that an outflow of economic resources will be required to settle the obligation and it can be reasonably estimated. They are disclosed unless the possibility of an outflow of resources embodying economic benefits is remote.

Provisions. Provisions are recognized when the Group has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. Where the Group expects some or all provisions to be reimbursed, for example under an insurance contract, the reimbursement is recognized as a separate asset but only when the reimbursement is virtually certain. The expense relating to any provision is presented in the statement of comprehensive income net of any reimbursement. If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, where appropriate, the risks specific to the liability. Where discounting is used, the increase in the provision due to the passage of time is recognized as finance costs.

Employee Benefits. Wages, salaries, contributions to the state pension and social insurance funds, paid annual and sick leave, bonuses and non-monetary benefits are accrued in the period when the associated services are rendered by the employees of the Company.

Revenue and expense recognition. Revenue is recognized when the title of the product passes to the customer and it is probable that the economic benefits associated with the transaction will flow to the Group and the amount of the revenue can be measured reliably.

The cost of products sold is recognized at the same time as the corresponding revenue.

Revenue from services rendering under the operating lease is stated in the reporting period when such services were rendered after completion certain transaction estimated on the basis of factual rendered services proportionally to a full scope of services that are to be rendered.

Expenses are accounted for when incurred and reported in the statement of comprehensive income in the period to which they relate.

Income taxes

Current tax

Current tax assets and liabilities for the current and prior years are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted by the reporting date.

Deferred tax

Deferred income tax is provided using the consolidated statement of financial position liability method on temporary differences at the reporting date- between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

Deferred income tax liabilities are recognized for all taxable temporary differences, except for:

Where the deferred income tax liability arises from the initial recognition of goodwill or of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss; and

- In respect of taxable temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, where the timing of the reversal of the temporary differences can be controlled by the parent company and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred income tax assets are recognized for all deductible temporary differences, carry-forward of unused tax credits and unused tax losses, to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry-forward of unused tax credits and unused tax losses can be utilized except for:

- where the deferred income tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the-transaction, affects neither the accounting profit nor taxable profit or loss; and
- in respect of deductible temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, deferred income tax assets are recognized only to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilized.

The carrying amount of deferred income tax assets is reviewed at each consolidated statement of financial position date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred income tax assets to be utilized. Unrecognized deferred income tax assets are reassessed at each consolidated statement of financial position date and

recognized to the extent that it has become probable that future taxable profit will allow the deferred income tax asset to be realized.

Deferred income tax assets and liabilities are measured at the tax rates that are expected to apply to the year when the asset is realized or the liability is settled, based on tax rates and tax laws that have been enacted or (substantively enacted) at the consolidated statement of financial position date. Income tax relating to items recognized directly in net assets attributable to participants is recognized in the net assets attributable to participants and not in the statement of comprehensive income. Deferred income tax assets and deferred income tax liabilities are offset, if a legally enforceable right exists to set off current tax assets against current tax liabilities and they relate to income taxes imposed by the same taxation authority on the same entity.

Loans provided. Loans provided are accounted for at an amortized cost using the effective interest rate method.

Trade and other accounts receivable. Trade and other receivables are stated at an amortized cost using the effective interest rate method. Provisions in respect to non-recoverable amounts estimated as difference between carrying amount of assets and current value of future cash flows discounted using the effective interest rate calculated at initial recognition, are stated in the statement of comprehensive income, if any impairment evidences of assets are available.

Cash and cash equivalents. Cash and cash equivalents include cash in banks and cash desks, bank deposits and short term investments with maturity up to three months that can be easily converted to respective cash funds and have insignificant risk of their cost change.

Foreign currency

Functional and presentation currency

Items included in these financial statements of each of the Group's entities are measured in the currency that applies to the primary economic environment in which the entities operate (the functional currency). The consolidated figures are presented in euros (EUR), the Group's reporting currency. The group has decided to use euro as the presentation currency because of the listing at the Warsaw Stock Exchange.

Foreign currency transactions

Foreign currency transactions are translated into the functional currency of Group's entities using the exchange rates prevailing at the dates of the transactions or valuation where items are re-measured. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at the statement of financial position date exchange rates of monetary assets and liabilities denominated in foreign currencies are recognized in the statement of comprehensive income. Foreign exchange gains and losses that relate to borrowings are presented in the statement of comprehensive income within "finance income" or "finance expenses" on net basis. All other foreign exchange gains and losses are presented in the statement of comprehensive income within "Other income/(expenses), net".

Non-monetary assets and liabilities carried at historical cost are retranslated at the rates prevailing at the dates of the transactions. Non-monetary assets and liabilities carried at fair value are retranslated at the rates prevailing at the date when the fair values were determined. Foreign currency differences arising on retranslation are recognized in the statement of comprehensive income, except for differences arising on the retranslation of property revaluation under IAS 16 which are recognized in other comprehensive income.

Foreign operations

The financial statements of subsidiaries and associates are prepared in their functional currencies, which are determined based on the primary economic environment in which they operate.

Upon consolidation, the assets and liabilities of foreign operations are translated to euro at exchange rates at the statement of financial position date. The income and expenses of foreign operations are translated to euro at average exchange rate (unless this average is not a reasonable approximation of the cumulative effect of the rates prevailing on the transaction dates, in which case income and expenses are translated at the dates of the transactions).

Foreign currency differences are recognized in other comprehensive income and are presented within equity in the translation reserve. When a foreign operation is disposed of, in part or in full, the relevant amount in the translation reserve is transferred to the statement of comprehensive income.

The EUR exchange rates used in the preparation of these consolidated financial statements are as follows:

	USD	UAH	RUB	PLN
Average for year ended 31 December 2019	1.1195	28.9397	72.5213	4.2980
As at 31 December 2019	1.1234	26.6091	69.3406	4.2585
Average for year ended 31 December 2018	1.1810	32.1135	73.9546	4.2623
As at 31 December 2018	1.1450	31.7031	79.4605	4.3000

Value added tax (VAT). VAT during sale should be paid to the tax authorities as payments from customers are received. VAT paid during acquisition of goods and services is to be deducted to VAT received during sale, when payment is made for purchased goods and services. Tax authorities allow offsetting VAT. VAT in respect of acquisitions and sales, when settlement is completed at the statement of financial position date (deferred VAT) is stated in the statement of financial position by separate amounts as current assets or liabilities. If the provision was formed to doubtful receivables, this provision is reported in full scope including VAT. Deferred liability on VAT is still being recognized in the financial accounting until receivables are repaid or written off in order provided by the Ukrainian financial accounting rules. Refer to the note 9 for the disclosure of VAT receivable.

Dividend distribution. Dividend distribution to the Company's shareholders is recognized as a liability in the Group's financial statements in the period in which the dividends are approved by the company's shareholders on general meeting. Amount of the Group's retained earnings that under the current legislation can be transferred to allocation between shareholders, is calculated on the basis of respective financial statements of separate entities of the Group prepared under NAS. These amounts might differ significantly from those calculated under IFRS.

3 Significant accounting estimates and judgments

The preparation of the financial statements requires the management to make various estimations and assumptions that affect reporting values of the assets and liabilities as well as disclosure of information on contingent assets and liabilities at the statement of financial position date. Actual results might differ from the current estimations. The estimations are periodically reviewed. Should adjustments be needed they are reported in the financial results of the period when they became aware.

Below are the main assumptions as to future events and other sources of uncertainties of estimates at the reporting dates that are of a great risk of the necessity to make significant adjustments to the carrying amount of assets and liabilities during the next reporting year:

Impairment of property, plant and equipment. Detection of impairment indications of property, plant and equipment provides for use of estimates that include, in particular, reasons, terms and amounts of the impairment. Impairment is based upon the analysis of many factors, such as: changes in current competitive conditions, expectations of an industry recovery, capital appreciation, changes in possibilities of future financing attraction, technological obsolescence, servicing suspension, current replacement cost and other changes in circumstances that indicate the impairment.

Management's estimates are required in order to determine the compensation amount for a cash generating unit. The value in use estimation includes methods based on the estimation of expected future discounted cash flows. This requires the Group to evaluate these cash flows for cash generating units and choose a grounded discount rate to calculate a present value of cash flows.

The estimations including the applied methodology may have significant effect on the fair value and impairment amount of property, plant and equipment. Additional information is disclosed in notes 10 and 11.

Biological assets. Due to the absence of an active market, the fair value of biological assets is estimated by present valuing the net cash flows, estimated future cash flows are based on management's best estimates using a discount rate representing a market rate at the reporting date for an instrument with similar terms and conditions. Where pricing models are used, inputs are based on market related measures at the statement of financial position date. Additional information is disclosed in note 13.

Provision for doubtful accounts receivable. Provision for doubtful debts is charged based on factual data about accounts receivable payment and the solvency analysis of the most significant debtors. In case of worsening the clients' financial position, a factual losses volume may exceed an estimated one. Additional information is disclosed in note 7.

Legal actions. The Group's management applies significant judgments during the estimation and recognition of provisions and risks of contingent liabilities associated with existing legal actions and other unsettled claims that should be settled by way of negotiations, mediation, arbitration or state interference as well as other contingent liabilities. The management's judgment is essential during the possibility of a claim settling as regards the Group or material obligations and during the determination of a possible amount of final settlement. Due to the uncertainty inherent to the estimation process, actual expenses may differ from the initial estimation of provision. These previous estimations may vary as new information becomes available, mainly, from the Group's specialists, if any, or from outside consultants, such as actuaries or lawyers. A review of these estimations may have a substantial impact on future operating results. Additional information is disclosed in note 30.

4 Segment information

The management has determined the operating segments based on reports reviewed by the Board of Directors that are used to make strategic decisions.

The Board considers the business from both a geographic and product perspective. Geographically, management considers the performance of business in Ukraine, Russia, Poland and the Netherlands. The Netherlands segment does not meet the quantitative threshold required by IFRS 8 and is not reported.

Ukraine, Russian and Poland segments are further segregated in the following main reportable segments:

- *Cheese&butter.* This segment is involved in production and distribution of cheese and butter. This segment generated 33% (2018: 38%) of the Group's revenue;
- *Whole-milk.* This segment is involved in production and distribution of whole-milk products. This segment generated 46% (2018: 49%) of Group's revenue;
- *Ingredients* include production and distribution of dry milk, agricultural products, and other products, which - although contributing a relatively small amount of revenue to the Group, are monitored by the Board of Directors as well.

The Board of Directors assesses the performance of the operating segments based on a measure of EBITDA. This measurement basis excludes the effects of non-recurring expenditure from the operating segments such as restructuring costs, legal expenses, non-current assets impairments and other income and expenses resulted from an isolated, non-recurring event.

As information on segment assets and liabilities are not reported to the Board of Directors, this is not disclosed in these financial statements.

Inter-segment sales are priced along the same lines as sales to external customers, with an appropriate discount being applied to encourage use of group resources at a rate acceptable to local tax authorities. This policy was applied consistently throughout the current and prior period.

The segment information by country for the year ended 31 December is as follows:

	2019				2018			
	Russia	Ukraine	Poland	Total	Russia	Ukraine	Poland	Total
Total segment revenue	72,062	49,831	3,888	125,781	79,987	40,679	12,084	132,750
Inter-segment revenue	-	(6)	(14)	(20)	-	-	(155)	(155)
Revenue from external customers	72,062	49,825	3,874	125,761	79,987	40,679	11,929	132,595
EBITDA	1,253	592	(1,340)	505	514	1,622	(401)	1,735
EBITDA margin	2%	1%	-35%	0%	1%	4%	(3%)	1%
Depreciation and amortization	780	5,529	1,249	7,558	1,610	6,965	1,670	10,245

Inter-segment revenue is related to inter-group sales of dairy goods, mainly cheese, produced in Ukraine to be sold in the Russian market to third party customers. The segment information by product for the year ended 31 December is as follows:

	2019				2018			
	Cheese & butter	Whole-milk products	Ingredients	Total	Cheese & butter	Whole-milk products	Ingredients	Total
Total segment revenue	42,105	57,636	26,040	125,781	50,745	64,746	17,259	132,750
Inter-segment revenue	-	-	(20)	(20)	-	-	(155)	(155)
Revenue from external customers	42,105	57,636	26,020	125,761	50,745	64,746	17,104	132,595
EBITDA	719	591	(805)	505	2,017	(740)	458	1,735
EBITDA margin	2%	1%	-3%	0%	4%	(1%)	3%	1%
Depreciation and amortization	3,082	1,719	2,757	7,558	4,853	2,586	2,806	10,245

A reconciliation of EBITDA to profit before tax:

	2019	2018
EBITDA	505	1,735
Other segments EBITDA	80	377
Total segments	585	2,112
Depreciation and amortization	(7,558)	(10,245)
Loss from disposal and impairment of non-current assets	(13,465)	(1,989)
Finance expenses	(18,071)	(10,274)
Finance income	8,104	227
Loss before tax	(30,405)	(20,169)

5 Balances and transactions with related parties

For the purposes of these financial statements, parties are considered to be related if one party has the ability to control the other party, is under common control or can exercise significant influence over the other party in making financial or operational decisions as defined by IAS 24 “Related Party Disclosures”. During the reporting period the company had related party transactions with ultimate shareholder, key management and companies under common control.

Group’s transactions with its related parties for the years ended 31 December were as follows:

<i>Entities under common control:</i>	<u>2019</u>	<u>2018</u>
Administrative expenses	-	-

The outstanding balances due from related parties as of 31 December were as follows:

	Balance at	Transactions value	Balance at
<i>Entities under common control:</i>	<u>2019</u>	<u>2019</u>	<u>2018</u>
Trade accounts receivable	50	-	50
Other financial assets:	-	(249)	249
Other accounts receivable	1,700	273	1,427
Total trade and other receivable	<u>1,750</u>	<u>(24)</u>	<u>1,726</u>
Other accounts payable	180	(389)	569
Total trade and other payable	<u>180</u>	<u>(389)</u>	<u>569</u>

Key management compensation

Key management includes Board of Directors. The short-term employee benefits paid or payable to key management for employee services is EUR 170 thousand (2018: EUR 170 thousand).

6 Cash and cash equivalents

Cash in bank is available for demand and earns interest at floating rates based on daily bank deposit rates.

	<u>31 December 2019</u>	<u>31 December 2018</u>
Short term deposits	-	-
Cash in bank and cash on hand	2,355	334
Total cash and cash equivalents	<u>2,355</u>	<u>334</u>

An analysis of the Group's cash and cash equivalents by currency is provided in note 32.

7 Trade and other accounts receivable

	31 December 2019	31 December 2018
Trade accounts receivable	15,311	10,325
Other financial assets	11,841	10,512
Allowance for doubtful debts	(10,918)	(10,300)
Total financial assets within trade and other receivables	16,234	10,537
Advances issued	1,950	1,836
Advances issued for non-current assets	2	204
Other receivables	36,485	7,464
Allowance for doubtful debts	(681)	(869)
Total trade and other accounts receivable	53,990	19,172

As at 31 December 2019 trade receivables of EUR 2,167 thousand (2018: EUR 3,257 thousand) were past due. Total trade accounts receivable are individually determined and to be impaired in the amount of EUR 10,300 thousand (2017: EUR 8,960 thousand). Based on historic information, that includes past due period and estimated recoverability value, the Group creates the allowance for doubtful debts against trade receivables past due.

The other accounts receivable include EUR 1,700 thousand (2018: EUR 1,427 thousand) due from related parties.

The analysis of credit quality of trade and other financial receivables is as follows:

	31 December 2019		31 December 2018	
	Trade receivables	Other financial receivables	Trade receivables	Other financial receivables
Customers with no history of default	13,144	3,090	7,068	2,306
Total current and not impaired	13,144	3,090	7,068	2,306
Individually determined to be impaired				
- less than 30 days overdue	241	-	713	-
- 30 to 60 days overdue	36	-	47	-
- 60 to 90 days overdue	11	-	14	-
- 90 to 360 days overdue	51	-	67	-
- over 360 days overdue	1,829	453	2,416	599
Special impairment provision	-	8,298	-	7,607
Total individually determined to be impaired	2,167	8,751	3,257	8,206
Less impairment provision	(2,167)	(8,751)	(2,094)	(8,206)
Total	13,144	3,090	8,231	2,306

Management have assessed the credit quality of clients which whom the Group have outstanding balances and have come to the conclusion the credit quality is mostly depended on the current economic and political crisis. In cases where credit quality is poor management have made a provision.

According to the National Bank of Ukraine Resolution dated 28 August 2015 № 562 "On revocation of the banking license and liquidation of PJSC" UKRAINIAN PROFESSIONAL BANK "executive directorate of the Deposit Guarantee made a decision № 158 regarding "The beginning of procedure of liquidation JSC" UKRAINIAN PROFESSIONAL BANK".

As at 31 December 2019 Other financial assets include balances previously classified as Deposits in PJSC UKRAINIAN PROFESSIONAL BANK in the amount of EUR 8,061 thousand (2018: EUR 6,767 thousand) for which 100% allowance for doubtful debts was accrued.

The carrying amounts of the Group's trade and other receivables approximate their fair value. Maximum exposure to credit risk at the reporting date is the carrying value of each class of receivable.

Movements on the group provision for impairment of trade receivables are as follows:

	<u>2019</u>	<u>2018</u>
Balance 1 January	2,094	1,996
Provided by during the year	56	74
Unused amount reversed	-	-
Receivable written off during the year as uncollectible	(25)	(33)
Exchange difference	42	57
Balance 31 December	2,167	2,094

The movement on the provision for impaired receivables has been included in other expenses, net line in the consolidated statement of comprehensive income.

Other classes of financial assets included within trade and other receivables do not contain impaired assets.

An analysis of the Group's trade and other receivables classified as financial assets by currency is provided in note 32.

The Group does not hold any collateral as security.

8 Inventories

	<u>31 December 2019</u>	<u>31 December 2018</u>
Raw and other materials	4,121	4,744
Finished goods and work in progress	7,208	4,919
Agriculture produce	367	415
Total inventories	11,696	10,078

At 31 December 2019 bank borrowings are secured on inventories the value of EUR 450 thousand (2018: 3,526 thousand) (note 16).

As at 31 December 2019 inventories are stated net of provision for obsolescence at the amount of EUR 231 thousand (2018: EUR 269 thousand).

9 Other taxes receivable

	<u>31 December 2019</u>	<u>31 December 2018</u>
VAT recoverable	6,796	5,932
Payroll related taxes	106	80
Other prepaid taxes	(2)	105
Total other taxes receivable	6,900	6,117

VAT receivable as at 31 December 2019 is shown net of provision at the amount of EUR 6,796 thousand (31 December 2018: EUR 5,932 thousand).

10 Goodwill

	<u>2019</u>	<u>2018</u>
Balance at 1 January	1,300	1,474
Foreign currency translation	250	(174)
Balance at 31 December	<u>1,550</u>	<u>1,300</u>

Goodwill is initially recognized as an asset during the primary evaluation. As the goodwill relates to foreign subsidiaries, it is translated each year as part of the translation of the foreign operation.

Goodwill has been allocated for impairment testing purposes to the following cash-generating units:

- Milk production operations - represented by Ostankino Dairy Company located in Russia.
- Agricultural operations - represented by four agricultural companies located in Ukraine that were purchased by the Group during the years ended 31 December 2012 and 2013.

The carrying amount of goodwill was allocated to cash-generating units as follow:

	<u>31 December 2019</u>	<u>31 December 2018</u>
Milk production operations	1,427	1,197
Agricultural operations	123	103
	<u>1,550</u>	<u>1,300</u>

Impairment test for goodwill

Impairment testing of goodwill is performed annually.

The recoverable amounts of the cash-generating units are based on value in use calculations based on cash flow projections from formally approved budgets covering a five year period to 31 December 2019.

Management determined budget revenues based on past performance and its expectation of market development. Discount rates used are pre-tax and reflect specific risks relating to the relevant operating segments. Management expectations and other input to the calculation such as discount rate, market size and market shares reflect the current economic climate and market developments relevant to the segments.

The values assigned to the key assumptions represent management's assessment of future trends in the business and are based on both external and internal sources.

The outcome of the impairment tests is that the recoverable amounts exceed the carrying amounts of the cash-generating units and accordingly no impairment charge has been recorded in 2019 and in 2018. In addition to the impairment test, the principal assumptions were subject to sensitivity analyses, which led to the conclusion that no impairments would arise from reasonable possible changes in a key assumption.

11 Property, plant and equipment and intangible assets

	Land and Buildings	Plant and equipment	Other assets	Constructi ons in progress	Intangible assets	Total
At 1 January 2018						
Revalued cost	72,874	28,433	5,946	3,598	3,303	114,154

Net book value	60,391	11,843	3,634	5,847	1,569	83,284

Weighted average cost of capital (WACC) for Ukrainian production assets impairment was calculated using the following most significant variables:

- Country risk at the rate of 6.2%
- Equity risk Premium at the rate of 4.1%
- Cost of Debt for Ukrainian Hryvnia at the rate of 15.1%

The calculation resulted with WACC at the level of 13.9%.

At 31 December 2019 bank borrowings are secured on properties for the value of EUR 79,766 thousand (2018: EUR 69,477 thousand) (note16).

At 31 December 2019 bank borrowings are secured on Intangible assets the value of EUR 271 thousand (2018: EUR 224 thousand).

At 31 December 2019 the gross carrying value of fully depreciated property, plant and equipment is EUR 3,490 thousand (2018: EUR 3,878 thousand).

12 Investment property

	Land and buildings	Constructions in progress	Total
Year ended 31 December 2019			
Opening balance value	12,860	5,210	18,070
Disposals	(1,015)	(3,315)	4,330
Closing balance value	11,845	1,895	13,740
At 31 December 2019			
	Land and buildings	Constructions in progress	Total
Year ended 31 December 2018			
Opening balance value	11,870	4,862	16,732
Net gains or losses from FV adjustments	990	348	1,338
Closing balance value	12,860	5,210	18,070
At 31 December 2018			

At 31 December 2019, there were no restrictions on the realization of investment property or the remittance of income and proceeds of disposal (2018: none).

There are no contractual obligations to purchase, construct or develop investment property for repairs, maintenance or enhancements on responding year.

The investment property was passed through appraisal on 31 December 2019 using multiple appraisal methods, including cost and income based approaches, carried out by external independent qualified appraisal companies with recent professional experience in the locations of the Group business.

The fair value of the investment property has not been adjusted significantly for the purposes of financial reporting. The fair value of investment property is categorized as a level 3 recurring fair value measurement.

13 Biological assets

The Group is engaged in agricultural activities mainly for the following purposes:

- Development of livestock in order to create own base for raw milk supply.
- Grow of maize and winter wheat, with the main purpose to sale to the external customers
- Grow fodder cultures.

Non-current cattle are represented by dairy livestock with an average yearly lactation period of nine months. Current cattle comprise immature cattle and cattle intended for sale.

To estimate the fair value of biological assets, a valuation, which conforms to International Valuation Standards, was performed by the Group, fair value is estimated as the present value of the net cash flows expected to be generated from biological assets discounted at a current market discount rate.

Fair values of biological assets were based on the following key assumptions:

- crops are accounted on historical costs. As for now the Company restores plant growing for fodder with growth cycle about 5 years;
- Dairy cattle are accounted on the minimum amount of
 - 1) projected discounted cash flows based on the expected milk produced during their productive life after the reporting date and expected volume of meat at the date of slaughter;
 - 2) actual market price updated quarterly for the same biological assets;
- the average productive life of a cow is determined based on internal statistical information and stated as 8 years for milk producing forecast purposes;
- comparative prices for milk and meat are obtained from market resources as at the end of the reporting period;
- pre-tax discount rate of 13,5% is applied in determining fair value of biological assets. The discount rate was applied given the discount rate stated by the NBU effective at the reporting date.

The key assumptions represent management's assessment of future trends in agriculture and cattle farming business and are based on both external and internal sources of data.

As at 31 December biological assets comprise the following groups:

	31 December 2019		31 December 2018	
	Units	Amount	Units	Amount
Current biological assets of animal breeding				
Cattle	2,092	1,092	2,955	1,343
Other	-	-	-	-
	2,092	1,092	2,955	1,343
Current biological assets of plant growing	Hectares	Amount	Hectares	Amount
Other	-	1,509	-	-
	-	-	-	-
Total current biological assets	2,092	2,601	-	1,343
Non-current biological assets	Units	Amount	Units	Amount
Cattle	1,905	1,525	1,888	1,937
Other livestock		1	7	1
	1,905	1,526	1,895	1,938

Changes in key assumptions used to estimate biological assets would have the following effect on biological assets as at 31 December 2019 and 2018:

	<u>2019</u>	<u>2018</u>
1 % increase in discount rate	1	1
1 % decrease in discount rate	<u>(1)</u>	<u>(1)</u>
10 % increase in price for milk	(1)	(3)
10 % decrease in price for milk	<u>2</u>	<u>21</u>
10 % decrease (increase) in price for meat	(18)	(136)
10 % increase (decrease) in price for meat	<u>18</u>	<u>124</u>

Law elasticity on milk price changes is due to the fact that most of the cows are accounted at the market price as the less amount comparatively to discounted cash flows (DCF) of expected milk and meat sales revenue.

The following represents the changes during the year ended 31 December 2019 and 31 December 2018 in the carrying amounts of non-current and current biological assets:

	<u>Current biological assets of animal breeding</u>	<u>Current biological assets of plant growing</u>	<u>Non-current biological assets</u>

Risk management in agricultural business

The Group is exposed to a number of risks related to its biological assets:

Price fluctuation risk

The Group is exposed to financial risks arising from changes in wheat, barley and milk prices. The Group does not anticipate that prices for its main products will decline significantly in the foreseeable future and, therefore, has not entered into derivative or other contracts to manage the risk of a decline in prices. Management reviews its outlook for prices regularly in considering the need for active financial risk management.

Climate and other risks

Biological assets are exposed to the risk of damage from climatic changes, diseases, fires and other natural forces. The Group has extensive processes in place aimed at monitoring and mitigating those risks, including regular field and farm inspections and industry pest and disease surveys.

14 Trade and other payables

	31 December 2019	31 December 2018
Trade payables	25,081	17,129
Accounts payable for fixed assets	16	42
Interest payable	26,718	20,301
Other financial payables	81	-
Total financial liabilities within trade and other payable	51,896	37,472
Wages and salaries payable	2,469	1,824
Advances received	11,066	3,858
Other accounts payable	32,203	9,865
Accruals for employees' unused vacations	950	952
Total trade and other payables	98,584	53,971

Financial liabilities are normally settled within 60-days period.

The fair values of trade and other accounts payable approximate their carrying amounts.

An analysis of the Group's trade and other payables classified as financial liabilities by currency is provided in note 32.

15 Other taxes payable

	31 December 2019	31 December 2018
VAT payable	1,742	130
Payroll related taxes	3,904	3,414
Other taxes payable	3,141	1,527
Total other taxes payable	8,787	5,071

16 Interest bearing loans and borrowings

	31 December 2019	31 December 2018
Current		
Interest bearing loans due to banks	75,593	81,843
Loans from non-financial institutions	-	-
Bank overdrafts	-	12
Finance leases	1,615	1,570
Total current borrowings	77,208	83,425
Non-current		
Interest bearing loans due to banks	1,850	2,497
Finance leases	8	33
Total non-current borrowings	1,858	2,530
Total borrowings	79,066	85,955

At 31 December 2019 current borrowings of the Group stood at EUR 79.1 million. Out of this amount, bank loans in the amount of EUR 1,328 thousand (2018: EUR 1,321 thousand) are classified as a short-term as a part of the indebtedness of the Group under long-term credit lines from several banks, which is due in 2019.

As at 31 December 2019, the Group has not met requirement in respect of covenants to syndicate loan stated in Note 31. Management has finished the loan restructuring negotiation with lenders as at the date of these financial statements approval. The total sum of the Group's indebtedness to syndicate as at 31 December 2019 stood at EUR 52,145 thousand, including an overdue amount of EUR 52,145 thousand is classified as current interest bearing loans due to banks (note 16).

The exposure of the Company's borrowings to interest rate changes and the contractual repricing dates at 31 December are as follows:

	2019	2018
6 months or less	75,880	72,515
6-12 months	1,328	10,910
1-3 years	1,505	1,740
3-5 years	352	790
	79,066	85,955

Principal terms and the debt repayment schedule of the Group's loans and borrowings as at 31 December are as follows:

	31 December 2019					31 December 2018				
	USD	UAH	RUB	PLN	Total	USD	UAH	RUB	PLN	Total
12 months or less										
Outstanding balance, thousand EUR	57,707	10,842	6,487	2,172	77,208	58,999	9,414	12,552	2,460	83,425
Average interest rate, %	9.02	4.43	14.51	1.62	8.63	9.54	3.44	15.23	1.67	9.47
1-5 years										
Outstanding balance, thousand EUR	1,850	-	7	-	1,858	2,370	-	160	-	2,530
Average interest rate, %	3.00	-	11.21	-	3.52	3.00	-	11.21	-	3.52

At 31 December 2019 bank borrowings are secured on properties, plant and equipment (note 11), inventories (note 8).

On March 20, 2019 Milkiland published an official statement that the Assignment agreement between Raiffeisen Bank International, as “the Agent”, and UniCredit Sp. A., as the “Existing Lender”, and Swestal Holding Ltd., as the “New Lender”, was signed on 13 March 2019 and came into force on 19 March 2019.

According to the Assignment agreement, the Existing Lender assigned absolutely to the New Lender all the rights of the Existing Lender under the Loan Facility Agreement with the Syndicate.

The New Lender also undertook the commitment of the Existing Lender comprising as of the date of Assignment agreement USD 29,290,000 of principal and all of the Existing Lenders rights, interest and liabilities under the Loan Facility Agreement and the related Finance Documents under this agreement.

On November 28, 2019 Milkiland published an official statement that the Assignment agreement between Raiffeisen Bank International, as “the Agent”, and AO Raiffeisenbank, as the “Existing Lender”, and Swestal Holding Ltd., as the “New Lender”, was signed on 18 November 2019 and came into force on the same date.

According to the Assignment agreement, the Existing Lender assigned absolutely to the New Lender all the rights of the Existing Lender under the Loan Facility Agreement with the Syndicate.

17 Share capital

Share capital as at 31 December is as follows:

	31 December 2019		31 December 2018	
	Number	EUR 000	Number	EUR 000
Authorized				
Ordinary shares of 10c each	50,000,000	5,000	50,000,000	5,000
Issued and fully paid up				
<i>Ordinary shares of 10c each</i>				
At beginning of the year	31,250,000	3,125	31,250,000	3,125
At end of the year	31,250,000	3,125	31,250,000	3,125

18 Revaluation reserve

The revaluation reserve arises on the revaluation of properties, plant and equipment. When revalued properties, plant and equipment are depreciated or sold, the portion of the revaluation reserve that relates to that asset is transferred directly to retained earnings. During 2019 EUR 8,582 thousand was transferred to retained earnings (2018: EUR 4,169 thousand).

19 Currency translation reserve

Exchange differences relating to the translation of the results and net assets of the Group`s foreign operations from their functional currencies to Group`s presentation currency are recognized directly in other comprehensive income and accumulated in the currency translation reserve.

20 Dividends per share

During the year ended 31 December 2019 the Group had not declared dividends. Last payment of dividends was made by the Group in 2014, the respective amount of payment stood at EUR 2,187 thousand (EUR 0.08 per ordinary share).

21 Revenue

Sales by product during the year ended 31 December was as follows:

	2019	2018
Cheese & Butter	42,105	50,745
Whole-milk products	57,636	64,746
Ingredients	26,020	17,104
Total revenue	125,761	132,595

Regional sales during the year ended 31 December was as follows:

	2019	2018
Russia	72,062	79,986
Ukraine (including export)	49,542	39,302
Poland	3,874	12,079
Other	283	1,228
Total revenue	125,761	132,595

22 Change in fair value of biological assets

Change in fair value of biological assets at the amount of EUR 1 thousand represents the revaluation of cattle at fair value less costs to sell. In 2018 change in fair value of biological assets at the amount of EUR 111 thousand was included in the cost of sales item without a separate presentation in the consolidated income statement.

The Group operates in several tax jurisdictions, depending on the residence of its subsidiaries (primarily in Ukraine, Russia and Poland). In 2019 Ukrainian corporate income tax was levied on taxable income less allowable expenses at the rate of 18% (2018: 18%), Russian profit tax was levied at the rate of 20% (2018: 20%), Poland profit tax was levied at the rate of 19% (2018: 19%). In 2019 the tax rate for Panama operations was 0% (2018: 0%) on worldwide income.

Reconciliation between the expected and the actual taxation charge is provided below.

	<u>2019</u>	<u>2018</u>
Profit/ (Loss) before taxation, including	(11,597)	(20,169)
Profit/ (Loss) of companies levied a single agricultural tax (Ukrainian operations)	340	291

Change in deferred income taxes resulting from reduction in tax rate	-	-
Provision in respect of irrecoverable deferred income tax asset	614	547
Tax effect of items which are permanently not deductible or assessable for taxation purposes	(3,166)	(3,186)
Income tax expense	(204)	84

At the existing Group's structure tax losses and current tax assets of one company cannot be offset against current income tax liabilities of another company. Correspondently, taxes may be accrued even if there is a net consolidated tax loss. Thus, deferred income tax assets of one company of the Group are not subject to offsetting against deferred income tax liabilities of another company of the Group. The deferred income tax liabilities and assets reflected in the consolidated statement of financial position as at 31 December are as follows:

	<u>2019</u>	<u>2018</u>
Deferred income tax liability	(11,033)	(11,054)
Deferred income tax asset	-	70
	<u>(11,033)</u>	<u>(10,984)</u>

Unrecognized deductible temporary differences, unused tax losses and unused tax credits.

As at 31 December 2018 Milkiland EU Sp. z o.o. has written off deferred tax assets in the amount of 2,740 thousand EUR. This amount was mostly presented by the tax losses from the prior periods. The company had a history of tax losses and the calculated deferred tax asset, net of deferred tax liabilities were mainly a result of prior period losses. Deferred tax assets write-off transaction was due to the five-year period of using the negative financial result of previous years.

The deductible temporary differences, unused tax losses, and unused tax credits for which no deferred tax asset is recognized in the statement of financial position presented below:

	<u>2019</u>	<u>2018</u>
Deductible temporary differences, unused tax losses and unused tax credits for which no deferred tax assets have been recognized are attributable to the following:		
- Tax losses (revenue in nature)	2,711	2,499
- Tax losses (capital in nature)		
- Unused tax credit		
- Deductible temporary differences		
Total	2,711	2,499

Differences between IFRS and the national tax legislations result in temporary differences between the carrying amount of assets and liabilities with the purpose to prepare financial statements and a tax basis for the income tax calculation. The following tables summarize the components of temporary differences that give rise to deferred income tax assets and liabilities:

	1 January 2019	Deferred income tax income or expense recognized in profit or loss	Deferred income tax expense recognized in other comprehensive income	Tax effect in revaluation of PPE	31 December 2019

Total deferred income tax assets and liabilities	(11,288)	41	(100)	363	(10,984)

Management assesses whether valuation allowances should be established against deferred tax assets based on consideration of all available evidence, both positive and negative. This assessment considers, among other matters, the nature, frequency and severity of recent losses, forecasts of future profitability, the duration of statutory carry forward periods, the experience with tax attributes expiring unused and tax planning alternatives. In making such judgments, significant weight is given to evidence that can be objectively verified. The Company's ability to realize deferred income tax assets depends on the ability to generate sufficient taxable income within the carry back or carry forward periods provided for in the tax law for each applicable tax jurisdiction.

As at 31 December 2019 deferred income tax assets are shown before provision for irrecoverable deferred income tax assets at the amount of EUR 2,139 thousand (2018: EUR 2,569 thousand).

30 Contingent and deferred liabilities

Litigation

The Group from time to time participates in legal proceedings. However, none of the legal proceedings either separately or in aggregate had significant negative material effect on the Group.

The legal proceedings of the Group have a negative increase tendency. During the last year the total credit indebtedness which should be collected from the companies of the Group was increased from EUR 2,947 thousand as 31 December 2018 to EUR 591 thousand as of 31 December 2019.

Taxation

The taxation system in the Russian Federation is relatively new and is characterized by frequent changes in legislation, official pronouncements and court decisions, which are often unclear, contradictory and subject to varying interpretations by different tax authorities. Taxes are subject to review and investigation by a number of authorities, which have the power to impose severe fines, penalties and interest charges. A tax year remains open for review by the tax authorities during the three subsequent calendar years; however, under certain circumstances a tax year may remain open longer. Recent events within the Russian Federation suggest that the tax authorities are taking a more assertive position in their interpretation and enforcement of tax legislation and it is possible that transactions and activities that have not been challenged in the past may be disputed.

The changes include, *inter alia*, the article 54.1 of Russian Tax Code with increasing attention and requirements to subcontractors relations in terms both of VAT and Profit tax calculations. Still there are no legal cases of applying the new approach to business.

These changes may create tax risks for the business in the Russian Federation.

Insurance policies

The Group applies reasonable approach to risk management and assets safeguarding and mitigate key risks with insurance services.

One of significant insurance contract covers Directors and Officers liability insurance for reimbursement for losses or advancement of defense costs in the event an insured suffers losses as a result of a legal action brought for alleged wrongful acts by Directors and Officers. The insurance contract signed with Allianz Global Corporate & Specialty SE with limit liability of EUR 25 million.

The Company also engaged in the other types of insurance contracts, including property, cargo and civil liability insurance.

The choice of the insurance services providers is usually made based at their high business reputation and rates.

31 Capital management policy

Main objectives of the Group's capital management policy are as follows: management of accounts receivable and payable, raw materials and finished goods stocks, as well as healthy capital structure.

The Group has external requirements to the capital in respect of Loan facility to the Syndicate and other loans received by the Company.

Borrowing, EBITDA, interest expenses and tangible net worth shall be calculated and interpreted on a consolidation basis in accordance with the IFRS and shall be expressed in EUR.

Capital structure of the Group as of 31 December:

	<u>2019</u>	<u>2018</u>
Total borrowings	79,065	85,955
Less: cash and cash equivalents	<u>(2,355)</u>	<u>(334)</u>
Net debt	76,710	85,621
Total equity	<u>(22,509)</u>	<u>(5,204)</u>
Total capital	<u>54,201</u>	<u>80,417</u>

32 Financial risk management

The Company's activities expose it to a variety of financial risks, including foreign exchange, interest rate risks and also market, credit and liquidity risks. The overall risks management program focuses on the minimizing of the potential unfavorable influence of the different kind of risks to the Group's business and operations.

Market risk

The Group is exposed to market risks, including the volatility of the global commodity markets, as well as local raw materials markets. Milkiland's management is constantly seeking for the opportunities of establishment of long-term relations with the clients and suppliers in order to mitigate those risks.

Foreign exchange risk

Foreign currency risk is a risk of losses resulting from adverse movements in different currency exchange rates against the Group's reporting currency, namely EUR. Foreign currency risk arises from potential future commercial transactions in foreign currencies, and recognition of assets and liabilities denominated in a currencies, other than reporting currency of the Company.

The Group primary exposure to foreign currency risk is related to borrowings, the majority of which are denominated in US dollars, while the lion's share of the Groups revenues come in RUB and UAH. The Group's management made several steps in order to mitigate this risk, including by partial transfer of the indebtedness previously denominated in US Dollars to UAH.

As of 31 December 2019 the Group's financial assets and financial liabilities were denominated in the following currencies:

	<u>EUR</u>	<u>USD</u>	<u>RUB</u>	<u>UAH</u>	<u>PLN</u>	<u>Total</u>

Loans and borrowings	12	60,577	12,710	10,196	2,460	85,955
Financial payables within trade and other payables	7	18,640	10,780	6,219	1,826	37,472
Total financial liabilities	19	79,217	23,490	16,415	4,286	123,427

The following table presents sensitivities of post-tax profit for the year to reasonably possible changes in exchange rates applied at the statement of financial position date relative to the functional currency of the respective Group entities, with all other variables held constant:

	2019	2018
USD strengthening by 10% (2018: 10%)	(715)	(749)
USD weakening by 10% (2018: 10%)	715	749
Euro strengthening by 10% (2018: 10%)	-	-
Euro weakening by 10% (2018: 10%)	-	-
PLN strengthening by 10% (2018: 10%)	3	4
PLN weakening by 10% (2018: 10%)	(3)	(4)
UAH strengthening by 10% (2018: 10%)	17	19
UAH weakening by 10% (2018: 10%)	(17)	(19)

The exposure was calculated only for monetary balances denominated in currencies other than the functional currency of the respective entity of the Group.

Credit risk

Credit risk refers to the risk exposure that a potential financial loss to the Company may occur if counterparty defaults on its contractual obligations. The maximum exposure to credit risk is the value of the assets which might be lost.

Credit risk arises from cash and cash equivalents and credit exposures to accounts receivable. The Company does not have derivative financial assets and available-for-sale investments.

Cash and cash equivalents. Cash and cash equivalents are placed in major multinational, Ukrainian, Russian and Polish banks. Analysis by credit quality of bank balances is as follows:

	<u>2019</u>	<u>2018</u>
Ratings by Moody's		
Baa1	-	11
Baa3	-	6
Ba1	-	1
Ba2	-	-
B2	129	70
B3	3	66
Caa1	14	20
Caa2	97	-
Unrated	2,091	128
Cash on hand	<u>21</u>	<u>32</u>
Total cash and cash equivalents	<u>2,355</u>	<u>334</u>

Trade and other financial receivables. The monitoring and controlling of credit risk is performed by sales department and analyst department of the Company. The credit quality of each new customer is evaluated before the Company provides it with the standard terms of supply, including credit limit and payment delay. The credit quality of customers is assessed taking into account their financial position, past experience and other factors. Customers that do not meet the credit quality requirements are supplied on a prepayment basis only. The Company controls following the credit limits of all existing customers as well as timely settlement of trade and other accounts receivable (note 7). Credit risk exposure mainly depends on the individual characteristics of customers, more particularly customers' default risk.

Trade and other accounts receivable are mainly represented by receivables from customers, which are not aiming to obtain the credit rating in their operating activity.

Quantitative disclosures of the credit risk exposure in relation to financial assets are set out below. Further disclosures regarding trade and other receivables, which are neither past due nor impaired, are provided in note 7.

	<u>31 December 2019</u>		<u>31 December 2018</u>	
	Carrying value	Maximum exposure	Carrying value	Maximum exposure
<i>Financial assets</i>				
Cash and cash equivalents	2,355	2,355	334	334
Trade and other receivables	<u>16,234</u>	<u>16,234</u>	<u>10,537</u>	<u>10,537</u>
	<u>18,589</u>	<u>18,589</u>	<u>10,871</u>	<u>10,871</u>

Interest rate risk

Borrowings issued at variable rates expose the Group to cash flow interest rate risk. The Group has no significant interest-bearing assets.

Interest rate risk arises from movements in interest rates which could affect the Company's financial results or the value of the Group's equity. A change in interest rates may cause variations in interest income and expense. The primary objective of the Group's interest rate management is carried out by the corporate finance department.

Monitoring of current market interest and analysis of the Group's interest-bearing position is performed as a part of interest rate risk management procedures. Monitoring is performed taking into consideration refinancing, renewal of existing positions and alternative financing.

At the end of 2019 the Group had approximately 38% (2018: 39%) of its borrowings in fixed rate instruments and 62% (2018: 61%) in variable rate instruments.

Liquidity risk

Liquidity risk is a risk, when the Group is not able to pay all liabilities after maturity date. The Group manages and controls over the liquidity. The Group uses procedures for preparation of budget and forecasting cash flows that provides availability of necessary funds for fulfillment its payment liabilities. Based on the estimated cash flows a decision is made to invest cash funds or attract financing, if necessary. Performance of the credit risk policy management gives the Group sufficient cash to repay its debts on time.

The table below analyses the Company's financial liabilities into relevant maturity groupings based on the remaining period at the statement of financial position to the contractual maturity date. The amounts disclosed in the table are the contractual undiscounted cash flows, which approximate their fair value:

	Up to 6 months	6-12 months	1 - 3 years	3 - 5 years
Trade and other accounts payable (note 14)	51,896	-	-	-
Borrowings	77,880	1,328	1,550	352
Total	129,776	1,328	1,550	352

Comparative information at 31 December 2018 is as follows:

	Up to 6 months	6-12 months	1 - 3 years	3 - 5 years
Trade and other accounts payable (note 14)	37,472	-	-	-
Borrowings	72,515	10,910	1,740	790
Total	109,987	10,910	1,740	790

Financial instruments carried at fair value. The Group does not have available-for-sale investments. Cash and cash equivalents are carried at amortized cost which approximates current fair value.

Financial assets at amortized cost. An estimated fair value of instruments at fixed interest rate is based upon the method of discounted estimated future cash flows applying interest rates effective at the borrowed funds market for new instruments that provide for the same credit risk and the same maturity term. Discount rates depend on the credit risk from a contractor. The carrying amount of buyers and customers' accounts receivable equals to their fair value.

Financial liabilities at amortized cost. Fair value is evaluated based upon market quotations, if any. An estimated fair value of instruments with fixed interest rate and defined maturity date that do not have market quotation, is based on the discounting estimated cash flows applying interest rates for new instruments with the same credit risk and defined maturity date. The carrying amount of financial liabilities equals to their fair value.

33 Earnings per share

35 Subsequent events

Implementing of an arbitrage management of LLC “Kursk milk”

On March 20, 2020, Milkiland published an official statement that the Company received the information that on March 6, 2020, the Arbitrage Court of Kursk oblast (region) of Russian Federation adopted a decision of insolvency of LLC “Kursk milk” (“the Debtor”), subsidiary of Milkiland, and implemented of an arbitrage management of LLC “Kursk milk” within the bankruptcy procedure of the Debtor, according to the petition of Public JSC Bank “Vozrozhdenie” (“the Creditor”).

This petition was claiming the inability of the Debtor to repay the indebtedness to the Creditor in the total amount of RUB 101.9 million (c. EUR 1.2 million) during for more than 3 months term.

By the above mentioned Court decision, Mr. Alexander Volchkov was appointed as an arbitrage administrator of LLC “Kursk milk”.

The Company together with LLC “Kursk milk” is striving for entering into the debt settlement agreement with the creditors and fulfilment of its conditions.

Intended transfer of corporate seat of Milkiland N.V. from the Netherlands to Cyprus

On April 16, 2020, Milkiland published an official statement that on 6 April 2020 the Board of Directors of Milkiland N.V. adopted a resolution on ratifying the plan to cross-border migrate and transfer the Company's seat from Netherlands to Cyprus by means of converting the Company from a public company governed by Dutch Law (naamloze vennootschap) to a public limited liability Company under Cyprus Law (the “Re-domiciliation”). The Board also ratified a management report which explained the rationale for the proposed migration (the “Management Report”). The Board also recommended to the Annual General Meeting of Shareholders of Milkiland 2020 to approve the cross-border migration and transfer of corporate seat of Milkiland from the Netherlands to the Republic of Cyprus and to convert the legal form of Milkiland from a public company organized under the laws of the Netherlands to a public limited company under the laws of Cyprus. The publication of the convening notice for the Annual General Meeting of Shareholders of Milkiland 2020 will take place at least 42 days before the meeting.

The plan for Re-domiciliation takes into account the judgment of the European Court of Justice of 16 December 2008, Case C-210/06 regarding *Cartesio Oktató és Szolgáltató bt*, that deals with cross-border transfer of the seat of a company within the meaning of article 48 of the Treaty Establishing the European Community (the “EC”). The European Court of Justice determined in the *Cartesio*-Judgement that the right to establishment laid down in article 43 taken with article 48 EC - that deals with the freedom of establishment of companies - implies that companies can transfer their corporate seat to another Member State without dissolution and liquidation of the company, provided that they convert into a company governed by the law of the other Member State, to the extent that it is permitted to do so under the laws of that other Member State.

Furthermore, Cyprus Law permits that a public company incorporated under the laws of the Netherlands converts itself into a public limited liability company governed by Cyprus law without being dissolved.

The new name of the Company after the Re-domiciliation will be Milkiland Public Company Limited. The Company will be a public limited liability company organized and existing under the laws of Cyprus, having its corporate seat in Nicosia, Cyprus and registered with the Cyprus Registrar of Companies.

Pursuant to the Management Report, the main purpose of implementing the Re-domiciliation is to simplify the structure of the group of companies of which the Company is a part of.

The Re-domiciliation will take place without the Company being dissolved or ceasing to exist and it will not lead to the reincorporation of the Company. Consequently, the shares in the capital of the Company will not be replaced by new shares and will still be listed on the Warsaw Stock Exchange.

The Re-domiciliation will not affect any legal relationship between the Company and third parties. The Re-domiciliation will not entitle any third parties to terminate any existing agreement and legal relationship with the Company. The business of the Company will be continued and will not change as a result of the Re-domiciliation.

As a result of the Re-domiciliation, the Company will no longer be subject to Dutch corporate law and will become subject to Cyprus corporate law.

The shares in the capital of the Company will not be replaced by new shares. The voting rights and rights to profit and other distributions will not be affected by the Re-domiciliation.

The Re-domiciliation will cause the corporate seat of the Company to be transferred from Amsterdam, the Netherlands, to Nicosia, Cyprus. Consequently, the Company will lose its corporate domicile in the Netherlands. As a result thereof creditors will no longer be able to commence legal proceedings against the Company in the Netherlands based on its corporate domicile. Creditors will be able to commence legal proceedings against the Company in the Netherlands based on agreements provided that such agreements are governed by the laws of the Netherlands or provided that parties to such agreement have agreed that proceedings are to be submitted to the exclusive jurisdiction of the courts of the Netherlands.

The Company is intending to complete the Re-domiciliation by the end of August, 2020.

Notes to the company financial statements

1. General

Reporting entity Milkiland N.V. (the “Company”) was incorporated on 13 July 2007. It changed its Articles of Association on 23 May 2008 amending its legal form to public limited liability company. The financial statements of the Company are included in the consolidated statements of Milkiland N.V. Chamber of Commerce number 34278769.

2. Significant accounting policies

Basis of preparation

The Company financial statements have been prepared in accordance with the provisions of Part 9, Book 2, of the Dutch Civil Code. The Company uses the option of Article 362.8 of Part 9, Book 2, of the Dutch Civil Code to prepare the Company financial statements, using the same accounting policies as in the consolidated financial statements. Valuation is based on recognition and measurement requirements of accounting standards adopted by the EU (i.e., only IFRS that is adopted for use in the EU at the date of authorization) as explained further in the notes to the consolidated financial statements.

Foreign currency

Assets and liabilities in foreign currencies are translated at the official rates of exchange ruling on statement of financial position dates. Transactions in foreign currencies are translated at the applicable exchange rate on the transaction dates. The resulting exchange differences are accounted for in the statement of comprehensive income.

The financial statements of the foreign subsidiaries are translated at the rates of exchange prevailing at the end of the accounting periods. Differences resulting from the translation of assets and liabilities of the group of companies at the rates prevailing at the beginning and at the end of the year are shown as a separate item in shareholders' equity.

Financial fixed assets

Subsidiaries and other participating interests in which significant influence may be exerted are stated at net asset value, using the equity method. The net asset value is calculated on the basis of the accounting policies included in these financial statements. Participating interests whose figures cannot be brought in line with these policies due to insufficient information, are valued based on the financial statements of the participating interest involved. Participating interests with a net asset value of less than nil are carried at nil. If the investing company is liable for the participating interest's debts, a provision will be formed.

Receivables

Accounts receivable are shown after deduction of a provision for bad and doubtful debts where appropriate.

The accounts receivable have a maturity date due within one year.

Cash and cash equivalents

Cash and bank balances are freely disposable, unless stated otherwise.

Current liabilities

The short term liabilities are due within one year.

Bank borrowings

Bank borrowings are initially recognized at fair value net of any transaction costs directly attributable to the issue of the instrument. Such interest bearing liabilities are subsequently measured at amortized cost using the effective interest rate method, which ensures that any interest expense over the period to repayment is at a constant rate on the balance of the liability carried in the statement of financial position.

Profit of participating interests. The share of profit of participating interests consists of the share of the Company in the results of these participating interests. Results on transactions, where the transfer of assets and liabilities between the Company and its participating interests and mutually between participating interests themselves, are not recognized.

3. Goodwill

The goodwill of EUR 1,381 thousand (2018: EUR 1,197 thousand) is a result of a subsidiary acquisition and recognized as an asset. Goodwill is initially recognized as an asset during the primary evaluation. Impairment testing is performed annually.

For details see note 10 in consolidated financial statements.

4. Investments in participating interests

	31 December 2019	31 December 2018

Remuneration of Board of Directors members is disclosed in Note 5 and Corporate Governance Report included in Annual report.

Board of Directors of Milkiland N.V.

Amsterdam, 28 April 2020

A. Yurkevych

O. Yurkevich

O. Rozhko

V. Rekov

W.S. van Walt Meijer

P. Sheremeta

OTHER INFORMATION /Milkiland N.V./

Other information

The Board of Directors is charged with the management of the Company, subject to the restrictions contained in these Articles of Association. The board of directors may entrust the executive directors with the operational management of the company and the business enterprise connected therewith. Furthermore, the board of directors may entrust the executive directors with the preparation of the decision making process of the board of directors and the implementation of the decisions taken by the board of directors. The executive directors shall determine which duties regarding the operational management of the company and the business enterprises connected therewith will be carried out by one or more other persons.

The non-executive directors shall supervise the policy and the fulfillment of duties of the executive directors and the general affairs of the company.

Any profit remaining shall be at the disposal of the General Meeting of Shareholders for distribution of dividend or reservation. In calculating the amount of profits to be distributed on each share, only the par value of the shares shall be regarded.

The Company shall only be capable of making distributions to shareholders and other persons who are entitled to profits that qualify for distribution if the Company's equity is in excess of the paid and called-up portion of the share capital increased by the reserves that must be set aside under the provisions of the law.

In the calculation of the distribution of profits the shares which the Company holds in its own share capital shall be disregarded. Distribution of profits shall take place after confirmation and adoption of the Annual Accounts showing that this is allowed. The Board of Directors shall have power to pay one or more interim dividends provided.

Company has no shares without voting rights and no shares without profit rights or with limited profit rights.
